Fund Description

The VanEck Morningstar US SMID Moat UCITS ETF (SMOT) is a UCITS-compliant exchange traded fund that invests in a portfolio of equity securities with the aim of providing investment returns that closely track the performance of the Morningstar® US Small-Mid Cap Moat Focus Index™ (MSUMMFNU).

Morningstar® US Small-Mid Cap Moat Focus Index™ targets small- and mid-cap stocks with durable competitive advantages and attractive valuations, based on the forward-looking insights from Morningstar's equity research team. The rules-based index is reviewed quarterly. Please consult <http://indexes.morningstar.com> for detailed index information.

Performance History (%)

Month End as of 31 May 2024	1 MO*	3 MO*	YTD*	1 YR	3 YR	5 YR	10 YR	INCEPTION	ETF
MSUMMFNU (Index)	1.67	-0.87	2.66	19.00	5.17	13.52	12.28	5.24	

Past performance does not predict future returns.

Periods greater than one year are annualised.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance.

Investment returns and ETF share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. ETF returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV but do not reflect the payment of transaction costs. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

The "Net Asset Value" (NAV) of a VanEck UCITS ETF is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck UCITS ETF investors should not expect to buy or sell shares at NAV.

Please see the reverse side for important disclaimers.

Key Risks

Equity Market Risk: The value of the securities held by a Moat ETF may fall suddenly and unpredictably due to general market and economic conditions in markets in which issuers or securities held by the funds are active.

Concentration Risk: Increases in interest rates have a significant impact on the value of fixed-income securities issued by governments and companies. Potential or actual downgrades in credit ratings can also impact prices. This is another risk factor of a Multi-Asset ETF.

Foreign Currency Risk: Because all or a portion of a Moat ETF are being invested in securities denominated in foreign currencies, the fund's exposure to foreign currencies and changes in the value of foreign currencies versus the Base Currency may result in reduced returns for the funds, and the value of certain foreign currencies may be subject to a high degree of fluctuation.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on www.vaneck.com.

IMPORTANT INFORMATION

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions.

This information originates from VanEck (Europe) GmbH, which has been appointed as distributor of VanEck products in Europe by the Management Company VanEck Asset Management B.V., a UCITS Management Company incorporated under Dutch law and registered with the Dutch Authority for the Financial Markets (AFM). VanEck (Europe) GmbH, with registered address at Kreuznacher Str. 30, 60486 Frankfurt, Germany, is a financial services provider regulated by the Federal Financial Supervisory Authority in Germany (BaFin).
