Prospectus

VanEck® U.S. Equity Buffer ETF — October

September 23, 2026

VanEck U.S. Equity Buffer ETF — October (the “Fund”) is a series of VanEck ETF Trust (the “Trust”) and is an actively managed ETF.

- The Fund employs a “defined outcome strategy.” Defined outcome strategies seek to produce pre-determined investment outcomes based upon the performance of an underlying security or index. The pre-determined outcomes sought by the Fund, which include the buffer and cap discussed below (the “Outcomes”), are based upon the performance of the share price of one or more exchange-traded funds (“ETFs”) or exchange-traded unit investment trusts (collectively, the “Underlying ETF”), which seek to track the returns, before fees and expenses, of the S&P 500® Index over an approximately one-year period from October 1 through September 30 of each year (the “Outcome Period”). The current Outcome Period is from approximately October 1, 2026 through September 30, 2027. **The Fund will not terminate after the conclusion of the Outcome Period. It is expected that, after the conclusion of the Outcome Period, a new Outcome Period will begin. There is no guarantee that the Outcomes for an Outcome Period will be realized.**
- The Fund invests in FLEXible EXchange® Options (“FLEX Options”) on the Underlying ETF. FLEX Options are customizable exchange-traded option contracts guaranteed for settlement by the Options Clearing Corporation (the “OCC”). The Fund’s strategy has been specifically designed to seek to produce the Outcomes based upon the performance of the Underlying ETF’s share price (or its “price return”) at the conclusion of the Outcome Period. **The Fund will not receive or benefit from any dividend payments made by the Underlying ETF to the extent of its FLEX Options investments. The Outcomes may only be realized by investors who hold shares of the Fund (“Shares”) at the outset of the Outcome Period and continue to hold them until the conclusion of the Outcome Period. Investors that purchase Shares after the Outcome Period has begun or sell Shares prior to the Outcome Period’s conclusion may experience investment returns that are very different from those that the Fund seeks to provide.**
- Fund shareholders are subject to an upside return cap (the “Cap”) that represents the maximum percentage return an investor can achieve from an investment in the Fund over the duration of the Outcome Period. The Cap is set on the business day immediately prior to the first day of the Outcome Period and is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund’s annual Fund management fee of 0.50% of the Fund’s average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Cap will be further reduced by any shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes, and extraordinary expenses incurred by the Fund. The Cap is likely to rise or fall from one Outcome Period to the next. **Please note, if the Outcome Period has begun and the Fund has increased in value to a level near the Cap, an investor purchasing Shares at that price has little or no ability to achieve gains but remains vulnerable to downside risks.**
- The Fund seeks to provide shareholders that hold Shares for the entire Outcome Period with a buffer against Underlying ETF losses during the Outcome Period. The amount of the buffer is determined based upon prevailing market conditions at the beginning of an Outcome Period and is a set percentage established at the commencement of each Outcome Period (the Fund’s set buffer percentage for each Outcome Period is hereinafter referred to as the “Buffer”). The Buffer is expected to be within a range of 15% to 20% of Underlying ETF losses for each Outcome Period. Although the Fund expects to set a Buffer within a range of 15% to 20% for each Outcome Period, there is no guarantee that the final Buffer set for an Outcome Period will be within this range or that the Fund will provide the Buffer. It is possible that the Buffer will rise or fall from one Outcome Period to the next. For the current Outcome Period, the Fund’s Buffer is [17.00%]. The Fund’s shareholders will experience all Underlying ETF losses exceeding the Buffer on a one-to-one basis. The Buffer is provided prior to taking into account annual Fund management fees, transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. These fees and any expenses will have the effect of reducing the Buffer amount for Fund shareholders for an Outcome Period. When the Fund’s annual management fee equal to 0.50% of the Fund’s average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the net Buffer for the Outcome Period is [16.50%]. **If the Outcome Period has begun and the Fund has decreased in value beyond the pre-determined Buffer, an investor purchasing Shares at that price may not benefit from the Buffer. Similarly, if the Outcome Period has begun and the Fund has increased in value, an investor purchasing Shares at that price may not benefit from the Buffer until the Fund’s value has decreased to its value at the commencement of the Outcome Period. An investment in the Fund is only appropriate for shareholders willing to bear those losses.**
- The Fund’s website, www.vaneck.com/OCT, provides important Fund information (including, among other items, Outcome Period start and end dates and information relating to the Cap and Buffer), as well as information relating to the potential Outcomes of an investment in the Fund on a daily basis. **If you are contemplating purchasing Shares, please visit the Fund’s website. The Fund’s strategy is designed to seek to produce the Outcomes upon the expiration of its FLEX Options investments on the last day of the Outcome Period. It should not be expected that the Outcomes, including the net effect of the Fund’s annual management fee on the Cap and Buffer, will be provided at any point prior to the last day of the Outcome Period. Investors considering purchasing Shares after the Outcome Period has begun or selling Shares prior to the end of the Outcome Period should visit the Fund’s website to fully understand potential investment Outcomes.** An investor that holds Shares through

