## Fund Description

The VanEck Unconstrained Emerging Markets Bond Fund (the "Fund") seeks total return, consisting of income and capital appreciation. The Fund can invest in debt securities that are issued by governments, quasi-government entities or corporations in emerging market countries. These securities may be denominated in any currency, including those of emerging markets. The Fund's benchmark (the "Index") is a blended index consisting of 50% J.P. Morgan Emerging Markets Bond Index (EMBI) Global Diversified and 50% J.P. Morgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversified. By investing in emerging markets debt securities, the Fund offers exposure to emerging markets fundamentals, generally characterized by lower debts and deficits, higher growth rates, and independent central banks.

The performance data quoted represents past performance which is no guarantee of future results and which may be lower or higher than current performance. Returns reflect temporary contractual fee waivers and/or expense reimbursements. Had the Fund incurred all expenses and fees, investment returns would have been reduced. Investment returns and Fund share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at net asset value (NAV). An Index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Index returns assume that dividends of the Index constituents in the Index have been reinvested. ## Fund Statistics

Effective Duration (Years)	5.52
Average Years to Maturity	11.71

Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Average years to maturity is the average amount of time until the bonds mature.

## 30-Day SEC Yield (%)

Class A	6.44%
Class C	6.13%
Class I	7.13%
Class Y	7.10%

30-Day SEC Yield is a standard calculation developed by the Securities and Exchange Commission that allows for fairer comparisons among bond funds. It is based on the most recent 30-day period. This yield figure reflects the interest earned during the period after deducting the fund's expenses for the period. Some statistics do not take into account fees and expenses associated with investments or the Fund. In the absence of temporary fee waivers, the 30-Day SEC Yield for 04/30/17 would have been 6.08% for Class A, 4.77% for Class C, 7.08% for Class I and 6.84% for Class Y of the Fund.

Portfolio facts and statistics are shown for Class A shares only unless otherwise noted; other classes may have different characteristics.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. The Fund's benchmark index (50% GBI-EM/50% EMBI) is a blended index consisting of 50% J.P. Morgan Government Bond Index-Emerging Markets (GBI-EM) Global Diversify and 50% J.P. Morgan Emerging Markets Bond Index (EMBI). The J.P. Morgan GBI-EM Global Diversified tracks local currency bonds issued by Emerging Markets governments. The index spans over 15 countries. The J.P. Morgan EMBI Global Diversified tracks returns for actively traded external debt instruments in emerging markets, and is also J.P. Morgan's most liquid U.S.-dollar emerging markets debt benchmark. Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program, not a complete program. The Fund is subject to risks associated with its investments in emerging market securities. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. As the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund will be in foreign currency, changes in currency exchange rates may negatively impact the Fund's return. Derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. The Fund may also be subject to credit risk, interest rate risk, tax risk, non-diversification risk and risks associated with non-investment grade securities. Please see the prospectus and summary prospectus for information on these and other risk considerations. Bond and bond funds will decrease in value as interest rates rise.

Investing involves risk, including possible loss of principal. Please call 800.826.2333 or visit [vaneck.com](http://vaneck.com) for a free prospectus and summary prospectus. An investor should consider the investment objective, risks, and charges and expenses of the investment company carefully before investing. The prospectus and summary prospectus contain this and information about the investment company. Please read the prospectus and summary prospectus carefully before investing.
