DAXglobal® NUCLEAR ENERGY INDEX REBALANCING ADDS AREVA

NEW YORK, March 24, 2008 – The DAXglobal® Nuclear Energy Index[†] (Bloomberg ticker: DXNE) has been rebalanced to include Areva, a global leader in nuclear power that is based in France and operates across all sectors of the industry. Areva has been added because it now meets index criteria regarding shares traded worldwide, and will enter the index with a weighting of 3.4%. This change was announced in mid-March and will take effect tomorrow.

In addition, Strateco Resources and Electricite de France have been added to the index with initial weightings of 0.6% and 8.0%, respectively. No companies were deleted from the index. DXNE is rebalanced quarterly.

The Index is comprised of a basket of the securities of 38 companies from around the world that are engaged in various sectors of the nuclear industry including uranium mining, nuclear plant infrastructure, uranium enrichment, uranium storage, nuclear generation, nuclear equipment and nuclear fuel transportation. Launched on July 16, 2007, the index includes many other companies of global prominence, including Mitsubishi Heavy Industries, Hitachi and Cameco.

The Market Vectors–Nuclear Energy ETF (Amex: NLR) is an exchange-traded fund that seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Index. NLR generally holds all of the securities that comprise the Index in proportion to their weighting in the Index.

[†]About the DAXglobal® Nuclear Energy Index

The Index is intended to give investors an efficient way to track the performance of equity securities of selected companies engaged in the nuclear energy industry. It is calculated using a modified market capitalization weighting methodology. The Index is weighted based on the market capitalization of each of the component stocks, modified to conform to various asset diversification requirements, which are applied in conjunction with the scheduled quarterly adjustments to the

Index. The value of the Index is disseminated every 15 seconds between the hours of approximately 9:30 a.m. and 4:15 p.m. Eastern Time. The Index is a total return index.

The DAXglobal® Nuclear Energy Index, a trademark of Deutsche Börse AG, is licensed for use by Van Eck Associates Corporation in connection with NLR. Deutsche Börse AG does not sponsor or endorse NLR and makes no warranty or representation as to the accuracy and/or completeness of the Index or results to be obtained by any person from use of the Index in connection with trading NLR.

About Deutsche Börse AG

Deutsche Börse Group offers more than a marketplace for trading shares and other securities. It is a transaction services provider with advanced technology to afford companies and investors access to global capital markets.

Deutsche Börse has a broader basis than any of its competitors. Its product and services mix cover the entire process chain: securities and derivatives trading, transaction settlement, provision of market information as well as the development and operation of electronic trading systems. With its process-oriented business model, Deutsche Börse increases capital markets efficiency. Issuers benefit from low capital costs and investors enjoy the advantages of high liquidity and low transaction costs.

About Van Eck Global

Founded in 1955, Van Eck Associates Corporation was among the first U.S. money managers helping investors achieve greater diversification through global investing. Today, the firm continues the 50+ year tradition by offering global investment choices in hard assets, emerging markets, precious metals including gold, and other specialized asset classes.

Van Eck also offers a number of mutual funds. Van Eck's mutual funds are sold nationwide through retail brokers, financial planners and investment advisors. Designed for investors seeking innovative choices for portfolio diversification, they are often categorized in asset classes having returns with low correlations to those of more traditional U.S. equity and fixed income investments.

Van Eck also offers exchange-traded funds, separate accounts and alternative investments. In addition, it offers the Worldwide Insurance Trust Funds, a series of investment choices within the variable annuity contracts and variable life policies of widely known and highly regarded insurers.

NLR is subject to risks associated with the stock market, index tracking, sector investing, investing in small- or mid-cap companies, replication management, non-diversified investments, absence of prior active market, trading issues, fluctuation of net asset value and risks of investing in nuclear energy investments. Because of their narrow focus, sector investments tend to be more volatile than investments that diversify across many sectors and companies.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind.
