Expenses are capped contractually until 05/01/15 at 1.38% for Class A, 2.20% for Class C, 1.00% for Class I and 1.13% for Class Y. Caps exclude certain expenses, such as interest.

The tables present past performance which is no guarantee of future results and which may be lower or higher than current performance. Returns reflect applicable fee waivers and/or expense reimbursements. Had the Fund incurred all expenses and fees, investment returns would have been reduced. Investment returns and Fund share values will fluctuate so that investor’s shares, when redeemed, may be worth more or less than their original cost. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Index returns assume that dividends of the Index constituents in the Index have been reinvested. The graph above illustrates a hypothetical \$10,000 investment in the Fund. Returns reflect capital appreciation and the reinvestment of dividends and capital gains, if any, as well as all fees and expenses but do not reflect any sales load. All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results. See the reverse side for complete performance information.

Source: Van Eck Global. Portfolio facts and statistics are shown for Class A shares only unless otherwise noted; other classes may have different characteristics. Market capitalization (cap) is the value of a corporation as determined by the market price of its issued and outstanding common stock. Volatility is the annualized standard deviation of monthly returns. Sharpe ratio is the return less the risk free rate divided by the standard deviation and measures risk-adjusted return. Alpha is a measure of the difference between a portfolio's actual and expected returns, given its level of risk as measured by beta. Beta is a measure of sensitivity to market movements. R-squared reflects the percentage of a fund's movements that can be explained by movements in its benchmark index. Price-to-Earnings (P/E) ratio is the price of a stock divided by its earnings per share. EPS is "earnings per share". Price-to-Book (P/B) ratio is the ratio of a stocks price to its book value.

The S&P® North American Natural Resources Sector Index (SPGINRTR) includes mining, energy, paper and forest products, and plantation-owning companies. The S&P 500 Index is calculated with dividends reinvested and consists of 500 widely held common stocks covering industrial, utility, financial and transportation sectors.

You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program, not a complete program. The Fund is subject to risks associated with concentrating its investments in hard assets and the hard assets sector, including precious metals, natural resources and real estate, and can be significantly affected by events relating to these industries, including international political and economic developments, inflation, and other factors. The Fund's portfolio securities may experience substantial price fluctuations as a result of these factors, and may move independently of the trends of industrialized companies. The Fund's investments in foreign securities involve risks related to adverse political and economic developments unique to a country or a region, currency fluctuations or controls, and the possibility of arbitrary action by foreign governments, or political, economic or social instability. The Fund is subject to risks associated with investments in debt securities, derivatives, commodity-linked instruments, illiquid securities, asset-backed securities and CMOs. The Fund is also subject to inflation risk, market risk, non-diversification risk, leverage risk, credit risk and counterparty risk. Please see the prospectus and summary prospectus for information on these and other risk considerations.
