VanEck – Global Gold UCITS – USD R1 Acc (the "Fund")

a sub-fund of VanEck® ICAV (the "Company")
Share Class: USD R1 Acc ISIN: IE00BYXQSC06

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The investment objective of VanEck – Global Gold UCITS is to achieve long term capital appreciation. The Fund intends to realise its investment objective by investing substantially all of its assets into a no management fee bearing share class (the "S Share Class") of LO Funds – World Gold Expertise, Fund of Lombard Odier Funds being a Luxembourg regulated UCITS (hereinafter, the "Master Fund"). The Fund will at all times invest at least 85% of its assets in shares of the Master Fund. The Fund may hold up to 15% of its assets in ancillary liquid assets, cash, cash equivalents and money market instruments, which may include certificates of deposits issued by banks, treasury notes, depositary receipts, freely transferable promissory notes and short term bank deposits. The residual assets of the Fund will consist in ancillary liquid assets, as described above, as may be required from time to time for dealing liquidity purposes and payment of costs and expenses of the Fund. The Fund intends to minimise the level of ancillary liquid assets held for these purposes. To this end, the Master Fund mainly invests in equities issued by companies active worldwide in the gold mining, precious metals, and precious stones industries to benefit from the growth and scarcity of future gold reserves. The portfolio construction combines a bottom-up approach which searches for companies with organic growth, value, a potential to be acquired and a strong management; with a top-down overlay adjusting weights to match gold price outlook. The Master Fund invests primarily in eligible transferable securities (including those represented by American Depository Receipts and Global Depository Receipts), (i) issued by companies worldwide active in the gold mining, precious metals and precious

stones industries and/or (ii) replicating on a one-to-one basis the price of gold or other precious metals. It is intended to invest at least two-thirds (2/3rds) of the Master Fund's portfolio in gold mining companies active in the fields of exploration, extraction, processing, production and marketing or in companies with a substantial part of their turnover or income related to such activities or in companies financing such activities. The Master Fund may be leveraged up to 50% of its net asset value and this may have an impact on the Net Asset Value of the Fund in certain market conditions. The Master Fund will not hold physical gold, precious metals or precious stones. The Master Fund may be invested in small cap companies (as considered in their respective markets). The Master Fund uses the NYSE Arca Gold Miners Total Return Net Dividend Index (Bloomberg Ticker: GDMNTR Index) as its benchmark for the purposes of its VaR calculations. Direct investments (local shares) in Russia (other than investments traded on the Moscow Exchange MICEX-RTS or any successor thereof) and investments in markets which are not Regulated Markets shall in aggregate not exceed 10% of the Master Fund's net assets.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Risk of Investing in Natural Resources Companies: Investments in natural resources and natural resources companies, which include companies engaged in agriculture, alternatives (e.g., water and alternative energy), base and industrial metals, energy, forest products and precious metals, are very dependent on the demand for, and supply and price of, natural

resources and can be significantly affected by events relating to these industries, including international political and economic developments, embargoes, tariffs, inflation, weather and natural disasters, livestock diseases, limits on exploration, often changes in the supply and demand for natural resources and other factors.

- Industry or Sector Concentration Risk: The Fund's assets may be concentrated in one or more particular sectors or industries. The Fund may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund's performance to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.
- Risk of investing in smaller companies: The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Up to 5%
Exit charge	None

These are the maximum charges that could be taken from your money before it is invested or before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	1.55%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The entry and exit charges shown are maximum figures. In case of a switch between sub-funds or share classes, a switch charge will only be applicable if a higher entry charge is applicable to the shares of the new share class or sub-fund being acquired. The switch charge shall not, in any case, exceed the difference between the entry charge applicable to the new share class or sub-fund being acquired and the entry charge applicable to the share class or sub-fund being switched and its maximum is 5%. In some cases you might pay less – you can find this out from your financial adviser or distributor.

The Fund's ongoing charge shown is based on expenses for the 12-month period ending 31 December 2020. This figure may vary from year to year. The ongoing charge excludes portfolio transaction costs and extraordinary costs and expenses.

A dilution levy of maximum 2% may be applied if there are large levels of net subscriptions or net redemptions on the same business day. In such a case, the dilution levy is retained by the Fund.

For more information about charges, see the "Fees and Expenses" section in the prospectus, available on www.vaneck.com.

Past Performance

Any indication of past performance is not a reliable indicator of future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched on 15 November 2012.

Performance is shown after deduction of ongoing charges.

The performance indicated before the merger on 16/06/2017 relates to the Van Eck SICAV performance.
