

Access Mega Trends with Thematic ETFs

ETFs can be useful tools for investors seeking to participate in targeted economic opportunities. Thematic ETFs may be based in advancements, such as technology, or solution-oriented to address macro-economic conditions, like inflation. While these tend to be concentrated, the addition of thematic ETFs may add value via enhanced returns, diversification benefits and reduced portfolio risk. VanEck has a purpose-built suite of ETFs designed for accessing the secular trends that are shaping the modern investment landscape.

Fund	Demographics	Automation	Energy Transition	Disruptive Technology	Healthcare Innovation	Infrastructure	Reshoring	Resource Scarcity

IMPORTANT DISCLOSURES

ESG investing is qualitative and subjective by nature, and there is no guarantee that the factors utilized by VanEck or any judgment exercised by VanEck will reflect the opinions of any particular investor. Information regarding responsible practices is obtained through voluntary or third-party reporting, which may not be accurate or complete, and VanEck is dependent on such information to evaluate a company's commitment to, or implementation of, responsible practices. Socially responsible norms differ by region. There is no assurance that the socially responsible investing strategy and techniques employed will be successful.

ESG integration is the practice of incorporating material environmental, social and governance (ESG) information or insights alongside traditional measures into the investment decision process to improve long term financial outcomes of portfolios. Unless otherwise stated within the fund's investment objective, inclusion of this statement does not imply that the strategy has an ESG-aligned investment objective, but rather describes how ESG information is integrated into the overall investment process.

This is not an offer to buy or sell, or a solicitation of any offer to buy or sell any of the securities mentioned herein. The information presented does not involve the rendering of personalized investment, financial, legal, or tax advice. Certain statements contained herein may constitute projections, forecasts and other forward looking statements, which do not reflect actual results, are valid as of the date of this communication and subject to change without notice. Information provided by third party sources are believed to be reliable and have not been independently verified for accuracy or completeness and cannot be guaranteed. The information herein represents the opinion of the author(s), but not necessarily those of VanEck.

The principal risks of investing in VanEck ETFs include sector, market, economic, political, foreign currency, world event, index tracking, active management, social media analytics, derivatives, blockchain, commodities and non-diversification risks, as well as fluctuations in net asset value and the risks associated with investing in less developed capital markets. The Funds may loan their securities, which may subject them to additional credit and counterparty risk. ETFs that invest in high-yield securities are subject to risks associated with investing in high-yield securities; which include a greater risk of loss of income and principal than funds holding higher-rated securities; concentration risk; credit risk; hedging risk; interest rate risk; and short sale risk. ETFs that invest in companies with small capitalizations are subject to elevated risks, which include, among others, greater volatility, lower trading volume and less liquidity than larger companies. Please see the prospectus of each Fund for more complete information regarding each Fund's specific risks.

All investing is subject to risk, including the possible loss of the money you invest. As with any investment strategy, there is no guarantee that investment objectives will be met and investors may lose money. Diversification does not ensure a profit or protect against a loss in a declining market. Past performance is no guarantee of future results.
