

VanEck launches ETF focused on electrification and power infrastructure

- The *VanEck Electrification and Power Infrastructure UCITS ETF* invests globally across the electrification value chain, The increasing use of artificial intelligence, the expansion of data centres, and electric mobility are driving rising electricity demand
- Modern energy infrastructure is a prerequisite for economic growth
- Thematic ETFs are subject to market and sector-specific risks

London, UK – 3 June 2026 – VanEck is launching a new exchange-traded fund, the *VanEck Electrification and Power Infrastructure UCITS ETF*, focused on the global expansion of power grids, energy storage, and infrastructure. The ETF invests globally in companies across the electrification value chain: batteries and energy storage, industrial electrification and energy management, grid infrastructure and connectivity, as well as utilities and independent power producers.

“Electrification is set to become one of the most important infrastructure and investment themes in the coming years,” said Martijn Rozemuller, CEO, VanEck Europe. “Driven by data centres, artificial intelligence, electric mobility, and the electrification of industrial processes, global electricity demand is rising.¹ Modern energy infrastructure is therefore a key competitive advantage and a fundamental factor for long-term prosperity.”² However, growing electricity demand often meets outdated grids and a significant need for modernization, which can lead to high energy costs for consumers and businesses.³

Investments in energy infrastructure could multiply in the coming years

“Global investment in power grids is expected to exceed USD 1.5 trillion per year through the 2050s—far more than the USD 533 billion currently invested each year,⁴” explained Alessandro Valentino, Product Manager at VanEck. “This could make the sector one of the largest investment opportunities of the coming decades—because without grids, storage, power management,

industrial control technology, and resilient supply structures, rising electricity demand cannot be met. Our ETF specifically focuses on the companies providing this infrastructure.” High returns are not guaranteed, and capital losses are possible.

With the new *VanEck Electrification and Power Infrastructure UCITS ETF*, VanEck seeks to provide investors with diversified exposure to companies driving the expansion and transformation of global energy infrastructure. The ETF tracks the *MarketVector Electrification Index*⁵. In principle, to be included in the index, companies must generate at least 50% of their revenue from one or more of these sectors. The index currently includes 25 companies, with individual weightings capped at 8%. The index is deliberately not designed as a clean energy index: companies that generate 50% or more of their revenue from the generation, transmission, or distribution of electricity from renewable sources are not eligible.

VanEck Electrification and Power Infrastructure UCITS ETF	
Index Name	MarketVector Electrification Index (MVELECTR)

About VanEck:

Since its foundation in 1955, VanEck has been driven by innovation and stands for intelligent, forward-looking investment strategies. The asset manager currently manages around USD 221,2 billion* worldwide, including ETFs, active funds, and institutional accounts.

With more than 100 ETFs globally, the investment house offers a comprehensive portfolio covering numerous sectors, asset classes, and smart beta strategies. VanEck was one of the first asset managers to offer investors access to global markets. The aim was always to identify new trends and asset classes – such as gold investments (1968), emerging markets (1993), and ETFs (2006). These have shaped the entire investment industry to this day.

VanEck is headquartered in New York City and has offices worldwide, including in Frankfurt (Germany), Zurich (Switzerland), Milan (Italy), London (UK), Madrid (Spain), Amsterdam (Netherlands), Shanghai (China), and Sydney (Australia).

Please refer to the Prospectus - in English language - and the KID/KIID - in local language - before making any final investment decisions and for full information on risks. These documents can be obtained free of charge at www.vaneck.com, from the ManCo or from the appointed facility agent.

VanEck Electrification and Power Infrastructure UCITS ETF ("ETF") is a sub-fund of VanEck UCITS ETFs plc, a UCITS umbrella investment company with limited liability between sub-funds. The ETF is registered with the Central Bank of Ireland, passively managed and tracking an equity index.

The value of the ETF may fluctuate significantly as a result of the investment strategy. The ETF's holdings are disclosed on each dealing day on www.vaneck.com under the ETF's Holdings section and as per PCF under the Documents section and published via one or more market data suppliers. The indicative net asset value (iNAV) of the ETF is available on Bloomberg. For details on the regulated markets where the ETF is listed, please refer to the Trading Information section on the ETF page at www.vaneck.com. Investors must buy and sell units of the UCITS on the secondary market via an intermediary (e.g. a broker) and cannot usually be sold directly back to the UCITS. Brokerage fees may incur. The buying price may exceed, or the selling price may be lower than the current net asset value. Investing in the ETF should be interpreted as acquiring shares of the ETF and not the underlying assets. Tax treatment depends on the personal circumstances of each investor and may vary over time. The ManCo may terminate the marketing of the ETF in one or more jurisdictions. The summary of the investor rights is available in English at: [summary-of-investor-rights.pdf](#).

The MarketVector™ Electrification Index is the exclusive property of MarketVector Indexes GmbH (a wholly owned subsidiary of Van Eck Associates Corporation), which has contracted with Solactive AG to maintain and calculate the Index. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards MarketVector Indexes GmbH ("MarketVector"), Solactive AG has no obligation to point out errors in the Index to third parties. VanEck's ETF is not sponsored, endorsed, sold or promoted by MarketVector and MarketVector makes no representation regarding the advisability of investing in the ETF. It is not possible to invest directly in an index.

Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown. Performance data for the Irish domiciled ETFs is displayed on a Net Asset Value basis, in Base Currency terms, with net income reinvested, net of fees. Returns may increase or decrease as a result of currency fluctuations. Performance should be assessed over a medium- to long-term.
