## What is this Product?

**Type:** The Product is a passively managed UCITS ETF of VanEck ETFs N.V., an umbrella fund structure comprising different sub-funds. Under Dutch law, VanEck ETFs N.V. has segregated liability between its sub-funds. VanEck ETFs N.V. does currently not offer an exchange of shares for shares of another sub-fund. The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares.

**Term:** No fixed term. We are entitled to terminate the management of the Product by giving at least one month notice to investors as published at least on our website.

**Objective:** The Product is passively managed and aims to follow the iBoxx SD-KPI EUR Liquid Corporates Index (the "Index") as closely as possible.

The general criteria below apply to the composition of the Index:

- the Index consists of maximum 40 corporate bonds. These must be investment grade;
- Only fixed-rate bonds whose cash flow can be determined in advance are eligible for the indices. The indices are comprised solely of bonds. T-Bills and other money market instruments are not eligible;
- the minimum remaining maturity is eighteen months;
- the minimum issue is 750 million euros;
- a maximum of one bond per company is selected;
- the reweighting takes place on the last day of February, May, August and November;
- for the weighting, two weight augmentations are applied:
  - i. market weight, ensuring that the index has a similar financial vs non-financial exposure to the EUR Corporates benchmark index.
  - ii. ESG-weight, ensuring that all issuers with higher SD-KPI scores are over weighted and issuers with lower SD-KPI scores are under weighted.

The Manufacturer has categorised the Product as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Product does not have sustainable investment as its investment objective. The Index considers ESG factors as further detailed in the Index methodology available on the Index Provider's website and in the Prospectus.

Income from the Product's investments is paid out as dividend. There is the possibility of dividend four times per calendar year. The amount of the dividend is based on a combination of the dividend and the coupons paid out on the shares or bonds, respectively, which form the underlying securities of the Product. Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Manager may utilise an optimised sampling methodology. The Product may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.

The Manufacturer will regularly monitor the Product's tracking accuracy. The annualised tracking error envisaged is not anticipated to exceed 0.2% under normal market conditions.

Dealing Frequency: You may purchase and redeem shares in this Product on a daily basis and in accordance with the relevant notice period.

- Product's base currency: Euro
- Distribution policy: Income distributed

The Depositary of VanEck ETFs N.V. is State Street Bank International GmbH, Amsterdam branch.

The return of the Product is directly related to the return of the underlying assets minus the costs associated with the Product. If the performance of the underlying assets decreases, the performance of the Product will also decrease. There is no capital protection against Market Risk.

**Intended Retail Investor:** This Product is intended for all kinds of investors who are looking for capital growth and/or optimization and have an investment horizon which is at least equal to the recommended holding period shown below. Only those investors who have the ability to make an informed decision based on sufficient knowledge and understanding of the Product and the market and the ability to bear a loss up to a total loss of their investment should consider investing in the Product. The Product does not offer a capital guarantee.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low. Furthermore, poor market conditions are very unlikely impact the capacity of Manufacturer to pay you. This Product does not include any protection from future market performance so you could lose some or all of your investment. The following risk may be materially relevant to the Product but may not be adequately captured by the summary risk indicator and may cause additional loss: Interest Rate Risk and Liquidity Risk as further described in the Prospectus.

Performance scenarios and the assumptions made to produce them:

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years.			
Example Investment: EUR 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 7,800	EUR 7,560
	Average return each year	-22.00 %	-5.45 %
Unfavourable	What you might get back after costs	EUR 8,420	EUR 8,880
	Average return each year	-15.78 %	-2.35 %
Moderate	What you might get back after costs	EUR 10,120	EUR 9,840
	Average return each year	1.21 %	-0.33 %
Favourable	What you might get back after costs	EUR 11,070	EUR 11,340
	Average return each year	10.72 %	2.54 %

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between October 2017 and October 2022. The moderate scenario occurred for an investment between August 2017 and August 2022. The favourable scenario occurred for an investment between December 2015 and December 2020. Your maximum loss would be that you will lose all your investment.

What happens if VanEck Asset Management B.V. is unable to pay out?

The assets of the Product are held in safekeeping by the Depositary and are separate assets to those of the Manufacturer. Therefore in the event of the insolvency of the Manufacturer, the Products assets will not be affected. In the event of the Depositary's insolvency, or someone acting on its behalf, the Product may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. The Depositary will also be liable to the Product and the investors for any loss arising from, among other things, its negligence or intentional failure properly to fulfil its obligations (subject to certain limitations). The Product's investments do not fall within the scope of any guarantee or compensation scheme.

## What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10 000 is invested

Cost over time		
	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	EUR 19	EUR 95
<b>Annual cost impact (*)</b>	0.2 %	0.2 %
