VANECK VECTORS™ UCITS ETFs plc

Supplement dated 26 July 2019

for

VANECK VECTORS™ J.P. MORGAN EM LOCAL CURRENCY BOND UCITS ETF

This Supplement contains specific information in relation to the **VanEck Vectors™ J.P. Morgan EM Local Currency Bond UCITS ETF** (the **Fund**), a sub-fund of **VanEck Vectors™ UCITS ETFs plc** (the **Company**), an umbrella fund with segregated liability between sub-funds and authorised by the Central Bank pursuant to the Regulations.

This Supplement forms part of, may not be distributed unless accompanied by (other than to prior recipients of the Prospectus of the Company dated 23 January 2019, as may be amended, supplemented or modified from time to time), and should be read in conjunction with the Prospectus for the Company.

THIS DOCUMENT IS IMPORTANT. YOU SHOULD NOT PURCHASE SHARES IN THE FUND DESCRIBED IN THIS SUPPLEMENT UNLESS YOU HAVE ENSURED THAT YOU FULLY UNDERSTAND THE NATURE OF SUCH AN INVESTMENT AND THE RISKS INVOLVED AND ARE SATISFIED THAT THE INVESTMENT IS SUITED TO YOUR CIRCUMSTANCES AND OBJECTIVES, THE RISKS INVOLVED AND YOUR OWN PERSONAL CIRCUMSTANCES. IF YOU ARE IN ANY DOUBT ABOUT THE CONTENTS OF THIS SUPPLEMENT YOU SHOULD TAKE ADVICE FROM AN APPROPRIATELY QUALIFIED ADVISOR.

The Directors of the Company whose names appear in the section entitled **Directors of the Company** in the Prospectus accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the import of such information.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Shares purchased on the secondary market cannot usually be sold directly back to the Fund. Investors must buy and sell Shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current Net Asset Value when buying Shares and may receive less than the current Net Asset Value per Share when selling them.

An investment in the Fund, whose securities comprise holdings in emerging markets should not constitute a substantial proportion of an investment portfolio and may not be suitable for all investors.

Certain risks attached to investments in the Fund are set out in the Prospectus in the section entitled **Risk Factors**.

TABLE OF CONTENTS

1 IMPORTANT INFORMATION

1.1 Profile of a typical investor

A typical investor is expected to be an informed investor who has taken professional advice, is able to bear capital and income risk, and should view investment in the Fund as a medium to long term investment.

1.2 General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the Company and provides general information about offers of shares in the Company. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

An application has been made to Euronext Dublin for the Shares of the Fund issued and available for issue, to be admitted to listing on the Official List and trading on the regulated market of Euronext Dublin. It is expected that admission will become effective on or about the date of this Supplement. This Supplement together with the Prospectus includes all information required to be disclosed by Euronext Dublin listing requirements and comprise listing particulars for the purpose of listing of the Class A Shares of the Fund on Euronext Dublin.

Neither the admission of Shares of the Fund to listing on the official list and to trading on the regulated market of Euronext Dublin nor the approval of the listing particulars pursuant to the listing requirements of Euronext Dublin shall constitute a warranty or representation by Euronext Dublin as to the competence of service providers to or any other party connected with the Fund, the adequacy of information contained in the listing particulars or the suitability of the Fund for investment purposes.

As of the date of this Supplement, the Company does not have any loan capital (including term loans) outstanding or created but unissued and no outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, guarantees or other contingent liabilities.

1.3 Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section entitled Risk Factors of the Prospectus and the section entitled Risk Factors of this Supplement for a discussion of certain risks that should be considered by you.

An investment in the Shares is only suitable for you if you are a sophisticated investor and (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

1.4 Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and is not authorised in any jurisdiction after publication of the audited annual report of the Company unless a copy of the then latest annual report and, if distributed after the semi-annual report has been produced, a copy of the then latest published semi-annual report and unaudited accounts is made available in conjunction with the Prospectus and this Supplement. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the Company has already complied. If you wish to apply for the opportunity to purchase any Shares it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

2 INVESTMENT OBJECTIVE AND POLICIES

2.1 Investment Objective

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the J.P. Morgan GBI EM Global Core Index (the **Index**). For a further description of the Index see the section entitled **Information on the Index** below.

2.2 Investment Policy

The Fund will seek to achieve its objective by investing in a diversified portfolio of bonds issued by emerging market governments that, as far possible and practicable, consist of the component securities that comprise the Index. The Index is comprised of fixed rate domestic currency government bonds with greater than 13 months to maturity issued by emerging market governments and denominated in the local currency of the issuer. This includes Renminbi denominated bonds issued in the People's Republic of China (**China**) through Bond Connect. Details in relation to Bond Connect are in the section entitled **Bond Connect** and information on the risks associated with investing in securities traded in China through Bond Connect are in the section entitled **Dealing in Securities through Bond Connect Risks.**

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy. Information relating to the anticipated tracking error is set out in the section entitled **Investment Approach**.

Due to the practical difficulties and expense of purchasing all of the securities in the Index, the Fund does not purchase all of the securities in the Index. Instead, the Investment Manager utilises a "sampling" methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the bonds in the Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Index. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries.

