

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck Vectors™ Video Gaming and eSports UCITS ETF (the "Fund")

a sub-fund of VanEck Vectors™ UCITS ETFs plc (the "Company")

Share Class: USD A ISIN: IE00BYWQWR46

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the MVIS Global Video Gaming and eSports Index (the "Index").

In order to seek to achieve its investment objective, the investment manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index, being the stock, American depository receipts (ADRs), and global depository receipts (DGRs). Such equity securities must be issued by companies who generate at least 50% of their revenues from video gaming and/or eSports listed or traded on the markets referred to in appendix II of the prospectus.

The Fund may hold the equity securities of companies whose predominant economic activity is in developing video games and related software or hardware such as computer processors and graphics cards used in video gaming systems and related hardware such as controllers, headsets and video gaming consoles. Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Investment Manager may utilise an optimised sampling methodology. The Fund may invest more than 20% of its net asset value in emerging markets.

The Fund may also (or alternatively) invest in financial derivative instruments (FDI), for efficient portfolio management and/or hedging purposes only, which relate to the Index or constituents of the Index.

The FDI which the Fund may use are futures, swaps, currency forwards and non-deliverable forwards (a forward contract that does not require settlement on

maturity) and are dealt on any of the regulated markets set out in the list of markets in Appendix II of the prospectus.

The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the markets referred to in appendix II of the prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short term basis and in anticipation of participation in a rights offering. The Fund invests in the underlying (physical) securities that make up the Index and does not take part in securities lending.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 6 because funds of this type have experienced very high rises and falls in value in the past.

Investments in underlying equity securities of the Index are subject to sector-specific risks which include competitive pressure, technology risks and legal risks.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- **Equity Market Risk:** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.
- **Industry or Sector Concentration Risk:** The Fund's assets may be concentrated in one or more particular sectors or industries. The Fund may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund's performance to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.
- **Risk of investing in smaller companies:** The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.
