

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## VanEck iBoxx EUR Corporates UCITS ETF (the "Fund")

a sub-fund of VanEck ETFs N.V. (the "Company")

ISIN: NL0009690247

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

## Objectives and Investment Policy

The Sub-fund is passively managed and aims to follow the iBoxx SD-KPI EUR Liquid Corporates Index (the "Index") as closely as possible.

The general criteria below apply to the composition of the Index:

- the Index consists of maximum 40 corporate bonds. These must be investment grade;
- Only fixed-rate bonds whose cash flow can be determined in advance are eligible for the indices. The indices are comprised solely of bonds. T-Bills and other money market instruments are not eligible;
- the minimum remaining maturity is eighteen months;
- the minimum issue is 750 million euros;
- a maximum of one bond per company is selected;
- the reweighting takes place on the last day of February, May, August and November;
- for the weighting, two weight augmentations are applied:
  - i. market weight, ensuring that the index has a similar financial vs non-financial exposure to the EUR Corporates benchmark index.
  - ii. ESG-weight, ensuring that all issuers with higher SD-KPI scores are over weighted and issuers with lower SD-KPI scores are under weighted.

The Manager has categorised the Sub-fund as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Sub-fund does not have sustainable investment as its

investment objective. The Index considers ESG factors as further detailed in the Index methodology available on the Index Provider's website and in the Prospectus. Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Manager may utilise an optimised sampling methodology.

Income from the Fund's investments is paid out as dividend. There is the possibility of dividend four times per calendar year. The height of the dividend is based on a combination of the dividend and the coupons paid out on the shares or bonds, respectively, which form the underlying securities of the Sub-fund. The Fund invests in the underlying (physical) securities that make up the Index and does not take part in securities lending. The Manager will regularly monitor the Fund's tracking accuracy.

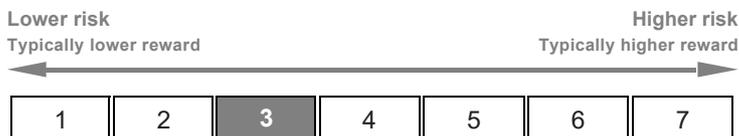

The Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

- Fund's base currency: Euro
- Distribution policy: Income distributed

The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares. The return of the Fund is directly related to the return of the underlying assets minus the costs associated with the Fund. If the performance of the underlying assets decreases, the performance of the Fund will also decrease. There is no capital protection against Market Risk.

## Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

The fund belongs to category 3 based on the type of investments.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Credit Risk: The issuer or guarantor of a debt security may be unable

and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honour its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase, which may adversely affect the value of the security.

- Liquidity Risks: Exists when a particular financial instrument is difficult to purchase or sell. If the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous or reasonable price, or at all.
- Interest Rate Risk: Bond prices could rise or fall as the result of changes in the interest rates and the interest rate curve. Potential or actual downgrades in the credit rating can increase the assumed risk level.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on [www.vaneck.com](http://www.vaneck.com).

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None*
Exit charge	None*

These are the maximum charges that could be taken from your money before it is invested or before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year

Ongoing charges	0.15%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

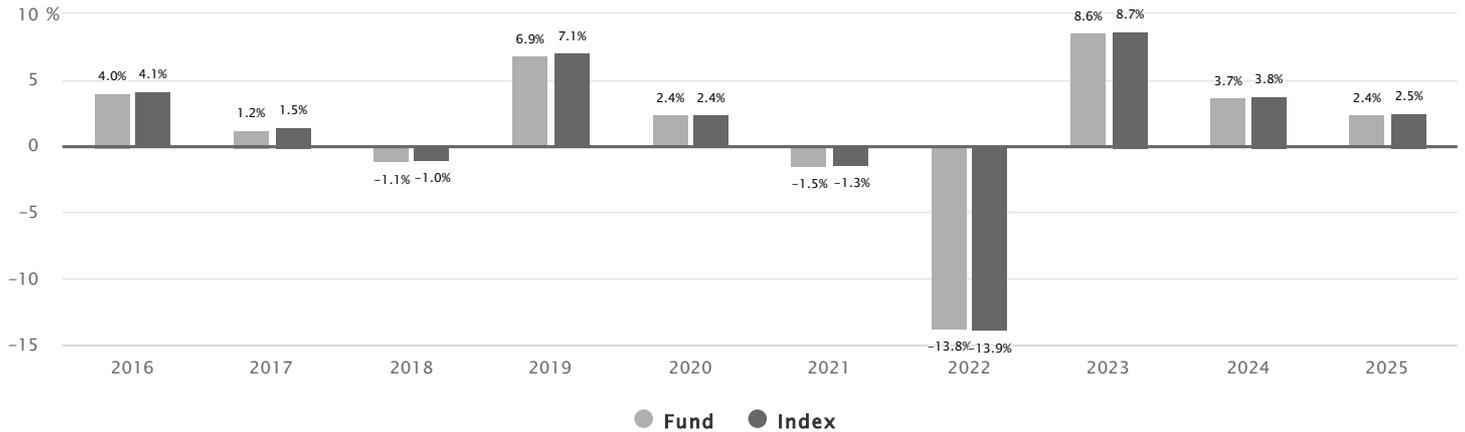

\*Not applicable to investors on the secondary market. Investors who buy or sell shares via a market pay the costs charged by their financial intermediaries. Information on these charges can be obtained from the markets where the shares are listed and traded or from the financial intermediaries.

You can find more information on the charges in the cost section of the Fund's prospectus and/or supplement. This is available at [www.vaneck.com](http://www.vaneck.com).

The ongoing charges figure is based on expenses for the 12-month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio transaction costs.

## Past Performance

Until 28 February 2022, the performance was achieved with a different investment policy. Prior to 28 February 2022 the Fund used a different Index, the Markit iBoxx EUR Liquid Corporates Index, which is reflected in the performance data of the Index.

Any indication of past performance is not a reliable indicator of future performance.

The chart shows the Fund's annual performance in EUR for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched on 14 April 2011.

Performance is shown after deduction of ongoing charges.

The Fund uses a gross return index. The performance includes income distributions gross of Dutch withholding tax because Dutch investors can reclaim the 15% Dutch withholding tax levied. Different investor types and investors from other jurisdictions may not be able to achieve the same level of performance due to their tax status and local tax rules.