The Fund may invest in ancillary liquid assets and money market instruments which may include bank deposits, certificates of deposit, fixed or floating rate instruments, commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus.

2.3 **Efficient Portfolio Management**

Investors should note that the Fund may also invest in FDIs for efficient portfolio management or hedging purposes. The Fund may use futures, swaps and currency forwards for the purpose of reducing risk associated with currency exposures within the Fund. This may on occasions lead to an increase in risk profile of the Fund or result in a fluctuation in the expected level of volatility. Please see the section entitled **Risk Factors** in the Prospectus in relation to such risks.

The Fund will employ the commitment approach to assess the Fund's global exposure and to ensure that the Fund's use of derivative instruments is within the limits specified by the Central Bank. Global exposure will be calculated daily. While the Fund may be leveraged through the use of the FDIs, any such leverage would not be expected to be in excess of 100% of the Fund's Net Asset Value.

Investment in FDIs is subject to the conditions and limits contained in the CBI UCITS Regulations issued by the Central Bank. Subject to these limits, the Fund may invest in FDIs dealt on any of the regulated markets set out in the list of Markets in Appendix II to the Prospectus (and/or over the counter FDIs (**OTCs**)) which will be used for investment, efficient portfolio management and/or for hedging purposes.

The Company employs a risk management process which enables it to accurately measure, monitor and manage at any time the various risks associated with FDIs and their contribution to the overall risk profile of the portfolio of assets of the Fund. The Company will, on request, provide supplementary information to Shareholders relating to the risk management methods employed, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments. The Fund will only invest in FDIs in accordance with the risk management policy filed with and cleared by the Central Bank

A Fund may invest in FDIs dealt over-the-counter provided that the counterparties to over-the-counter transactions are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.

Position exposure to the underlying assets of FDIs, including embedded FDIs in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the CBI UCITS Regulations.

2.4 **Securities Financing Transactions**

While the Company may enter into securities financing transactions and repurchase agreements (**SFTs**) (as defined under Article 3 (11) of Regulation (EU) 2015/2365) (the **SFTR**), it is not anticipated that the Fund will enter into any SFTs. However, in the event that the Fund contemplates entering into such transactions, investors will be provided with further details of the structure and use of such transactions, together with any other information required to be disclosed to investors in accordance with Articles 13 and 14 of the SFTR.

3 **INVESTMENT APPROACH**

The Fund, utilising a **passive** or indexing investment approach (i.e. the Fund will not be actively managed and will seek to replicate the Index), attempts to approximate the investment performance of the Index by investing in a portfolio of securities (diversified portfolio of bonds) that generally replicates the Index.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the representative sampling approach described below, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus. The Investment Manager also may, in exceptional circumstances such as the unavailability of certain bonds due to social unrest in an emerging market country, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. Details of the Fund's portfolio and the indicative net asset value per share for the Fund are available on the Website.

The representative sampling approach used by the Investment Manager seeks to build a representative portfolio that provides a return comparable to that of the Index. The Investment Manager uses a representative sampling approach for this Fund because the Index contains too many securities to efficiently purchase and, at times, certain securities included in the Index are difficult to purchase in the open markets. Consequently, the Fund will typically hold only a subset of the securities included in the Index. The bonds held by the Fund, representing a subset of all the securities in the Index, will generally have the characteristics of the Index and are chosen with the intention of tracking the performance of the Index with a predicted level of tracking error.

In building the Fund's portfolio using the representative sampling approach, the Investment Manager will select certain securities within the Index rather than all of the Index securities, paying close attention to the overall weights and exposures, including, but not limited to, sector weights, individual issuer weights, currency weights and interest rate risk in order to avoid unintended biases. Further, the Investment Manager may sell securities that are represented in the Index in anticipation of their removal from the Index or purchase securities not represented in the Index in anticipation of their addition to the Index. The sampling process seeks to create an overall exposure that closely matches the Index

Anticipated tracking error is based on the expected volatility of differences between the returns of the relevant fund and the returns of its benchmark index. For a physically replicating ETF, one of the primary drivers of tracking error is the difference between a Fund's holdings and index constituents. Cash management, trading costs from rebalancing and withholding tax suffered by the Fund on any income received from its Investments can also have an impact on tracking error as well as the return differential between the ETF and the benchmark index. The impact can be either positive or negative depending on the underlying circumstances. The anticipated tracking error of a Fund is not a guide to its future performance. The annualised tracking error envisaged is not anticipated to exceed 2.5% under normal market conditions.

4 INFORMATION ON BOND CONNECT

Bond Connect is a mutual bond market access program between Hong Kong and China through which eligible overseas investors can invest in fixed-income securities traded on the China Interbank Bond Market. Bond Connect was established by China Foreign Exchange Trade System and National Interbank Funding Centre, China Central Depository & Clearing Co. Ltd, Shanghai Clearing House and Hong Kong Exchanges and Clearing Limited and Central Moneymarkets Unit. Bond Connect is governed by rules and regulations promulgated by the Chinese authorities which may be amended from time to time. To the extent that the Fund's investments are dealt via Bond Connect, such dealing may be subject to additional risk factors as outlined in the section entitled, Dealing in Securities through Bond Connect.

