*Returns less than one year are not annualized.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

These are not recommendations to buy or to sell any security. Securities and holdings may vary.

*30-Day SEC Yield is based on the most recent 30-day period and reflects the investment income earned after deducting a fund’s expenses for the period. This yield does not necessarily reflect the yield that an investor will receive. Distributions may vary from time to time. A weighted harmonic average is used to calculate this metric. Price/Book Ratio is the price of a security divided by the book value per share of the security. Price/Earnings Ratio is the price of a security divided by the last twelve months earnings per share of the security.

*Van Eck Associates Corporation (the “Adviser”) will pay all expenses of the Fund, except for the fee payment under the investment management agreement, acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses. Notwithstanding the foregoing, the Adviser has agreed to pay the offering costs until at least May 1, 2024.

The “Net Asset Value” (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF’s intraday trading value. Investors should not expect to buy or sell shares at NAV.
