*Returns less than one year are not annualized.

The performance data quoted represents past performance which is no guarantee of future results and which may be lower or higher than current performance. Returns reflect temporary contractual fee waivers and/or expense reimbursements. Had the Fund incurred all expenses and fees, investment returns would have been reduced. Investment returns and Fund share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at net asset value (NAV). Certain indices may take into account withholding taxes. An Index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Index returns assume that dividends of the Index constituents in the Index have been reinvested. Please call 800.826.2333 or visit vaneck.com for performance information current to the most recent month end.

You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program rather than a complete program. An investment in the Fund may be subject to risks which include, among others, investing in concentration, equity securities, index tracking and data, consumer discretionary, financial services, the health care, industrials, information technology, underlying fund, market, medium-capitalization companies, new fund, non-diversification, operational, portfolio turnover and replication management risks, which may make these investments volatile in price or difficult to trade. Medium-capitalization companies may be subject to elevated risks. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

Investing involves risk, including possible loss of principal. Please call 800.826.2333 or visit vaneck.com for a free prospectus and summary prospectus. An investor should consider the investment objective, risks, charges and expenses of the investment company carefully before investing. The prospectus and summary prospectus contain this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.

Five-Year Risk Measures and Statistics

Volatility (Standard Deviation)	--
Sharpe Ratio	--
Alpha vs S&P 500 Index	--
Beta vs. S&P 500 Index	--
R-squared vs. S&P 500 Index	--

Source: VanEck and FactSet.

Volatility is the annualized standard deviation of monthly returns. Sharpe ratio is the return less the risk-free rate divided by the standard deviation and measures risk-adjusted return. Alpha is a measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. Beta is a measure of sensitivity to market movements. R-squared reflects the percentage of a fund's movements that can be explained by movements in its benchmark index.