In due course, the Prospectus itself will be amended at Section 1 of Appendix II - Markets to add China InterBank Bond Index. In the meantime, this Supplement (which must be read in conjunction with the Prospectus) shall be deemed to so amend that section of the Prospectus to give that effect.

5 INFORMATION ON THE INDEX

The Index is designed to track the performance of bonds issued by emerging market governments and denominated in the local currency of the relevant issuer. The Index is designed to be investible and includes only those countries that are accessible by most of the international investor base. The Index Provider selects bonds from each of the emerging market countries set forth below that are fixed-rate, domestic currency government bonds with greater than 13 months to maturity. As of 30 June 2016, the Index consisted of approximately 193 bonds issued by 15 sovereign issuers including bonds issued by the governments of Brazil, Chile, Colombia, Hungary, Indonesia, Malaysia, Mexico, Peru, Philippines, Poland, Romania, Russia, South Africa, Thailand and Turkey.

Countries eligible for inclusion in the Index are countries whose gross national income (**GNI**) per capita is below the index income ceiling (**IIC**) for three consecutive years. IIC is defined as GNI per capita level that is adjusted every year by the growth rate of the World GNI per capita. A country is eligible for exclusion from the Index if its GNI per capita is above the IIC for three consecutive years and its sovereign credit rating is A-/A3/A- or above for three consecutive years. Changes in country eligibility may warrant the re-categorisation of countries into and out of the Index. The Index excludes countries with explicit capital controls that inhibited currency exchange and monetary flows, but does not factor in regulatory/tax hurdles in assessing eligibility.

The maximum weight to a country in the Index is capped at 10% and the minimum is 3%. Countries being added or removed from the Index may temporarily have a weight of less than the 3% minimum. The weights change monthly on each rebalance day, and those weights will float based on performance until the following month. The excess is redistributed in proportion to the market capitalisations of the other countries in Index with weightings of less than 10%, which preserves the relative weightings of the other markets in the Index.

The Index rebalances on the last weekday of each month. The Index is weighted by the component countries' aggregate normalised market capitalisation (dirty price times par outstanding), subject to the aforementioned 10% country cap. The weights change monthly on each rebalance day, and those weights remain unchanged until the following month. Accrued interest is assigned to the bonds in the Index according to the specific convention of each country's market, and this interest is settlement adjusted.

The Index is calculated daily. Total returns are calculated based on the sum of price changes, gain/loss on repayments of principal, and coupon received or accrued, expressed as a percentage of beginning market value, adjusted for currency movements.

The following types of bonds are excluded from the Index: floating rate bonds, inflation-linked bonds, capitalisation/amortising bonds, callable bonds, convertible bonds and puttable bonds.

The Index is being provided by an administrator in a third country for the purposes of the EU Benchmark Regulation. As at the date of this Supplement, the Index has been in use in the EU as a reference for financial instruments, financial contracts, or for measuring the performance of an investment fund.

6 INDEX PROVIDER

The Index is published by J.P. Morgan Securities LLC (the **Index Provider**). The Index Provider does not sponsor, endorse, or promote the Fund and bears no liability with respect to the Fund or any security.

In accordance with Central Bank requirements, the Company is required to provide details of the Index Provider's website to enable shareholders to obtain further details of the Index (including the Index constituents). The Company has no responsibility for the Index Provider's website and is not involved in any way in sponsoring, endorsing or otherwise involved in the establishment or maintenance of the Index Provider's website or the contents thereof. Further information in relation to the Index may be found on the Index Provider's website,

https://www.jpmorgan.com/country/US/en/jpmorgan/investbk/solutions/research/indices/composition

7 INVESTMENT RESTRICTIONS

The general investment restrictions as set out in the Prospectus shall apply. The Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes

There may be instances where the weighting of any constituent security of the Index could cause the Fund to breach the investment restrictions set out in the Prospectus. If such an event occurs, it is intended that the Fund will purchase other assets, the effect of which will seek to maintain, so far as is possible, the same economic exposure to and the same weighting of the security of that issuer in the Index without breaching its investment restrictions.

The Directors may from time to time impose such further investment restrictions as shall be compatible with or in the interests of Shareholders.

8 BORROWING

The Fund may borrow money in an amount up to 10% of the market value of its net assets at any time for the account of any Fund and the Depositary may charge the assets of the Fund as security for any such borrowing, provided that such borrowing is only for temporary purposes.

The Fund may acquire currency by means of a back-to-back loan agreement. Foreign currency obtained in this manner is not classified as borrowing for the purposes of the Regulations provided that the offsetting deposit is denominated in the Base Currency of the Fund and equals or exceeds the value of the foreign currency loan outstanding.

9 RISK FACTORS

The general risk factors as set out in the section entitled **Risk Factors** in the Prospectus apply.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. Therefore, you should consider carefully the following risks before investing in the Fund.

