

Solar Energy ETF (KWT)

▶ DECEMBER 31, 2014

Fund Description

The Market Vectors Solar Energy ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the the Market Vectors Global Solar Energy Index. The Index is intended to track the overall performance of companies involved in photovoltaic and solar power, or the provision of solar power equipment/technologies and material or services to solar power equipment/technologies producers.

Performance History (%)

AS OF DECEMBER 31, 2014		LIFE	1M	3M	YTD	1YR	3YR	5YR

Periods greater than one year are annualized.

Index data prior to March 18, 2013 reflects that of the Ardour Solar Energy Index (SOLRXT). From March 18, 2013, forward, the index data reflects that of the Fund's underlying index, Market Vectors Global Solar Energy Index (MVKWTR). Index history which includes periods prior to March 18, 2013 reflects a blend of the performance of SOLRXT and MVKWTR and is not intended for third party use.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Net asset value (NAV) per share is calculated by subtracting total liabilities from the total assets, then dividing by the number of shares outstanding. Share price is the last price at which shares were traded on the Fund's primary listing exchange. Performance current to the most recent month end is available by calling 888.MKT.VCTR or by visiting marketvectorsetfs.com.

Fund Details

These are not recommendations to buy or sell any security.

Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 888.MKT.VCTR or visit marketvectorsetfs.com. Please read the prospectus and summary prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called creation units and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

Averages are market weighted. Price/Book Ratio is the price of a security divided by the book value per share of the security. Price/Earnings Ratio is the price of a security divided by the last twelve months earnings per share of the security. Market Capitalization of an individual, publicly traded company is calculated by multiplying the company's stock price by the total number of its shares outstanding. 30-Day SEC Yield is a standard calculation developed by the Securities and Exchange Commission that allows for fairer comparisons among funds. It is based on the most recent 30-day period and reflects the investment income earned after deducting a fund's expenses for the period.

An investment in the Fund may be subject to risks which include, among others, competitive pressures, technological development and obsolescence of technology, short product cycles, uncertainty of solar energy adoption, commodity price volatility, import controls, availability of certain inputs and materials required for production, depletion of resources, higher relative volatility to companies in more established industries, unconventional valuation methods, and reductions to government subsidies, all of which may adversely affect the Fund. Investing in Chinese issuers involves risks which include, among others, lack of liquidity and price volatility, currency devaluations and exchange rate fluctuations, intervention by the Chinese government, nationalization or expropriation, limitations on the use of brokers, and trade limitations, all of which may adversely affect the Fund. Foreign and emerging markets investments are subject to risks, which include changes in economic and political conditions, foreign currency fluctuations, changes in foreign regulations, changes in currency exchange rates, unstable governments, and limited trading capacity which may make these investments volatile in price or difficult to trade. Small-, medium-, and micro-capitalization companies may be subject to elevated risks. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

Market Vectors Global Solar Energy Index is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. The Market Vectors Solar Energy ETF is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.
