### **About Van Eck Global**

Founded in 1955, Van Eck Associates Corporation was among the first U.S. money managers helping investors achieve greater diversification through global investing. Today the firm continues the 50+ year tradition by offering global investment choices in hard assets, emerging markets, precious metals including gold, and other specialized asset classes.

Market Vectors exchange-traded products have been offered by Van Eck Global since 2006 when the firm launched the nation's first gold mining ETF. Today, Market Vectors ETFs and ETNs span several asset classes, including equities, municipal bonds and currency markets.

Van Eck Global also offers mutual funds, insurance trust funds, separate accounts and alternative investments. Designed for investors seeking innovative choices for portfolio diversification, Van Eck Global's investment products are often categorized in asset classes having returns with low correlations to those of more traditional U.S. equity and fixed income investments.

**Principal Risk Factors:** Municipal bonds are subject to risks related to litigation, legislation, political change, conditions in underlying sectors or in local business communities and economies, bankruptcy or other changes in the issuer's financial condition, and/or the discontinuance of taxes supporting the project or assets or the inability to collect revenues for the project or from the assets. Bonds and bond funds will decrease in value as interest rates rise. Additional risks include credit, interest rate, call, reinvestment, tax, market and lease obligation risk. High-yield municipal bonds are subject to greater risk of loss of income and principal than higher-rated securities, and are likely to be more sensitive to adverse economic changes or individual municipal developments than those of higher-rated securities. Interest and principal payments for pre-refunded bonds are funded from securities in an escrow account. The escrowed securities do not guarantee the price of these bonds. Municipal bonds may be less liquid than taxable bonds. There is no guarantee that the Fund's income will be exempt from federal or state income taxes, and changes in those tax rates or in alternative minimum tax rates or in the tax treatment of municipal bonds may make them less attractive as investments and cause them to lose value. Capital gains, if any, are subject to capital gains tax.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.