multiple Outcome Periods may fail to experience gains comparable to those of the Underlying ETF over time because at the end of each Outcome Period, a new Cap will be established based on the then-current price of the Underlying ETF and any gains experienced by the Underlying ETF above the prior Cap will be forfeited. Similarly, an investor that holds Shares through multiple Outcome Periods will be unable to recapture losses from prior Outcome Periods because at the end of each Outcome Period, a new Buffer will be established based on the then-current price of the Underlying ETF and any losses experienced below the Buffer will be locked in. Moreover, the annual imposition of a new Cap on future gains may make it difficult to recoup any losses from the prior Outcome Periods such that, over multiple Outcome Periods, the Fund may have losses that exceed those of the Underlying ETF.

Although the Fund seeks to achieve its investment objective, there is no guarantee that it will do so. The returns that the Fund seeks to provide do not include the costs associated with purchasing Shares and certain expenses incurred by the Fund. The Fund has characteristics unlike many other traditional investment products and may not be suitable for all investors.

VANECK® U.S. EQUITY BUFFER ETF - OCTOBER

SUMMARY INFORMATION

INVESTMENT OBJECTIVE

The investment objective of the VanEck U.S. Equity Buffer ETF - October (the "Fund") is to seek to provide investors with returns (before fees and expenses) that match the price return of the Underlying ETF, up to a predetermined upside cap of [12.50% to 15.50%] while providing a buffer (before fees and expenses) against the first [17.00%] of Underlying ETF losses, over the period from approximately October 1, 2026 through September 30, 2027.

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy, hold and sell shares of the Fund ("Shares"). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Shareholder Fees <i>(fees paid directly from your investment)</i>	None
--	-------------

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.50 %
Other Expenses ^(a) ^(b)	0.00 %
Total Annual Fund Operating Expenses ^(b)	0.50 %

(a) "Other Expenses" are based on estimated amounts for the current fiscal year.

(b) Van Eck Absolute Return Advisers Corporation (the "Adviser") will pay all expenses of the Fund, except for the fee payment under the investment management agreement, acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses. Notwithstanding the foregoing, the Adviser has agreed to pay the offering costs until at least March 1, 2028.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell or hold all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waivers and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

Year	Expenses
1	\$51
3	\$160

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or "turns over" its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. Because the Fund is newly organized, no portfolio turnover figures are available.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund that seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its total assets in investments that provide exposure to one or more ETFs or unit investment trusts (collectively, the "Underlying ETF"), which seek to track an index comprised of U.S. equities. For purposes of this policy, the term "assets" means net assets plus the amount of any borrowings for investment purposes. The Underlying ETF seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the S&P 500® Index, by investing in equity securities of U.S. companies, including companies with large capitalizations.

