

# Mortgage REIT Income ETF (MORT)

▶ JANUARY 31, 2015

## Fund Description

The Market Vectors Mortgage REIT Income ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors Global Mortgage REITs Index. The Index is intended to track the overall performance of mortgage real estate investment trusts.

## Fund Expenses<sup>1</sup>

|                            |        |
|----------------------------|--------|
| MANAGEMENT FEE             | 0.40%  |
| OTHER EXPENSES             | 0.20%  |
| GROSS EXPENSE RATIO        | 0.60%  |
| WAIVERS AND REIMBURSEMENTS | -0.19% |
| NET EXPENSE RATIO          | 0.41%  |

<sup>1</sup>Expenses are capped contractually until 9/1/2015. Cap excludes certain expenses, such as interest.

*Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses. You cannot invest directly in an Index.*

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Net asset value (NAV) per share is calculated by subtracting total liabilities from the total assets, then dividing by the number of shares outstanding. Share price is the last price at which shares were traded on the Fund's primary listing exchange. Performance current to the most recent month end is available by calling 888.MKT.VCTR or by visiting marketvectorsetfs.com.

| Fund Data                      |             |
|--------------------------------|-------------|
| No. of Securities              | 24          |
| Currency                       | USD         |
| Price/Earnings Ratio           | 9.15        |
| Price/Book Ratio               | 0.88        |
| Avg. Weighted Market Cap (\$M) | 4,016.7     |
| 30-Day SEC Yield*              | 10.63%      |
| 52 Week High/Low               | 25.52/23.07 |

\*In the absence of temporary waivers or reimbursements, the 30-Day SEC Yield would have been 10.41%.

| Fund Holdings (weight in %)             |         |         |

*These are not recommendations to buy or sell any security.*

**Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 888.MKT.VCTR or visit [marketvectorsetfs.com](http://marketvectorsetfs.com). Please read the prospectus and summary prospectus carefully before investing.**

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called creation units and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

Averages are market weighted. Price/Book Ratio is the price of a security divided by the book value per share of the security. Price/Earnings Ratio is the price of a security divided by the last twelve months earnings per share of the security. Market Capitalization of an individual, publicly traded company is calculated by multiplying the company's stock price by the total number of its shares outstanding. 30-Day SEC Yield is a standard calculation developed by the Securities and Exchange Commission that allows for fairer comparisons among funds. It is based on the most recent 30-day period and reflects the investment income earned after deducting a fund's expenses for the period.

An investment in the Fund may be subject to risks which include, among others, credit risk, additional risks associated with mortgage-backed securities offered by private issuers, unexpected high rates of default on mortgages, failure of private insurers to meet their obligations, interest rate risk, leverage risk which may cause a mortgage REIT to suffer increased losses in adverse market conditions, prepayment risk, and tax requirements, all of which may adversely affect the Fund. Small- and medium-capitalization companies may be subject to elevated risks. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

Market Vectors Global Mortgage REITs Index is the exclusive property of Market Vectors Index Solutions GmbH (a wholly owned subsidiary of the Adviser), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards Market Vectors Index Solutions GmbH, Solactive AG has no obligation to point out errors in the Index to third parties. The Market Vectors Mortgage REIT Income ETF is not sponsored, endorsed, sold or promoted by Market Vectors Index Solutions GmbH and Market Vectors Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.