The value of investments and the income from them, and therefore the value of and income from the Shares can go down as well as up and an investor may not get back the amount invested. The Fund's exposure is based on the performance of the Index securities which, in turn, is exposed to general market movements (negative as well as positive).

Certain additional risks may also be associated with the Fund, including, without limitation:

9.1 Emerging Markets Risk

Investments in emerging market counties involve certain considerations not usually associated with investing in securities of developed countries or of companies located in developed countries.

Funds that invests in emerging market countries are subject to special risks associated with investment in an emerging market including: securities markets are generally less liquid and less efficient; securities markets may be less well regulated resulting in potential for significant price volatility; currency fluctuations and exchange control; imposition of restrictions on the repatriation of funds or other assets; reduced availability of publicly available information concerning issuers; the imposition of taxes including potential for retroactive taxes to be imposed; higher transaction and custody costs; settlement delays and risk of loss; less liquidity and smaller market capitalisations; difficulties in enforcing contracts; governmental interference; higher inflation; social, economic and political uncertainties; different accounting, auditing and financial reporting standards or of other regulatory practices and requirements comparable to developed markets; lack of uniform disclosure standards; potential for expropriation or nationalisation; custodial and/or settlement systems may not be fully developed whereby the Fund may encounter delays in settlement and may not be able to recover or may encounter delays in the recovery of some of its assets; and the risk of war.

An investment in the Fund, whose securities comprise holdings in emerging markets should not constitute a substantial proportion of an investment portfolio and may not be suitable for all investors. As a result of the above risks, the Fund's investments can be adversely affected and the value of your investments may go up or down.

9.2 **Credit Risk**

Credit risk refers to the possibility that the issuer or guarantor of a debt security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honour its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase, which may adversely affect the value of the security.

9.3 **Interest Rate Risk**

Interest rate risk refers to fluctuations in the value of a bond resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most bonds go down. When the general level of interest rates goes down, the prices of most bonds go up. The historically low interest rate environment increases the risk associated with rising interest rates. In addition, bonds with longer durations tend to be more sensitive to interest rate changes, usually making them more volatile than bonds with shorter durations.

9.4 **Sovereign Bond Risk**

Investments in sovereign bonds involve special risks not present in corporate bonds. The governmental authority that controls the repayment of the bonds may be unable or unwilling to make interest payments and/or repay the principal on its bonds or to otherwise honour its obligations. If an issuer of sovereign bonds defaults on payments of principal and/or interest, the Fund may have limited recourse against the issuer. In the past, certain governments of emerging market countries have declared themselves unable to meet their financial obligations on a timely basis, which has resulted in losses to the holders of such government's debt.

9.5 **Foreign Currency Risk**

Because all or a portion of the income received by the Fund from its investments and/or the revenues received by the underlying issuer will generally are being invested in debt denominated in foreign currencies, the Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the Base Currency may result in reduced returns for the Fund.

Moreover, the Fund may incur costs in connection with conversions between US Dollar and foreign currencies. The value of an emerging market country's currency may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the emerging market country's debt levels and trade deficit, the effects of monetary policies issued by foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the Base Currency rather than at levels determined by the market. This type of system could lead to sudden and large adjustments in the currency, which in turn, can have a negative effect on the Fund and its investments.

9.6 **High Yield Securities Risk**

Securities rated below investment grade are commonly referred to as high yield securities or "junk bonds". Junk bonds are subject to greater risk of loss of income and principal than higher rated securities and are considered speculative. The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities. During an economic downturn or substantial period of rising interest rates, junk bond issuers may experience financial stress that would adversely affect their ability to service their principal and interest payment obligations, to meet their projected business goals or to obtain additional financing. In the event of a default, the Fund may incur additional expenses to seek recovery. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities, and high yield securities issued by non-corporate issuers may be less liquid than high yield securities issued by corporate issuers, which, in either instance, may have an adverse effect on the market prices of and the Fund's ability to arrive at a fair value for certain securities. The illiquidity of the market could make it difficult for the Fund to sell certain securities in connection with a rebalancing of the Index. In addition, periods of economic uncertainty and change may result in an increased volatility of market prices of high yield securities and a corresponding volatility in the Fund's Net Asset Value.

9.7 **Market Risk**

The prices of the securities in the Fund are subject to the risks associated with investing in bonds, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

9.8 **Sampling Risk**

In accordance with the Investment Policy, the Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting an issuer of securities held by the Fund could result in a greater decline in the Net Asset Value of the Fund than would be the case if the Fund held all of the securities in the Index.

Conversely, a positive development relating to an issuer of securities in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

9.9 **Index Tracking Risk**

The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses, including taxes, not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units (defined herein), which are not factored into the return of the Index. Transaction costs, including brokerage costs, will decrease the Fund's NAV to the extent not offset by the transaction fee payable by an Authorized Participant ("AP"). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Index. There is no assurance that an Index Provider or any agents that may act on their behalf will compile an Index accurately, or that an Index will be determined, composed or calculated accurately. Errors in the Index data, the Index computations and/or the construction of the Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Index, or invest in them in the exact proportions in which they are represented in the Index, due to legal restrictions or limitations imposed by the governments of certain countries. The Fund's performance may also deviate from the return of the Index due to a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons or legal restrictions or limitations (such as diversification requirements). The Fund may value certain of its investments and/or underlying currencies based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Index is based on securities' closing prices on local foreign markets (i.e., the value of the Index is not based on fair value prices), the Fund's ability to replicate the Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Index. Changes to the composition of the Index in connection with a rebalancing or reconstitution of the Index may cause the Fund to experience increased volatility, during which time the Fund's index tracking risk may be heightened.