The Fund employs a defined outcome strategy which seeks to produce pre-determined investment outcomes (the "Outcomes") based on the performance of the share price of the Underlying ETF over an approximate one year period. The Fund invests in Flexible Exchange® Options ("FLEX Options") on the Underlying ETF. FLEX Options are exchange-traded option contracts with uniquely customizable terms. Although guaranteed for settlement by the Options Clearing Corporation (the "OCC"), FLEX Options are still subject to counterparty risk with the OCC and may be less liquid than more traditional exchange-traded option contracts. Due to the unique mechanics of the Fund's strategy, the return an investor can expect to receive from an investment

in the Fund has characteristics that are distinct from many other investment vehicles. It is important that an investor understand these characteristics before making an investment in the Fund.

In general, an option contract is an agreement between a buyer and seller that gives the purchaser of the option the right to buy or sell a particular asset at a specified future date at an agreed upon price. The reference asset for all of the Fund's FLEX Options is the Underlying ETF. Through its use of FLEX Options on the Underlying ETF, the Fund has significant exposure to companies in the information technology sector.

The Outcomes sought by the Fund, which include the Buffer and Cap discussed below, are based upon the performance of the Underlying ETF's share price over an approximately one-year period from October 1 through September 30 of each year (the "Outcome Period"). The current Outcome Period is from approximately October 1, 2026 through September 30, 2027. Upon conclusion of the Outcome Period, the Fund will receive the cash value of all the FLEX Options it held for the prior Outcome Period. It will then generally invest in a new series of FLEX Options with an expiration date of approximately one year in the future, and a new Outcome Period will begin. **The Outcomes may only be realized by investors who continuously hold Shares from the commencement of the Outcome Period until its conclusion. Investors who purchase Shares after the Outcome Period has begun or sell Shares prior to the Outcome Period's conclusion may experience investment returns that vary from those that the Fund seeks to provide.**

The Fund's strategy has been specifically designed to seek to produce the Outcomes based upon the performance of the Underlying ETF's share price (or its "price return") over the duration of the Outcome Period. The Fund will not receive or benefit from any dividend payments made by the Underlying ETF to the extent of its FLEX Options investments. The Fund is not an appropriate investment for income-seeking investors. If the Underlying ETF's share price increases over the duration of the Outcome Period, the Fund seeks to provide investors that hold Shares for the entire Outcome Period with an increase in value that approximately matches the percentage increase experienced by the Underlying ETF's share price over the duration of the Outcome Period, up to an upside return cap (the "Cap") that represents the maximum percentage return an investor can achieve from an investment in the Fund for the Outcome Period. Therefore, even though the Fund's returns are based upon the performance of the Underlying ETF's share price, if the Underlying ETF's share price experiences returns for the Outcome Period in excess of the Cap, Fund shareholders will not participate in such excess returns.

The Cap is based upon prevailing market conditions at the time the Fund enters into the FLEX Options on the business day immediately prior to the first day of the Outcome Period. For the current Outcome Period, the Cap is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Cap will be further reduced by any shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. Since the Cap is based upon prevailing market conditions at the beginning of an Outcome Period, the Cap will rise or fall from one Outcome Period to the next.

As is discussed in further detail below, it is anticipated that during the Outcome Period the Fund's net asset value ("NAV") will not increase or decrease at the same rate as the Underlying ETF's share price. The Fund's NAV is based upon the value of its portfolio, which is primarily composed of FLEX Options.

Although the value of the Underlying ETF's share price is a significant component of the value of the Fund's FLEX Options, the time remaining until those FLEX Options expire also affects their value. The Fund's investment sub-adviser, Lido Advisors, LLC ("Lido" or the "Sub-Adviser"), generally anticipates that the Fund's NAV will increase on days when the Underlying ETF's share price increases and will decrease on days when the Underlying ETF's share price decreases. Due to the use of options, the rate of such increase or decrease will likely be dampened and will likely be less than that experienced by the Underlying ETF.

