Fund Description

09 September 2026

Global agribusiness is no longer simply about farming: it is the essential infrastructure underpinning food security for a planet of more than 8 billion people¹. As population growth, climate stress, water scarcity, and shrinking arable land strain conventional food systems, the world is turning to technology, science, and innovation to bridge an accelerating gap between supply and demand. From precision crop inputs and next-generation seeds to advanced farm machinery, animal health, and alternative proteins, the companies redefining how food is produced, processed, and traded are becoming the backbone of the modern food economy.

The MVIS® Global Agribusiness Total Return Net Index (MVMOOTR) is a thematic index tracking the of the largest and most liquid companies in the global agribusiness segment.