9.10 Replication Management Risk

An investment in the Fund involves risks similar to those of investing in any bond fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not "actively" managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. If a specific security is removed from the Index, the Fund may be forced to sell such security at an inopportune time or for prices other than at current market values. The timing of changes in the securities of the Fund's portfolio in seeking to replicate the Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Investment Manager does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

The Fund is subject to index tracking risk and may not be able to invest in certain securities in the exact proportions in which they are represented in the Index.

9.11 Absence of an Active Market Risk

While Shares have been listed on Euronext Dublin and London Stock Exchange, there can be no assurance that active trading markets for the Shares will develop or be maintained. Trading in Shares on an exchange may be halted due to market conditions or for reasons that, in the view of the relevant exchange, make trading in Shares inadvisable. In addition, trading in Shares on an exchange is subject to trading halts caused by extraordinary market volatility pursuant to the relevant exchange's "circuit breaker" rules. In addition, there can be no guarantee that once Shares are listed on any stock exchange that they will remain listed. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

9.12 Index Rebalancing and Costs Risk

The Index Provider may periodically publish new constituents, reflecting changes in the securities that are included or excluded in the Index. When the constituents of the Index change, the Fund will typically, to the extent that it is possible and practicable and to do so, seek to realign its exposure to more closely reflect that of the Index. To realign the exposures in the Fund, securities must be bought and sold. This rebalancing will incur costs that are not reflected in the theoretical calculation of the Index's return and may impact on the Fund's ability to provide returns consistent with those of the Index. Such costs can be direct or indirect and include, but are not limited to: transaction charges, stamp duty or other taxes on the investments. Accordingly, the cost of rebalancing may impact on the Fund's ability to provide returns consistent with those of the Index.

9.13 Concentration Risk

The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund's investments are concentrated in a particular sector or sectors or industry or group of industries, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or sectors or industry or group of industries will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

In addition, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer in accordance with the requirements of the UCITS investment restrictions and the requirements of the Central Bank. As a result, the gains and losses on a single investment may have a greater impact on the Fund's Net Asset Value and may make the Fund more volatile than more diversified funds.

9.14 **Special Risk Considerations of Investing in Latin America**

The Fund may invest in securities issued by Latin American issuers and, accordingly, may be subject to the risk of investing in such issuers. Investments in securities of Latin American issuers involve special considerations not typically associated with investments in securities of issuers located in the United States. The economies of certain Latin American countries have, at times, experienced high interest rates, economic volatility, inflation, currency devaluations and high unemployment rates. In addition, commodities (such as oil, gas and minerals) represent a significant percentage of the region's exports and many economies in this region are particularly sensitive to fluctuations in commodity prices. Adverse economic events in one country may have a significant adverse effect on other countries of this region.

Most Latin American countries have experienced, at one time or another, severe and persistent levels of inflation, including, in some cases, hyperinflation. This has, in turn, led to high interest rates, extreme measures by governments to keep inflation in check, and a generally debilitating effect on economic growth. Although inflation in many Latin American countries has lessened, there is no guarantee it will remain at lower levels.

The political history of certain Latin American countries has been characterized by political uncertainty, intervention by the military in civilian and economic spheres, and political corruption. Such events could reverse favourable trends toward market and economic reform, privatization, and removal of trade barriers, and could result in significant disruption in securities markets in the region.

The economies of Latin American countries are generally considered emerging markets and can be significantly affected by currency devaluations. Certain Latin American countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system can lead to sudden and large adjustments in the currency which, in turn, can have a disruptive and negative effect on foreign investors. Certain Latin American countries also restrict the free conversion of their currency into foreign currencies, including the U.S. dollar. There is no significant foreign exchange market for many Latin American currencies and it would, as a result, be difficult for the Fund to engage in foreign currency transactions designed to protect the value of the Fund's interests in securities denominated in such currencies.

Finally, a number of Latin American countries are among the largest debtors of developing countries. There have been moratoria on, and a rescheduling of, repayment with respect to these debts. Such events can restrict the flexibility of these debtor nations in the international markets and result in the imposition of onerous conditions on their economies.

9.15 **Special Risk Considerations of Investing in Asian Issuers**

The Fund may invest in securities issued by Asian issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Asia involves risks and special considerations not typically associated with investment in the U.S. securities markets. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one Asian country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse effect on some or all of the Asian countries and regions in which the Fund invests. The securities markets in some Asian economies are relatively underdeveloped and may subject the Fund to higher action costs or greater uncertainty than investments in more developed securities markets. Such risks may adversely affect the value of the Fund's investments.

