## DECEMBER 2013 ADDITIONAL INCOME DISTRIBUTIONS FOR MARKET VECTORS AGRIBUSINESS ETF AND MARKET VECTORS BRAZIL SMALL-CAP ETF

NEW YORK, December 26, 2013 – The Market Vectors ETF Trust announced today the December 2013 additional income distributions per share for the Market Vectors Agribusiness ETF and Market Vectors Brazil Small-Cap ETF.

The following dates apply to today's distribution declarations:

<u>Ex-Date</u>	<u>Record Date</u>	<u>Payable Date</u>
December 27, 2013	December 31, 2013	January 3, 2014

<u>Fund</u>	<u>Ticker</u>	<u>Distribution Frequency</u>	<u>Distribution Amount Per Share</u>
Market Vectors Agribusiness ETF	<a href="#">MOO</a>	Special	\$0.1120
Market Vectors Brazil Small-Cap ETF	<a href="#">BRF</a>	Special	\$0.0180

The majority, and possibly all, of these distributions will be paid out of net investment income earned by the Funds. A portion of this distribution may come from net short-term realized capital gains or return of capital.

The amount of dividends paid by each fund may vary from time to time. Past amounts of dividends are no guarantee of future dividend payment amounts.

## About Market Vectors ETFs

Market Vectors exchange-traded products have been offered since 2006 and span many asset classes, including equities, fixed income (municipal and international bonds) and currency markets. The Market Vectors family totaled \$22.5 billion in assets under management, making it the seventh largest ETP family in the U.S. and 10<sup>th</sup> largest worldwide as of November 30, 2013.

Market Vectors ETFs are sponsored by Van Eck Global. Founded in 1955, Van Eck Global was among the first U.S. money managers helping investors achieve greater diversification through global investing. Today, the firm continues this tradition by offering innovative, actively managed investment choices in hard assets, emerging markets, precious metals including gold, and other alternative asset classes. Van Eck Global has offices around the world and managed approximately \$31.2 billion in investor assets as of November 30, 2013.

The principal risks of investing in Market Vectors Equity ETFs include sector, market, economic, political, foreign currency, world event, index tracking and non-diversification risks, as well as fluctuations in net asset value and the risks associated with investing in less developed capital markets. The Funds may loan their securities, which may subject them to additional credit and counterparty risk. **Please see the Prospectus and Summary Prospectus of each Fund for more complete information regarding its specific risks.**

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called “creation units” and otherwise can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in kind. Shares may trade at a premium or discount to their NAV in the secondary market.

The “net asset value” (NAV) of an ETF is determined at the close of each business day, and represents the dollar value of one share of the ETF; it is calculated by taking the total assets of an ETF subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as an ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV. Total returns are based upon closing “market price” (price) of the ETF on the dates listed.

**Investors may call 888.MKT.VCTR or visit [marketvectorsetfs.com](http://marketvectorsetfs.com) for a free [prospectus](#) and [summary prospectus](#). Investing involves risk, including possible loss of principal. An investor should consider the investment objective, risks, and charges and expenses of Market Vectors ETFs carefully before investing. The prospectus and summary prospectus contains this and other information. Please read the prospectus and summary prospectus carefully before investing.**
