

A Strategy Powered by The People

BUZZ VanEck® Social Sentiment ETF

Gaining an Edge from Social Sentiment

What people are saying about stocks matters more than ever before. Today's individual investor has unprecedented access to resources and information, blurring the line between 'professional' and 'retail'. Investors are increasingly gathering online to collaborate, discuss and identify investment ideas. The millions of daily interactions across on these online communities are rich with valuable data and insights about the potential future prospects of different stocks.

The BUZZ Index cuts through the noise, distilling these interactions to identify stocks poised for strong potential growth. This has been a winning strategy in both short and longer time periods based on batting average, which measures the percent of time a strategy outperforms the market.

The BUZZ Index Has Outperformed vs the S&P 500 Index in Multiple Periods
Monthly Rolling Return: 8/2016 – 6/2023

Total Periods	83	78	72	48
Total Outperformed	45	42	44	33
Batting Average (%)	54	54	61	69

Source: FactSet. Benchmark: S&P 500. Batting Average is measured by dividing the number of periods a portfolio or investment strategy outperforms a benchmark by the total number of periods. Monthly rolling returns display returns for the defined intervals (1Mo, 6Mo, 1Yr, and 3Yr) in overlapping monthly periods.

Index performance is not illustrative of Fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com or by calling 800.826.2333. Historical performance is not indicative of future results. Current data may differ from data quoted. Indexes are unmanaged and are not securities in which an investment can be made. Index returns assume that dividends have been reinvested.

Risks and Important Disclosures

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a VanEck Exchange Traded Fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck ETF investors should not expect to buy or sell shares at NAV.

Investing in companies based on social media analytics involves the potential risk of market manipulation because social media posts may be made with an intent to inflate, or otherwise manipulate, the public perception of a company stock or other investment. Although the Sentiment Leaders Index provider attempts to mitigate the potential risk of such manipulation by employing screens to identify posts which may be computer generated or deceptive and by employing market capitalization and trading volume criteria to remove companies which may be more likely targets for such manipulation, there is no guarantee that the Sentiment Leaders Index's model will successfully reduce such risk. Furthermore, text and sentiment analysis of social media postings may prove inaccurate in predicting a company's stock performance.