The Fund seeks to generate returns that match the Underlying ETF, up to the Cap (discussed in detail below), while limiting downside losses through the implementation of the Buffer. The two hypothetical graphical illustrations provided below are designed to illustrate the Outcomes that the Fund seeks to provide for investors who hold Shares for the entirety of the Outcome Period. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period. The returns that the Fund seeks to provide do not include the costs associated with purchasing Shares and certain expenses incurred by the Fund.

The hypothetical charts above are for illustration purposes only. Shareholders may experience different Outcomes than shown in these illustrations, including loss of their entire investment. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period.

The following table contains **hypothetical** examples designed to illustrate the Outcomes the Fund seeks to provide over an Outcome Period, based upon the performance of the Underlying ETF from -100% to 100%. **The table is provided for illustrative purposes and does not provide every possible performance scenario for Shares over the course of an Outcome Period. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period. The table is not intended to predict or project the performance of the FLEX Options or the Fund. Fund shareholders should not take this information as an assurance of the expected performance of the Underlying ETF or return on Shares.** The actual overall performance of the Fund will vary with fluctuations in the value of the FLEX Options during the Outcome Period, among other factors. Please refer to the Fund's website, www.vaneck.com/OCT, which provides updated information relating to this table on a daily basis throughout the Outcome Period.

Underlying ETF Performance	(100)%	(50)%	(20)%	(10)%	(5)%	0%	5%	10%	15%	20%	50%	100%
Fund Performance	[(83)%]	[(33)%]	[(3)%]	[0%]	[0%]	[0%]	[5%]	[10%]	[12.50% -15.00%]	[12.50% -15.50%]	[12.50% -15.50%]	[12.50% -15.50%]

The Cap is set on the business day immediately prior to the first day of the Outcome Period and is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Fund's annual management fee of 0.50% of the Fund's average daily net assets, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund will have the effect of reducing the Cap and Buffer amounts for Fund shareholders and the returns listed herein. The Cap and Buffer may change from one Outcome Period to the next. This table reflects the Cap and the Buffer for the current Outcome Period only.

Use of FLEX Options. The Outcomes may be achieved by purchasing and selling call and put FLEX Options to create layers within the Fund's portfolio. The FLEX Options that comprise the Fund's portfolio each reference the Underlying ETF and are set to expire on the last day of the Outcome Period. The customizable nature of FLEX Options allows the Sub-Adviser to select the share price at which the Underlying ETF will be exercised at the expiration of each FLEX Option. This is commonly known as the "strike price." On the business day immediately prior to the first day of the Outcome Period, the Sub-Adviser specifically selects the strike price for each FLEX Option such that when the FLEX Options are exercised on the final day of the Outcome Period, the Outcomes may be obtained, depending on the performance of the Underlying ETF's share price over the duration of the Outcome Period. The Fund utilizes European style option contracts, which are exercisable only on the expiration date of the option contract.

To achieve the Outcomes, the Fund may purchase and sell a combination of call option contracts and put option contracts. A call option contract gives the buyer of the call option contract the right (but not the obligation) to buy, and the seller of the call option contract (i.e., the "writer") the obligation to sell, a specified amount of an underlying security at a pre-determined price. A put option contract gives the buyer of the put option contract the right (but not the obligation) to sell, and the writer of the put option contract the obligation to buy (if the option is exercised), a specified amount of an underlying security at a pre-determined price.

