Indonesia Index ETF (IDX)

FEBRUARY 28, 2014

Fund Description

The Indonesia Index ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors Indonesia Index. The Index provides exposure to publicly traded companies that are domiciled and primarily listed in Indonesia, or that generate at least 50% of their revenues in Indonesia. As such, the Fund is subject to the risks of investing in this country.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Net asset value (NAV) per share is calculated by subtracting total liabilities from the total assets, then dividing by the number of shares outstanding. Share price is the last price at which shares were traded on the Fund's primary listing exchange. Fund shares may trade at, above or below NAV. Performance current to the most recent month end available by calling 888.MKT.VCTR or by visiting marketvectorsetfs.com.

These are not recommendations to buy or sell any security.

Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 888.MKT.VCTR or visit marketvectorsetfs.com. Please read the prospectus and summary prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called creation units and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

Averages are market weighted. Price/Book Ratio is the price of a security divided by the book value per share of the security. Price/Earnings Ratio is the price of a security divided by the last twelve months earnings per share of the security. Market Capitalization of an individual, publicly traded company is calculated by multiplying the company's stock price by the total number of its shares outstanding.

The Fund is subject to elevated risks, including those associated with investing in foreign securities, in particular Indonesian issuers, which include, among others, expropriation, confiscatory taxation, political instability, armed conflict and social instability. Investors should be willing to accept a high degree of volatility and the potential of significant loss. The Fund may loan its securities, which may subject it to additional credit and counterparty risk. Please refer to the prospectus for complete risk information.
