

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck – Emerging Markets Bond UCITS-USD R1 Inc (the "Fund")

a sub-fund of VanEck ICAV (the "Company")
Share Class: USD R1 Inc ISIN: IE00BYXQ\$J74

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The investment objective of the Fund is to seek total return, consisting of income and capital appreciation.

The investment manager (Van Eck Associates Corporation, hereinafter, the "Investment Manager") will seek to achieve the investment objective of the Fund by investing principally in emerging market bonds. For this purpose emerging markets include countries such as China, India, South Africa and Brazil. An instrument will qualify as an emerging market bond if it is either (i) issued by an emerging market government, quasi-government or corporate entity (regardless of the currency in which it is denominated) or (ii) denominated in the currency of an emerging market country (regardless of the location of the issuer). Bonds may be fixed or floating rate. The Fund may also invest on an ancillary basis (i) in non-emerging market bonds and (ii) emerging market and developed market currencies (as further set out below). The Fund may also invest in bonds with a credit rating below BBB ("junk bonds").

The Fund expects to invest in debt issued in emerging market currencies and in developed market currencies by governments and government owned, controlled, or related entities (and their agencies and subdivisions), and by corporations. The Fund may invest in ancillary liquid assets, asset-backed securities (ABS) or mortgagebacked securities (MBS), American depositary receipts, corporate bonds, debentures and notes including participation notes (P Notes) (contracts issued by banks or broker-dealers that provide exposure to an underlying security on a 1 for 1 basis on the underlying security which may be used to access a particular market). The Fund may use P Notes or American Depositary Receipts (ADR), to gain exposure to securities instead of using physical securities in circumstances where, due to local restrictions or quota limitations, it is not possible to hold these directly or where it is otherwise advantageous to the Fund to do so. The Fund may invest in such P Notes to gain exposure to restricted markets such as the Saudi Arabian or Indian market.

The Fund may also invest in credit-linked notes (debt securities of companies whose interest payments and/or payment at maturity depend on the performance of one or more underlying credit exposures) or money market instruments including but not limited to certificates of deposits issued by banks, treasury notes, depositary receipts, freely transferable promissory notes and short term bank deposits.

The Fund may also invest in emerging market or developed Market currencies. The Fund may use financial derivative instruments (FDI) to gain exposure to interest rates, foreign exchange rates or currencies, denominated in any

currency and to enhance return, hedge (or protect) the value of its assets against adverse market movements, currency exchange rates, interest rates and movements in the securities markets, manage certain investment risks and/or as a substitute for the purchase or sale of securities. The Fund may also use FX forwards and non-deliverable forwards to implement "crosshedging" strategies, which involve the use of one currency to hedge against the decline in the value of another currency.

The Fund may invest in exchange-traded funds (ETFs) to participate in, or gain rapid exposure to, certain market sectors, or when direct investments in certain countries are not permitted. The Fund may also invest on an ancillary basis in money market funds.

Although the Fund is not constructed relative to a benchmark, the Investment Manager has created a blended, unmanaged index which consists of 50% J.P. Morgan Emerging Markets Bond Index Global Diversified Index and 50% J.P. Morgan Government Bond Index-Emerging Markets Global Diversified Index (the "Index"). The Index will serve as a reference benchmark.

The Manager has categorised the Fund as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Fund does not have sustainable investment as its investment objective.

The Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison and risk measurement purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You may redeem shares in this Fund on a daily basis and in accordance with the relevant notice period.

- Fund's base currency: U.S. Dollar
- Distribution policy: Income distributed

The return of the Fund is directly related to the return of the underlying assets minus the costs associated with the Fund. If the performance of the underlying assets decreases, the performance of the Fund will also decrease. There is no capital protection against Market Risk.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 4 because funds of this type have experienced high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Credit Risk: The issuer or guarantor of a debt security may be unable and/or unwilling to make timely interest payments and/or repay the

principal on its debt or to otherwise honour its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase, which may adversely affect the value of the security.

- Emerging Markets Risk: Investments in emerging market countries are subject to specific risks and securities are generally less liquid and less efficient and securities markets may be less well regulated. Specific risks may be heightened by currency fluctuations and exchange control; imposition of restrictions on the repatriation of funds or other assets; governmental interference; higher inflation; social, economic and political uncertainties.
- Interest Rate Risk: Bond prices could rise or fall as the result of changes in the interest rates and the interest rate curve. Potential or actual downgrades in the credit rating can increase the assumed risk level.

For more information on risks, please see the "Risk Factors" section of the Fund's prospectus, available on www.vaneck.com.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	Up to 5%
Exit charge	None

These are the maximum charges that could be taken from your money before it is invested or before we pay out the sale proceeds of your investment.

Charges taken from the Fund over a year	
Ongoing charges	1.20%

Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum figures. In case of a switch between sub-funds or share classes, a switch charge will only be applicable if a higher entry charge is applicable to the shares of the new share class or sub-fund being acquired. The switch charge shall not, in any case, exceed the difference between the entry charge applicable to the new share class or sub-fund being acquired and the entry charge applicable to the share class or sub-fund being switched and its maximum is 5%. In some cases you might pay less – you can find this out from your financial adviser or distributor.

The Fund's ongoing charge shown is based on expenses for the 12-month period ending 31 December 2024. This figure may vary from year to year. The ongoing charge excludes portfolio transaction costs and extraordinary costs and expenses.

A dilution levy of maximum 2% may be applied if there are large levels of net subscriptions or net redemptions on the same business day. In such a case, the dilution levy is retained by the Fund.

For more information about charges, see the "Fees and Expenses" section in the prospectus, available on www.vaneck.com.

Past Performance

Any indication of past performance is not a reliable indicator of future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched on 12 June 2014.

Performance is shown after deduction of ongoing charges.

The performance indicated before the merger on 16/06/2017 relates to the Van Eck SICAV performance.