The effect of the Fund's call option contracts is to provide exposure to the increases in the price of the Underlying ETF, subject to the Cap. The potential investment gains provided by the Fund are subject to the Cap, a maximum investment return level, which is discussed below. The Fund will not participate in gains that exceed the Cap. Separately, the Fund is designed to deliver on its investment objective to provide returns that are buffered by the Buffer if the Underlying ETF's share price experiences a loss during the course of the Outcome Period through its put option contracts. There is no guarantee that the Fund will be successful in its attempt to provide buffered returns. The Buffer that the Fund seeks to provide is only operative against Underlying ETF losses up to the Buffer for the Outcome Period. After the Underlying ETF's share price has decreased in value by more than the Buffer, the Fund will experience all subsequent losses on a one-to-one basis. The effect created by the Fund's Buffer is that if the Underlying ETF's share price has decreased in value over the course of the Outcome Period, the Fund seeks to be returned the amount of its principal investment (if the Underlying ETF's share price decreased in value by an amount equal to the Buffer or less) or experience the losses of the Underlying ETF minus the Buffer (if the Underlying ETF's share price decreased in value by more than the Buffer).

Each of the FLEX Options purchased and sold throughout the Outcome Period are expected to have the same or similar terms (i.e., strike price and expiration) as the corresponding FLEX Options purchased and sold on the business day immediately prior to the first day of the Outcome Period.

The Outcome Period. The Outcomes sought by the Fund are based upon the Fund's NAV on the business day immediately prior to the first day of the Outcome Period, which is when the Fund expects to enter into the FLEX Options for a particular Outcome Period, and the FLEX Options of the Outcome Period will expire at the end of the Outcome Period. Each FLEX Option's value is ultimately derived from the performance of the Underlying ETF's share price during that time. Because the terms of the FLEX Options don't change, the Cap and Buffer both relate to the Fund's NAV on the day the initial FLEX Option positions were established. A shareholder that purchases Shares after the commencement of the Outcome Period will likely have purchased Shares that have a different NAV than the NAV on the day on which the initial FLEX Option positions were established for the Outcome Period (i.e., the NAV upon which the Outcomes are based) and may experience investment Outcomes very different from those sought by the Fund. Since the FLEX Options are exercisable only at the end of the Outcome Period, a shareholder that sells Shares prior to the end of the Outcome Period may also experience investment Outcomes very different from those sought by the Fund. To achieve the Outcomes sought by the Fund for the Outcome Period, an investor must continuously hold Shares from the time that the Fund enters into the initial FLEX Options through the day those FLEX Options expire. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes.

The value of the Fund's FLEX Options is derived from the performance of the underlying reference asset, the Underlying ETF's share price. However, because a component of an option's value is the number of days remaining until its expiration, during the Outcome Period, the Fund's NAV will not directly correlate on a day-to-day basis with the returns experienced by the Underlying ETF. The Sub-Adviser generally anticipates that the Fund's NAV will increase on days when the Underlying ETF's share price increases and will decrease on days when the Underlying ETF's share price decreases, but that the rate of such

increase or decrease will be less than that experienced by the Underlying ETF. Similarly, the amount of time remaining until the end of the Outcome Period also affects the impact of the Buffer on the Fund's NAV, which may not be in full effect prior to the end of the Outcome Period. The Fund's strategy is designed to seek to produce the Outcomes upon the expiration of the FLEX Options on the last day of the Outcome Period and it should not be expected that the Outcomes will be provided at any point prior to that time. Taken together, this means that at the midpoint of the Outcome Period, if the Underlying ETF's share price has decreased by an amount equal to the Buffer, the Fund's NAV can be expected to have decreased in value (because the Buffer is not yet in full effect), but by less than the Buffer (because the Fund's NAV will not correlate one-to-one with the Underlying ETF and the Fund's NAV tends not to participate fully in either Underlying ETF gains or losses).

An investor that holds Shares through multiple Outcome Periods may fail to experience gains comparable to those of the Underlying ETF over time because at the end of each Outcome Period, a new Cap will be established based on the then-current price of the Underlying ETF and any gains experienced by the Underlying ETF above the prior Cap will be forfeited. Similarly, an investor that holds Shares through multiple Outcome Periods will be unable to recapture losses from prior Outcome Periods because at the end of each Outcome Period, a new Buffer will be established based on the then-current price of the Underlying ETF and any losses experienced below the Buffer will be locked in. Moreover, the annual imposition of a new Cap on future gains may make it difficult to recoup any losses from the prior Outcome Periods such that, over multiple Outcome Periods, the Fund may have losses that exceed those of the Underlying ETF.

