**Past performance does not predict future returns.** Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown. The Dutch domiciled ETFs use a gross reinvestment index as opposed to many other ETFs and investment funds that use a net reinvestment index. Comparing with a gross reinvestment index is the purest form since it considers that Dutch investors can reclaim the dividend tax withheld. Please note that the performance includes income distributions gross of Dutch withholding tax because Dutch investors receive a refund of the 15% Dutch withholding tax levied. Different investor types and investors from other jurisdictions may not be able to achieve the same level of performance due to their tax status and local tax rules. Brokerage or transaction fees will apply. Returns may increase or decrease as a result of currency fluctuations. Investors must be aware that, due to market fluctuations and other factors, the performance of the ETFs may vary over time and should consider a medium/long-term perspective when evaluating the performance of ETFs. **Investing is subject to risks, including the possible loss of principal.** Source: VanEck.

## Yields

|                             |       |
|-----------------------------|-------|
| 12-Month Yield <sup>1</sup> | 2.04% |
|-----------------------------|-------|

<sup>1</sup>The 12-Month Yield is the yield an investor would have received if they had held the fund over the last 12 months assuming the most recent NAV. The 12-month yield is calculated by summing any income distributions over the past 12 months and dividing by the sum of the most recent NAV and any capital gain distributions made over the past 12 months. The dividend paid may differ from the dividend yield of the index by increasing or decreasing the fund. A part of the dividend can be reinvested whereby this is processed in the price and not paid out.

## Key Risks

**Exchange Rate Risk:** The value of an investment in the Fund can be affected by exchange rate fluctuations. The price of the euro can rise against another currency in which an investment is denominated.

**Equity Market Risk:** The value of the securities held by the ETF may fall suddenly and unpredictably due to general market and economic conditions in markets in which issuers or securities held by the fund are active.

**Liquidity Risk:** Liquidity risk exists when a particular financial instrument is difficult to purchase or sell. If the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous or reasonable price, or at all.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on [www.vaneck.com](http://www.vaneck.com).

## IMPORTANT INFORMATION

This is marketing communication. Please refer to the prospectus of the UCITS and to the Key Information Document ("KID") before making any final investment decisions. These documents are available in English and the KIDs in local languages and can be obtained free of charge at [www.vaneck.com](http://www.vaneck.com), from VanEck Asset Management B.V. (the "Management Company") or, where applicable, from the relevant appointed facility agent for your country.

VanEck World Equal Weight Screened UCITS ETF (the "ETF") is a sub-fund of VanEck ETFs N.V., an investment company with variable capital under the laws of the Netherlands. The ETF is registered with the AFM, passively managed and tracks an equity index. For details on the regulated markets where the ETF is listed, please refer to the Trading Information section on the ETF page at [www.vaneck.com](http://www.vaneck.com). Investing in the ETF should be interpreted as acquiring shares of the ETF and not the underlying assets.

The VanEck's ETF is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the Issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the financial instrument constitutes a recommendation by Solactive AG to invest capital in said financial instrument nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in VanEck's ETF. It is not possible to invest directly in an index.
