*Van Eck Associates Corporation (the "Adviser") will pay all expenses of the Fund, except for the fee payment under the investment management agreement, acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses.

Fund Description

VanEck Green Bond ETF (GRNB[®]) seeks to replicate, as closely as possible, before fees and expenses, the price and yield performance of the S&P Green Bond U.S. Dollar Select Index (SPGRUSST). The index is comprised of U.S. dollar-denominated green bonds that are issued to finance environmentally friendly projects, and includes bonds issued by supranational, government, and corporate issuers globally.

*Returns less than one year are not annualized.

**Index data prior to September 1, 2019 reflects that of the S&P Green Bond Select Index (SPGRNSLT). From September 1, 2019 forward, the index data reflects that of the Fund's underlying index, the S&P Green Bond U.S. Dollar Select Index (SPGRUSST). Index history which includes periods prior to September 1, 2019 links the performance of SPGRNSLT and SPGRUSST and is not intended for third party use.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Net asset value (NAV) per share is calculated by subtracting total liabilities from the total assets, then dividing by the number of shares outstanding. Share price is the last price at which shares were traded on the Fund's primary listing exchange. Performance current to the most recent month end is available by calling 800.826.2333 or by visiting vaneck.com. Index returns are not Fund returns and do not reflect any management fees or brokerage expenses. Certain indices may take into account withholding taxes. Investors can not invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses. Index returns assume that dividends have been reinvested.

GRNB VanEck Green Bond ETF

As of December 31, 2021

Fundamentals*

Effective Duration (yrs)	5.79
Years to Maturity	7.92

*These figures represent weighted averages. Effective Duration measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield, and is appropriate for bonds with embedded options. Years to Maturity is the period of time for which a financial instrument remains outstanding.

Investing in "green" bonds carries the risk that, under certain market conditions, the Fund may underperform as compared to funds that invest in a broader range of investments. Investing primarily in "green" investments may affect the Fund's exposure to certain sectors or types of investments and will impact the Fund's relative investment performance depending on whether such sectors or investments are in or out of favor in the market. The "green" sector may also have challenges such as a limited number of issuers, limited liquidity in the market and limited supply of bonds that merit "green" status, each of which may adversely affect the Fund.

†Credit quality ratings are measured on a scale that ranges from AAA (highest) to D (lowest), and are based on credit ratings from S&P and Moody's. If more than one rating is available for an underlying security, the lower of the two ratings is used. If a bond issued by a national government, national government agency or supranational issuer is not rated, the issuer's credit rating will be used. If two issuer ratings are available, the lower of the two is used. If only one rating is available in all scenarios, we will use the rating provided. If no rating is available, the security will be not rated. Not rated securities do not necessarily indicate lower credit quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

An investment in the Fund may be subject to risks which include, among others, green bonds, investing in Asian, Chinese and emerging market issuers, foreign securities, foreign currency, credit, interest rate, floating rate, floating rate LIBOR, high yield securities, supranational bond, government-related bond, restricted securities, securitized/asset-backed securities, financial, utilities, market, operational, call, sampling, index tracking, authorized participant concentration, no guarantee of active trading market, trading issues, passive management, fund shares trading, premium/discount risk and liquidity of fund shares, non-diversified and concentration risks, all of which may adversely affect the Fund.
