**Key Risks**

**Concentration Risk:** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Index concentrates in a particular sector or sectors or industry or group of industries. Accordingly, the Fund may be subject to the risk that economic, political or other conditions that have a negative effect on a particular industry or sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

**Equity Market Risk:** The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Risk of Investing in Smaller Companies:** The securities of smaller companies may be more volatile and less liquid than the securities of large companies. As securities of smaller companies may experience more market price volatility than securities of larger companies, the net asset value of any fund which invests in smaller companies (such as the Fund) may reflect this volatility. For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on [www.vaneck.com](http://www.vaneck.com).
