VanEck's Uranium ETF Reaches \$500 Million in Assets

- The rapid growth of assets under management in the VanEck Uranium and Nuclear Technologies UCITS ETF reflects growing investor interest in nuclear energy as a solution for energy security
- The ETF invests in the largest and most liquid companies active in uranium mining and nuclear infrastructure

London, UK, 12 June 2025 – The [*VanEck Uranium and Nuclear Technologies UCITS ETF*](#), managed by the asset manager VanEck, has now reached \$500 million in assets under management. In June 2024, the ETF surpassed the \$100 million mark, meaning it has more than quintupled in about one year. The ETF enables investors to access companies worldwide operating in the uranium and nuclear energy sectors.

"Policymakers around the world have come to recognize that nuclear energy could accelerate the energy sector's shift away from fossil fuels," said Martijn Rozemuller, CEO of VanEck Europe.

Nuclear energy is considered a reliable and low-carbon electricity source, as nuclear plants do not emit greenhouse gases during operation. "As nuclear energy is experiencing a revival, so too has investor interest in this sector been reignited. This supports the outlook and share prices of companies operating in the nuclear industry, which is reflected in the strong growth of our VanEck Uranium and Nuclear Technologies UCITS ETF to now half a billion US dollars," Rozemuller added. However, investors should note that nuclear energy may not ultimately become the energy source of the future, which implies a risk of capital loss.

Technological Advances Are Making Nuclear Energy More Efficient

"Many people still view nuclear energy as a costly technology with significant environmental and safety risks," added Kamil Sudiyarov, Senior Product Manager at VanEck Europe.

"However, researchers today are working on technologies that make nuclear energy more efficient and environmentally friendly. The nuclear technology companies in our ETF's portfolio could be well positioned to lead in this technology and play a meaningful role in the future of nuclear energy." Nonetheless, investments in nuclear energy and natural resources are highly dependent on uranium demand as well as the economic and political environment, which can significantly impact the sector and fund performance.

The ETF aims to invest only in equities that either generate a significant share of their revenue from uranium or nuclear infrastructure and the development of nuclear technologies. This may include companies involved in the construction or maintenance of nuclear power plants or those that provide technologies and services to the nuclear industry. Companies engaged in the development and commercialization of nuclear fusion or molten salt reactors may also be included in the ETF.

The VanEck Uranium and Nuclear Technologies UCITS ETF tracks the MarketVector™ Global Uranium and Nuclear Energy Infrastructure Index, which reflects the performance of the largest and most liquid companies active in uranium mining and nuclear energy infrastructure.

About VanEck:

Since its foundation in 1955, VanEck has been driven by innovation and stands for intelligent, forward-looking investment strategies. The asset manager currently manages around 133.7 billion US dollars* worldwide, including ETFs, active funds and institutional accounts.

With more than 100 ETFs globally, the investment house offers a comprehensive portfolio covering numerous sectors, asset classes and smart beta strategies. VanEck was one of the first asset managers to offer investors access to global markets. The aim was always to identify new trends and asset classes - such as gold investments (1968), emerging markets (1993) and ETFs (2006). These have shaped the entire investment industry to this day.

VanEck is headquartered in New York City and has offices worldwide, including in Frankfurt (Germany), Zurich (Switzerland), Milan (Italy), London (UK), Madrid (Spain), Amsterdam (Netherlands), Shanghai (China), and Sydney (Australia).

VanEck Uranium and Nuclear Technologies UCITS ETF (the "ETF") is a sub-fund of VanEck UCITS ETFs plc, an open-ended variable capital umbrella investment company with limited liability between sub-funds. The ETF is registered with the Central Bank, passively managed and tracks an equity index. For details on the regulated markets where the ETF is listed, please refer to the Trading Information section on the ETF page at www.vaneck.com. Investing in the ETF should be interpreted as acquiring shares of the ETF and not the underlying assets.

Investing is subject to risk, including the possible loss of principal. Investors must buy and sell units of the UCITS on the secondary market via an intermediary (e.g. a broker) and cannot usually be sold directly back to the UCITS. Brokerage fees may incur. The buying price may exceed, or the selling price may be lower than the current net asset value. The Management Company may terminate the marketing of the UCITS in one or more jurisdictions.
