

Underlying Index Designed for Enhanced Yield Potential

FLTR[®] VanEck Vectors[®] Investment Grade Floating Rate ETF

Near-Zero Duration with Floating Rate Notes

The periodic coupon resets of floating rate notes result in near-zero duration, which may help limit losses and provide higher coupons when interest rates rise.

Long Maturity Bias Enhances Yield Potential²

FLTR's underlying index has a bias towards longer-maturity notes, which tend to have greater yield without an increase in interest rate risk.

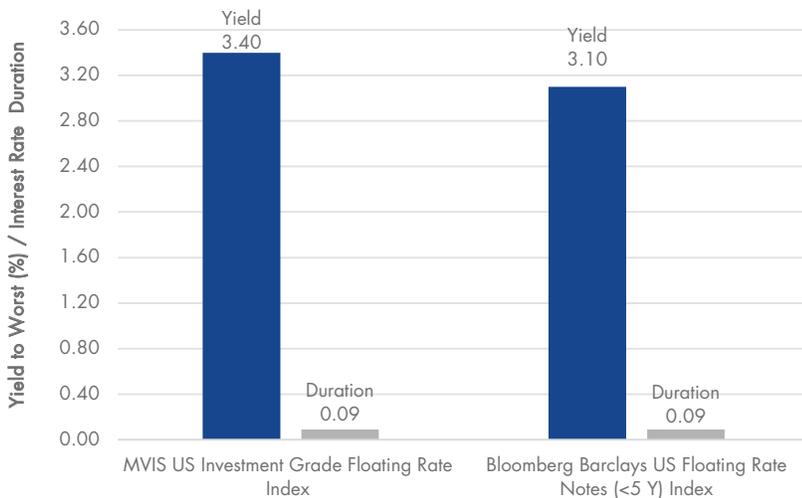

Income for Rising Rates

Potential to Benefit from Rising Rates¹

Investment Grade Credit Quality

Near-Zero Duration, Enhanced Yield Potential

Comparative Floating Rate Note Index Yield and Duration
As of 3/31/2019

Investment Grade Credit Exposure

The focus on investment grade bonds allows investors to benefit from higher credit spreads while maintaining high average credit quality.

¹Floating rate notes are less sensitive to interest rate changes, but may decline in value if their interest rates do not rise as much or as quickly as interest rates in general.

²The Bloomberg Barclays US Floating Rate Notes (<5) index is weighted according to each FRN's market value, while the MVIS US Investment Grade Floating Rate Index is weighted with a bias to FRNs in the index with longer years to maturity.

Yield-to-Worst measures the lowest of either yield-to-maturity or yield-to-call date on every possible call date.

Interest Rate Duration measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield.

Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical performance is not indicative of future results; current data may differ from data quoted. Indices are unmanaged and are not securities in which an investment can be made.

FRN Index Total Return Performance (%) as of 3/31/2019	YTD	1-Year	3-Year	5-Year
MVIS US Investment Grade Floating Rate Index	2.31	2.77	2.96	1.97
Bloomberg Barclays US Floating Rate Notes (<5 Y) Index	1.47	2.86	2.32	1.58

All data are based on indices. Returns over one year are annualized. Refer to reverse side for index descriptions and disclosure notes.

VanEck Vectors Investment Grade Floating Rate ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of **MVIS® US Investment Grade Floating Rate Index (MVFLTR)**, which consists of U.S. dollar-denominated floating rate notes issued by corporate issuers and rated investment grade by at least one rating agency.

Fund Ticker	FLTR
Commencement Date	4/25/2011
Management Fee (%)	0.35
Other Expenses (%)	0.06
Gross Expense Ratio (%)	0.41
Fees Waivers and Expense Reimbursement (%)	-0.27

The indices listed are unmanaged indices and do not reflect the payment of transaction costs, advisory fees, or expenses that are associated with an investment in any underlying exchange-traded funds. An index's performance is not illustrative of any underlying exchange-traded fund's performance. Indices are not securities in which investments can be made.

Bloomberg Barclays U.S. Dollar Floating Rate Note < 5 Years Index consists of debt instruments that pay a variable coupon rate, a majority of which are based on the 3-month LIBOR, with a fixed spread. The index is market capitalization-weighted and may include U.S. registered, dollar denominated bonds of non-U.S. corporations, governments and supranational entities.

London Interbank Offer Rate (LIBOR) refers to the benchmark used by banks, securities houses and investors to gauge the cost of unsecured borrowing in the money markets for various periods of time and currencies.

MVIS US Investment Grade Floating Rate Index (MVFLTR) is a modified market capitalization-weighted index that consists of U.S. dollar-denominated floating rate notes issued by corporate issuers and rated investment grade by at least one of the three rating services: Moody's, S&P or Fitch. The Index commenced 2/11/2011 and is the exclusive property of MV Index Solutions GmbH (the "Index Provider"), which is not sponsored, issued or advised by Wells Fargo & Company, Wells Fargo Securities, LLC or any of their affiliates. MVFLTR is the exclusive property of MV Index Solutions GmbH (a wholly owned subsidiary of Van Eck Associates Corporation), which has contracted with Wells Fargo to create and maintain and with ICE Data Indices, LLC to calculate the Index. Neither Wells Fargo nor ICE Data Indices, LLC guarantees the accuracy and/or completeness of the Index or of any data supplied by it or its agents or makes any warranty as to the results to be obtained from investing in the Fund or tracking the Index. The Index is calculated by ICE Data Indices, LLC, which is not an adviser for or fiduciary to the Fund, and, like Wells Fargo, is not responsible for any direct, indirect or consequential damages associated with indicative optimized portfolio values and/or indicative intraday values. The VanEck Vectors Investment Grade Floating Rate ETF (the "Fund") is not sponsored, endorsed, sold or promoted by MV Index Solutions GmbH and MV Index Solutions GmbH makes no representation regarding the advisability of investing in the Fund.

The "Net Asset Value" (NAV) of a VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell shares at NAV. Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

An investment in the Fund may be subject to risk which include, among others, credit risk, call risk, and interest rate risk, all of which may adversely affect the Fund. High yield bonds may be subject to greater risk of loss of income and principal and are likely to be more sensitive to adverse economic changes than higher rated securities. International investing involves additional risks which include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contains this and other information, call 800.826.2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.