9.16 **Fund Shares Trading, Premium/Discount Risk and Liquidity Risk of Fund Shares**

The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Fund cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The NAV of the Shares will fluctuate with changes in the market value of the Fund's securities holdings. The market prices of Shares will fluctuate, in some cases materially, in accordance with changes in NAV and the intraday value of the Fund's holdings. The price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares may be closely related to, but not necessarily identical to, the same forces influencing the prices of the securities of a Fund's portfolio of investments trading individually or in the aggregate at any point in time.

The securities held by the Fund may be traded in markets that close at a different time than the London Stock Exchange. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the London Stock Exchange is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on the London Stock Exchange and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

When you buy or sell Shares of the Fund through a broker, you will likely incur a brokerage commission or other charges imposed by brokers. In addition, the market price of Shares, like the price of any exchange-traded security, includes a bid/ask spread charged by the market makers or other participants that trade the particular security. The spread of the Shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease. In times of severe market disruption, including when trading of the Fund's holdings may be halted, the bid/ask spread may increase significantly. This means that Shares may trade at a discount to the Fund's NAV, and the discount is likely to be greatest during significant market volatility.

9.17 **Issuer-Specific Changes Risk.**

The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole, especially if the Fund's portfolio is concentrated in a country, group of countries, region, market, industry, group of industries, sector or asset class. The value of securities of smaller issuers can be more volatile than that of larger issuers.

9.18 **Operational Risk**

The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third parties, failed or inadequate processes and technology or system failures.

9.19 **Dealing in Securities through Bond Connect Risks**

9.19.1 ***Regulatory Risk***

The Bond Connect program is relatively new. Laws, rules, regulations, policies, notices, circulars or guidelines relating to the programs as published or applied by the relevant authorities of China are untested and are subject to change from time to time. Regulators have been given wide discretion in such investment regulations and there is no precedent or certainty as to how such discretion may be exercised now or in the future. There can be no assurance that the Bond Connect program will not be restricted, suspended or abolished. As the Fund invests in securities through Bond Connect, it may be adversely affected as a result of any such changes or abolition.

9.19.2 ***Custody Risk***

Under the prevailing regulations in China, eligible foreign investors who wish to participate in the Bond Connect program may do so through an offshore custody agent, registration agent or other third parties (as the case may be), who would be responsible for making the relevant filings and account opening with the relevant authorities. The Fund is therefore subject to the risk of default or errors on the part of such agents.

9.19.3 ***Trading Risk***

Trading in securities through Bond Connect may be subject to clearing and settlement risk. If the Chinese clearing house defaults on its obligation to deliver securities / make payment, the Fund may suffer delays in recovering its losses or may not be able to fully recover its losses.

9.19.4 ***Market and Liquidity Risk***

Market volatility and potential lack of liquidity due to low trading volumes of certain debt securities may result in prices of certain debt securities traded on the China Interbank Bond Market to fluctuate significantly. The Fund, by investing on the market is therefore subject to liquidity and volatility risks and may suffer losses in trading Chinese bonds. The bid and offer spreads of the prices of such Chinese bonds may be large, and the Fund may therefore incur significant trading and realisation costs and may even suffer losses when selling such investments.

9.19.5 ***Investment Restrictions Risk***

Investments into Bond Connect are not subject to any quota but should the relevant Chinese authorities suspend account opening or trading via Bond Connect, the Fund's ability to invest in China Interbank Bond Market will be limited. In that instance, the Fund may not be able to effectively pursue its investment strategy and it may have an adverse effect on the Fund's performance as the Fund may be required to dispose of impacted holdings. The Fund may also suffer substantial losses as a result.

9.19.6 ***Chinese Local Credit Rating Risk***

The Fund may invest in securities the credit ratings of which are assigned by Chinese local credit rating agencies. The rating criteria and methodology used by such agencies may be different from those adopted by most of the established international credit rating agencies. Therefore, such rating system may not provide an equivalent standard for comparison with securities rated by international credit rating agencies. Investors should be cautious when they refer to ratings assigned by Chinese local credit agencies, noting the differences in rating criteria mentioned above. If assessments based on credit ratings do not reflect the credit quality of and the risks inherent in a security, investors may suffer losses, possibly greater than originally envisaged.

9.19.7 ***Operational Risk***

Trading through Bond Connect is performed through newly developed trading platforms and operational systems. There is no assurance that such systems will function properly (in particular, under extreme market conditions) or will continue to be adapted to changes and developments in the market. In the event that the relevant systems fail to function properly, trading through Bond Connect may be disrupted. The Fund's ability to trade through Bond Connect (and hence to pursue its investment strategy) may therefore be adversely affected. In addition, where the Fund invests in China Interbank Bond Market through Bond Connect, it may be subject to risks of delays inherent in the order placing and/or settlement systems.

