

## Press Release

# Europe's First Quantum Computing ETF Reaches USD 500 Million After Just Eight Months

- The VanEck Quantum Computing UCITS ETF<sup>1</sup> is the first ETF in Europe that allows investors to gain diversified exposure to companies engaged in quantum computing technologies.
- Scientific and technological advances and achievements underscore the momentum of quantum computing applications.
- The long-term commercial success of this sector remains uncertain and cannot be guaranteed.

London, UK - 14 January 2026 – Quantum technology appears to be in demand among investors: after just eight months, the [VanEck Quantum Computing UCITS ETF](#), launched in May 2025, has reached fund assets of USD 500 million. Investing involves risks, including the possible loss of capital invested.

“Currently, we are seeing many major scientific and technological advances and achievements in quantum technology and quantum computing,” said Moritz Henkel, Product Manager at VanEck Europe. “For example, last year the Nobel Prize in Physics was awarded to three quantum physics scientists whose research sent an important signal regarding the scientific credibility of quantum computing.<sup>2</sup> Additionally in mid-October last year, IonQ reached an important milestone on the path to practical quantum hardware by setting a new world record for accuracy.”<sup>3</sup>

Commercial applications of quantum computers are still under development, and the economic success of companies in this field remains uncertain. However, recent achievements and progress demonstrate the momentum this technology has already gained.

“The growing interest in quantum computing and the increasing expectations for commercial applications are reflected in the strong growth of our ETF,” added Martijn Rozemuller, CEO of VanEck Europe. “The Quantum ETF provides early access to a groundbreaking technology that could have immense economic significance in many areas, such as medical research, logistics,

or machine learning.” Investors should note that quantum computing is still a nascent technology and investments can therefore be risky.

The VanEck Quantum Computing UCITS ETF currently invests in 30 companies worldwide, including so-called pure-play companies that generate the majority of their revenues from quantum computing technologies or services, as well as companies that are leaders in the research and development of quantum computers or already apply this technology. Selection is based on the number of relevant patents already granted to a company in the field of quantum computing technology.

This targeted selection process allows not only disruptive pioneers such as IonQ, Rigetti, or D-Wave to be included in the portfolio, but also established technology, industrial, and financial companies such as IBM, Alphabet, Honeywell, or Bank of America that are proactively preparing for the quantum era. Investors should be aware that the high volatility of technology stocks can lead to significant fluctuations in the value of the ETF.

ETF	<a href="#">VanEck Quantum Computing UCITS ETF</a>
Index Name	MarketVector™ Global Quantum Leaders Index
ISIN	IE0007Y8Y157
Ticker LSE USD / GBP	QNTM / QNTG
Ticker Xetra	QUTM
Domicile	Ireland
Base Currency	USD
Index Provider	MarketVector Indexes GmbH™
Rebalancing	Quarterly
Product Structure	Physical (Full Replication) <sup>4</sup>
Inception Date	21 May 2025
Total Expense Ratio (TER)	0,55 % <sup>5</sup>
Income Treatment	Reinvestment <sup>6</sup>
SFDR Classification	Article 6

<sup>4</sup> The ETF invests directly in all or a representative sample of the index constituents, rather than using synthetic replication.

<sup>5</sup> Annual total fund costs expressed as a percentage of the fund's average net assets.

<sup>6</sup> Income is reinvested; the fund does not make distributions.

**Sector and Concentration Risk:** The assets of the fund may be concentrated in one or more sectors, industries, or groups of industries to the extent that the index is concentrated in one or more sectors, industries, or groups of industries. The fund may also be subject to the risk that economic, political, or other conditions that negatively affect a particular industry or sector will have a greater negative impact on the fund than if the fund's assets were invested in a wider variety of sectors or industries

**About VanEck:**

Since its foundation in 1955, VanEck has been driven by innovation and stands for intelligent, forward-looking investment strategies. The asset manager currently manages around USD 197 billion\* worldwide, including ETFs, active funds, and institutional accounts.

With more than 100 ETFs globally, the investment house offers a comprehensive portfolio covering numerous sectors, asset classes, and smart beta strategies. VanEck was one of the first asset managers to offer investors access to global markets. The aim was always to identify new trends and asset classes – such as gold investments (1968), emerging markets (1993), and ETFs (2006). These have shaped the entire investment industry to this day.

VanEck is headquartered in New York City and has offices worldwide, including in Frankfurt (Germany), Zurich (Switzerland), Milan (Italy), London (UK), Madrid (Spain), Amsterdam (Netherlands), Shanghai (China), and Sydney (Australia).

Please refer to the Prospectus – in English language - and the KID/KIID - in local language - before making any final investment decisions and for full information on risks. These documents can be obtained free of charge at [www.vaneck.com](http://www.vaneck.com), from the ManCo or from the appointed facility agent.

VanEck Quantum Computing UCITS ETF ("ETF") is a sub-fund of VanEck UCITS ETFs plc, a UCITS umbrella investment company, registered with the Central Bank of Ireland, passively managed and tracking an equity index.

The value of the ETF may fluctuate significantly as a result of the investment strategy. The ETF's holdings are disclosed on each dealing day on [www.vaneck.com](http://www.vaneck.com) under the ETF's Holdings section and as per PCF under the Documents section and published via one or more market data suppliers. The indicative net asset value (iNAV) of the ETF is available on Bloomberg. For details on the regulated markets where the ETF is listed, please refer to the Trading Information section on the ETF page at [www.vaneck.com](http://www.vaneck.com). The portfolio holdings are also regularly published on the website. Investing in the ETF should be interpreted as acquiring shares of the ETF and not the underlying assets. Tax treatment depends on the personal circumstances of each investor and may vary over time. The ManCo may terminate the marketing of the ETF in one or more jurisdictions. The summary of the investor rights is available in English at: [summary-of-investor-rights.pdf](#).

Investing is subject to risk, including the possible loss of principal. For any unfamiliar technical terms, please refer to [ETF Glossary | VanEck](#). No part of this material may be reproduced in any form, or referred to in any other publication, without express written permission of VanEck.
