## Stock selection is essential

China and India present investors with unique growth opportunities as their rising economies evolve into economic powerhouses. However, the vast majority of Chinese and Indian stocks may not be worth buying. We believe that selecting the best stocks from their respective markets may allow investors to capture the growth they seek.

## Investing through a GARP lens

MarketGrader’s fundamentally-driven scoring methodology provides a Buy, Hold or Sell rating for each company in its universe. A company’s score is based on an evaluation of metrics that measure growth, value and quality. Stocks that receive Buy ratings would be considered to have strong growth potential at a reasonable price (“GARP”). For investors looking to avoid potentially troublesome companies, MarketGrader’s Growth Leaders Methodology provides a way to curate leading companies with the best growth potential.

## Why Growth Leaders?

Fundamentally-driven, rules-based approach that selects stocks exhibiting strong growth characteristics at a reasonable price (“GARP”)

Represents the entire opportunity set of each respective market, regardless of size or listing location\*