9.19.8 ***Beneficial Ownership of Bond Connect Securities Risk***

The Fund's investments via Bond Connect will be held following settlement by custodians as clearing participants in accounts in the China Foreign Exchange Trade System maintained by the Central Money Markets Unit as central securities depositary in Hong Kong and nominee holder. Central Moneymarkets Unit in turn holds the Bond Connect securities of all its participants through a nominee omnibus securities account in its name registered with the China Central Depository & Clearing Co., Ltd and the Shanghai Clearing House in China. Because Central Moneymarkets Unit is only a nominee holder and not the beneficial owner of Bond Connect securities, in the unlikely event that Central Moneymarkets Unit becomes subject to winding up proceedings in Hong Kong, investors should note that any Bond Connect securities will not be regarded as part of the general assets of Central Moneymarkets Unit available for distribution to creditors even under Chinese law. Central Moneymarkets Unit will not be obliged to take any legal action or enter into court proceedings to enforce any rights on behalf of investors in any Bond Connect securities in China. Funds investing through the Bond Connect holding the Bond Connect securities through Central Moneymarkets Unit are the beneficial owners of the assets and are therefore eligible to exercise their rights through the nominee only.

Physical deposit and withdrawal of Bond Connect securities are not available through Northbound Trading for the Fund. The Fund's title or interests in, and entitlements to Bond Connect securities (whether legal, equitable or otherwise) will be subject to applicable requirements, including laws relating to any disclosure of interest requirement or foreign bondholding restriction, if any. It is uncertain whether the Chinese courts would recognise the ownership interest of the investors to allow them standing to take legal action against the Chinese entities in case disputes arise.

9.19.9 ***Investor Compensation Protection Risk***

Investors should note that any trading under Bond Connect will not be covered by Hong Kong's Investor Compensation Fund nor China Securities Investor Protection Fund and thus investors will not benefit from compensation under such schemes. Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

9.19.10 ***Difference in Trading Day and Trading Hours Risk***

Due to differences in public holiday between Hong Kong and China or other reasons such as adverse weather conditions, there may be a difference in trading days and trading hours on the China Interbank Bond Market and the Central Moneymarkets Unit.

Bond Connect will thus only operate on days when both markets are open for trading and when banks in both markets are open on the corresponding settlement days. So it is possible that there are occasions when it is a normal trading day for China markets but it is not possible to carry out any Bond Connect Securities trading in Hong Kong.

9.19.11 ***Recalling of Eligible Bond and Trading Restriction Risk***

A bond may be recalled from the scope of eligible stocks for trading via Bond Connect for various reasons, and in such event, the stock can only be sold but is restricted from being bought. This may affect the investment portfolio or strategies of the Investment Manager for the Fund.

9.19.12 ***Trading Costs Risk***

In addition to paying trading fees and other expenses in connection with Bond Connect securities trading, the Funds carrying out Northbound Trading via Bond Connect should also take note of any new portfolio fees, dividend tax and tax concerned with income arising from transfers which would be determined by the relevant authorities.

9.19.13 ***Currency Risk***

Northbound investments by the Fund in the Bond Connect Securities will be traded and settled in Renminbi / RMB, the official currency of China. The RMB is currently not a freely convertible currency. The Chinese government places strict regulation on the RMB and sets the value of the RMB to levels dependent on the value of the U.S. dollar. The Chinese government's imposition of restrictions on the repatriation of RMB out of mainland China may limit the depth of the offshore RMB market and reduce the liquidity of the Fund's investments.

If the Fund holds assets denominated in a local currency other than RMB, the Fund will be exposed to currency risk if the Fund invests in a RMB product due to the need for the conversion of the local currency into RMB. During the conversion, the Fund will also incur currency conversion costs. Even if the price of the RMB asset remains the same when the Fund purchases it and when the Fund redeems / sells it, the Fund will still incur a loss when it converts the redemption / sale proceeds into local currency if RMB has depreciated.

9.19.14 ***Central Moneymarkets Unit Default Risk***

A failure or delay by the Central Moneymarkets Unit in the performance of its obligations may result in a failure of settlement, or the loss, of Bond Connect securities and/or monies in connection with them and the Fund and its investors may suffer losses as a result. Neither the Fund nor the Investment Manager shall be responsible or liable for any such losses.

9.19.15 ***Tax Risks***

There is no specific written guidance by the Chinese tax authorities on the treatment of income tax and other tax categories payable in respect of trading in China Interbank Bond Market by eligible foreign institutional investors via Bond Connect. As such, it is uncertain as to the Fund's tax liabilities for trading in China Interbank Bond Market through Bond Connect.

10 DIVIDEND POLICY

It is not proposed that the Directors will declare a dividend in respect of the Fund. Full details of any change to a Fund's dividend policy will be provided in an updated Supplement and all Shareholders will be notified in advance.

11 KEY INFORMATION FOR PURCHASING AND SELLING

Base Currency	US Dollar (USD)
Business Day	means a day on which markets are open for business in England (or such other day(s) as the Directors may from time to time determine and notify in advance to Shareholders).
Dealing Day	In general, each Business Day will be a Dealing Day. However, certain Business Days will not be Dealing Days where, in the sole determination of the Investment Manager: (i) markets on which the Fund's investments are listed or traded, or markets relevant to the Index are closed, and/or (ii) there is a public holiday in the jurisdiction in which the Investment Manager or its delegate(s), if applicable, is or are based; provided there is at least one Dealing Day per fortnight. The Dealing Days for the Fund are available at www.vaneck.com.

