PRODUCT DESCRIPTION

The VanEck TRON ETN is a fully-collateralized exchange traded note that invests in TRON. The note seeks to replicate the value and yield performance of the MVIS® CryptoCompare TRON VWAP Close Index.

- Direct access to Tron, a smart contract platform cryptocurrency with a strong market position in Asia.
- 100% collateralized with TRON
- Stored in cold storage at a regulated crypto custodian with crypto insurance (up to a limited amount)
- Tradeable like an ETF on Deutsche Börse Xetra, Euronext Paris and Amsterdam and SIX Swiss Exchange

Performance History (%)

Month End as of 31 Jan 2023	1 MO	YTD	1 YR	3 YR	5 YR	ETN INCEPTION
VTRX (NAV)	13.81	13.81	5.41	--	--	-33.71
MVTRXV (Index)	13.95	13.95	7.00	50.21	--	-32.72

Periods greater than one year are annualised.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance.

Investment returns will fluctuate so that investors' notes, when redeemed, may be worth more or less than their original cost. ETN returns assume that any capital gains have been reinvested. An index's performance is not illustrative of the ETNs's performance. Indices are not securities in which investments can be made.

The ETN value is determined at 4:00 PM CET of each business day, and represents the dollar value of one note; it is calculated by taking the total assets linked to the ETN, subtracting total liabilities, and dividing by the total number of notes outstanding. The value is not necessarily the same as the ETNs' intraday trading price. Investors should not expect to buy or sell the ETN at the determined value. Please see the reverse side for important disclaimers.
