Fund Description

31 March 2021

VanEck Vectors Gold Miners UCITS ETF is a UCITS compliant exchange-traded fund (ETF) that invests in a portfolio of equity securities. The ETF aims to provide investment returns that closely track the performance of the NYSE Arca Gold Miners Index (GDMNTR).

NYSE Arca Gold Miners Index is a pure-play, global index that tracks the performance of the largest publicly-traded companies worldwide which are primarily involved in the mining for gold and silver. The modified market- capitalisation weighted index is reviewed quarterly based on a strictly rules-based methodology. Please consult www.nyse.com for further index information.

Performance History (%)

Month End as of 31 Mar 2021	1 MO	YTD	1 YR	3 YR	5 YR	ETF INCEPTION
ETF (NAV)	3.45	-10.15	38.38	14.36	10.59	9.41
GDMNTR (Index)	3.48	-10.04	39.10	14.89	11.11	9.92

Periods greater than one year are annualised.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance.

Investment returns and ETF share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. ETF returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV but do not reflect the payment of transaction costs. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

The "Net Asset Value" (NAV) of a VanEck Vectors UCITS ETF is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck Vectors UCITS ETF investors should not expect to buy or sell shares at NAV.

Please see the reverse side for important disclaimers.
