

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Sub-Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Sub-Fund. You are advised to read it so you can make an informed decision about whether to invest.

Unconstrained Emerging Markets Bond UCITS (the "Sub-Fund")

a Sub-Fund of VanEck ICAV (the "ICAV")

Share Class: USD I1 Inc (ISIN: IE00BYXQSF37)

The management company of the Sub-Fund is VanEck Investments Limited.
VanEck Investments Limited is a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The investment objective of the Sub-Fund is to seek total return, consisting of income and capital appreciation.

The investment manager (Van Eck Associates Corporation, hereinafter, the "Investment Manager") will seek to achieve the investment objective of the Sub-Fund by investing principally in emerging market bonds. For this purpose emerging markets include countries such as Taiwan, China, India, South Africa and Brazil. An instrument will qualify as an emerging market bond if it is either (i) issued by an emerging market government, quasi-government or corporate entity (regardless of the currency in which it is denominated) or (ii) denominated in the currency of an emerging market country (regardless of the location of the issuer). Bonds may be fixed or floating rate. The Sub-Fund may also invest on an ancillary basis (i) in non-emerging market bonds and (ii) emerging market and developed market currencies (as further set out below). There is no limit on the amount the Sub-Fund may invest in one country or in securities denominated in one currency. The Sub-Fund may also invest in bonds with a credit rating below BBB ("junk bonds").

The Sub-Fund expects to invest in debt issued in emerging market currencies and in developed market currencies by governments and government owned, controlled, or related entities (and their agencies and subdivisions), and by corporations. The Sub-Fund may invest in ancillary liquid assets, asset-backed securities (ABS) or mortgage-backed securities (MBS), American depository receipts, corporate bonds, debentures and notes including participation notes (P- Notes) (contracts issued by banks or broker-dealers that provide exposure to an underlying security on a 1 for 1 basis on the underlying security which may be used to access a particular market). The Sub-Fund may use P Notes or American Depository Receipts (ADR), to gain exposure to securities instead of using physical securities in circumstances where, due to local restrictions or quota limitations, it is not possible to hold these directly or where it is otherwise advantageous to the

Sub-Fund to do so. The Sub-Fund may invest in such P Notes to gain exposure to restricted markets such as the Saudi Arabian or Indian market.

The Sub-Fund may also invest in credit-linked notes (debt securities of companies whose interest payments and/or payment at maturity depend on the performance of one or more underlying credit exposures) or money market instruments including but not limited to certificates of deposits issued by banks, treasury notes, depository receipts, freely transferable promissory notes and short term bank deposits.

The Sub-Fund may also invest in emerging market or developed market currencies. The Sub-Fund may use financial derivative instruments (FDI) to gain exposure to interest rates, foreign exchange rates or currencies, denominated in any currency and to enhance return, hedge (or protect) the value of its assets against adverse market movements, currency exchange rates, interest rates and movements in the securities markets, manage certain investment risks and/or as a substitute for the purchase or sale of securities. The Sub-Fund may also use FX forwards and non-deliverable forwards to implement "cross-hedging" strategies, which involve the use of one currency to hedge against the decline in the value of another currency.

The Sub-Fund may invest in exchange-traded funds ("ETFs") to participate in, or gain rapid exposure to, certain market sectors in particular countries such as high yield markets in India, or when direct investments in certain countries are not permitted. The Sub-Fund may also invest on an ancillary basis in money market funds.

The Sub-Fund is denominated in USD. This share class is in USD.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You may redeem shares in this Sub-Fund on a daily basis and in accordance with the relevant notice period.

Distribution policy: Income distributed.

Risk and Reward Profile

What does it mean?

The risk and reward indicator is a measure of risk based on the past performance and simulated past performance of the Sub-Fund. The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore the risk classification may change over time. Even if the Sub-Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

Why this Sub-Fund in this category?

The Sub-Fund is rated 4 due to the nature of its investments. Specifically, the Sub-Fund's investments are concentrated emerging market debt securities (no less than two-thirds of the Sub-Fund's assets).

Are there any other particular risks?

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss.

Bonds and bond funds will decrease in value as interest rates rise. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets.

As the Sub-Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund will be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return.

The Sub-Fund may also be subject to credit risk, interest rate risk, sovereign debt risk, tax risk, non-diversification risk and risks associated with non-investment grade securities. Non-investment grade securities may be subject to greater market fluctuations and risk of default or loss of income and principal than securities in higher rating categories.

For more detailed information about the risks related to the investment in the Sub-Fund, please see the "Risk Factors" section in the Sub-Fund supplement of the prospectus, available on www.vaneck.com.
