VanEck US Fallen Angel High Yield Bond UCITS ETF (the "Fund")

a sub-fund of VanEck UCITS ETFs plc (the "Company")
Share Class: USD A ISIN: IE000J6CHW80

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Product's investment objective is to replicate the price and the performance, before fees and expenses, of the ICE US Fallen Angel High Yield 10% Constrained Index (the "Index").

The Fund will seek to achieve its objective by investing in a diversified portfolio of fixed income bonds that, as far possible and practicable, consist of the components of the Index. The Product will invest in a diversified portfolio of US dollar denominated below investment grade corporate fixed rate debt instruments publicly issued and traded in the US domestic market by both U.S. and non-U.S. issuers that were rated investment grade at the time of issuance (a Fallen Angel) and which consist of the component securities that comprise the Index. The Product may invest more than 30% of its Net Asset Value in securities which are below investment grade.

Due to the practical difficulties and expense of purchasing all of the securities (debt instruments such as bonds) in the Index, the Investment Manager utilises a "sampling" methodology in seeking to achieve the Fund's investment objective. As such, the Fund may purchase a subset of the securities in the Index in an effort to hold a portfolio of securities with generally the same risk and return characteristics of the Index.

The Fund may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the

Fund may use are futures, options (puts and calls), swaps (including fixed income swaps and swaps on the Index), currency forwards Futures and options, currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs).

The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depositary receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

- Fund's base currency: U.S. Dollar
- Distribution policy: Income accumulated

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 4 because funds of this type have experienced high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Credit Risk: The issuer or guarantor of a debt security may be unable

and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honour its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase, which may adversely affect the value of the security.

- High Yield Securities Risk: The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities possibly leading to junk bond issuers not being able to service their principal and interest payment obligations. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities.
- Interest Rate Risk: Bond prices could rise or fall as the result of changes in the interest rates and the interest rate curve. Potential or actual downgrades in the credit rating can increase the assumed risk level.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.