Dealing Deadline	4:00pm Irish time on the Business Day prior to the relevant Dealing Day.
Settlement Date	In the case of subscription(s), within 2 Business Days of the relevant Dealing Day. In the case of repurchases, within 3 Business Days of the relevant Dealing Day.
Valuation Point	The close of trading (ordinarily 4:00pm New York time) on the New York Stock Exchange on the relevant Dealing Day.

Description of Shares

Website	www.vaneck.com -Information on portfolio composition and details of the intra-day portfolio value (iNAV) are set out on the website.
Share Class	A
ISIN	IE00BDS67326
Creation Unit	50,000 Shares or such other amount as may be determined by the Directors at their discretion.
Minimum Initial Subscription	1 Creation Unit unless the Directors determine otherwise. Investors will be notified of any change to the Minimum Initial Subscription.
Minimum Holding	1 Creation Unit unless the Directors determine otherwise. Investors will be notified of any change to the Minimum Holding.

12 CHARGES AND EXPENSES

The following fees will be incurred on each Share by Shareholders (and will not be incurred by the Company on behalf the Fund, and accordingly will not affect the Net Asset Value of the relevant Class of Share of the Fund).

Share Class	A
Preliminary Charge	Up to 5%
Exchange Charge	Up to 3%
Redemption Charge	Up to 3%

The Preliminary Charge is deducted from the investment amount received from an investor for subscription for Shares. Such Preliminary Charge is payable to the Manager.

The following fees and expenses will be incurred by the Company on behalf of the Fund and will affect the Net Asset Value of the relevant Class of Share of the Fund:

Share Class	A
Total Fee	Up to 0.44% per annum or such lower amount as may be advised to Shareholders from time to time.

The Total Fee, a percentage of the Net Asset Value of the relevant Class of Shares (plus VAT, if any), is payable by the Company out of the Fund Assets to the Manager. The Total Fee will accrue on each day and will be calculated on each Dealing Day and paid monthly in arrears. The Total Fee will cover all of the ordinary fees, operating costs and expenses payable by each Fund including fees and expenses paid to the Manager, all ordinary costs and expenses connected with the management and operating activities of the Fund, including investment management and advisory fees, Director's fees, registration, transfer agency, administration and custody fees, registrar fees, regulators and auditors and certain legal expenses of the Company. The Total Fee does not include extraordinary costs and expenses (including but not limited to transaction charges, stamp duty or other taxes on the investments of the Company including duty charges for portfolio re-balancing, withholding taxes, commissions and brokerage fees incurred with respect to the Company's investments, interest on any non-overdraft credit facility and charges incurred in negotiating, effecting or varying the terms of such facility, any commissions charged by intermediaries in relation to an investment in the Fund and such extraordinary or exceptional costs and expenses (if any) as may arise from time to time, such as material litigation in relation to the Company all of which will be paid separately out of the assets of the Fund).

This section entitled **Charges and Expenses** should be read in conjunction with the sections entitled **General Charges and Expenses** and **Management Charges and Expenses** in the Prospectus.

13 REGISTRATION FOR PUBLIC DISTRIBUTION AND LISTING

Application is expected to be made to register the Fund for public distribution in various European countries.

Application will be made to list the Shares on Euronext Dublin. Through the operation of such a secondary market, persons who are not Authorised Participants or not able or willing to subscribe for and redeem Creation Units will be able to buy Shares from or sell Shares to other retail investors or market makers, broker/dealers, or other Authorised Participants at prices which should approximate, after currency conversion, the Net Asset Value of the Shares.

14 HOW TO BUY AND SELL SHARES

Investors can buy and sell Shares on the secondary market as described above in accordance with the procedures set out in the section entitled **Secondary Market** in the Prospectus.

Investors can otherwise subscribe for or redeem Creation Units in accordance with the procedures set out in the Prospectus.

15 OTHER INFORMATION

New Funds may be created from time to time by the Directors with the prior approval of the Central Bank in which case further Supplements incorporating provisions relating to those Funds will be issued by the Company.

The Company has the following Funds established as at the date of this Supplement:

(a) VanEck Vectors™ Gold Miners UCITS ETF;

(b) VanEck Vectors™ Junior Gold Miners UCITS ETF;

(c) VanEck Vectors Morningstar US Wide Moat UCITS ETF;

(d) VanEck Vectors™ J.P. Morgan EM Local Currency Bond UCITS ETF;

(e) VanEck Vectors™ Natural Resources UCITS ETF;

(f) VanEck Vectors™ Preferred US Equity UCITS ETF;

(g) VanEck Vectors™ Emerging Markets High Yield Bond UCITS ETF;

(h) VanEck Vectors™ Global Fallen Angel High Yield Bond UCITS ETF; and

(i) VanEck Vectors™ Global Mining UCITS ETF; and

(j) VanEck Vectors™ Video Gaming and eSports UCITS ETF