Cap on Potential Upside Returns. Unlike other investment products, the potential upside returns an investor can receive from an investment in the Fund over the Outcome Period is subject to the Cap. The Cap represents the maximum percentage return an investor can achieve from an investment in the Fund over the duration of the Outcome Period. Therefore, even though the Fund's returns are based upon the performance of the Underlying ETF's share price, if the Underlying ETF's share price experiences returns for the Outcome Period in excess of the Cap, the Fund will not participate in excess returns. The Cap is determined on the business day immediately prior to the first day of the Outcome Period and is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Cap will be further reduced by any shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. The Cap is also set forth on the Fund's website at www.vaneck.com/OCT.

The Cap will change from one Outcome Period to the next based upon prevailing market conditions at the beginning of the Outcome Period. The Cap, and the Fund's position relative to it, should be considered before investing in the Fund. If an investor is considering purchasing Shares during the Outcome Period, and the Fund has already increased in value to a level near to the Cap, an investor purchasing Shares at that price has limited to no gains available for the remainder of the Outcome Period but remains vulnerable to significant downside risks.

There is no guarantee that the Fund will successfully achieve its investment objective. The Cap is a result of the design of the Fund's principal investment strategy. In order to provide the Buffer, the Fund enters into a series of FLEX Option contracts. As the purchaser of certain of these FLEX Options, the Fund is obligated to pay a premium to the seller of those FLEX Options.

However, the strategy is designed so that any premiums that the Fund is obligated to pay are offset by premiums it receives in connection with the selling of FLEX Options. On the business day immediately prior to the first day of the Outcome Period when the Fund enters into its other FLEX Options positions, the portfolio managers will calculate the amount of premiums that the Fund will owe in order to provide the Buffer and will then go into the market and sell a call FLEX Option with terms that entitle the Fund to receive a premium in an amount equal to the amount that the Fund would otherwise owe.

The Cap is the strike price of that sold call FLEX Option. The strike price is determined based upon prevailing market conditions at the time the Fund enters into the FLEX Options, most notably current interest rate levels, volatility in the Underlying ETF's share price, and the relationship of put and calls on the underlying FLEX Options.

Buffer. The Fund seeks to provide shareholders who hold Shares for the entire Outcome Period with a buffer against Underlying ETF losses during the Outcome Period. The amount of the Buffer that the Fund ultimately provides for an Outcome Period is determined based upon the prevailing market conditions at the beginning of an Outcome Period and is a set percentage established at the commencement of each Outcome Period. The Buffer is expected to be set within a range from 15% to 20% of Underlying ETF losses for each Outcome Period, although there is no guarantee the Buffer will be within that range for a particular Outcome Period and the Buffer may change from one Outcome Period to the next. The Buffer for the current Outcome Period is [17.00%]; however, there is no guarantee that the Fund will be successful in its attempt to provide buffered returns. After the Underlying ETF's share price has decreased by more than the Buffer, the Fund will experience all subsequent losses on a one-to-one basis. The Buffer is provided prior to taking into account annual Fund management fees, transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. These fees and any expenses will have the effect of reducing the Buffer amount for Fund shareholders for an Outcome Period.

When the Fund's annual management fee equal to 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the net Buffer for the Outcome Period is [16.50%]. The Fund's strategy is designed to seek to produce the Outcomes upon the expiration of its FLEX Options investments on the last day of the Outcome Period. Therefore, it should not be expected that the Buffer, including the net effect of the Fund's annual management fee on

the Buffer, will be provided at any point prior to the last day of the Outcome Period. If an investor is considering purchasing Shares during the Outcome Period, and the Fund has already decreased in value by an amount equal to or greater than the Buffer, an investor purchasing Shares at that price will have increased gains available prior to reaching the Cap but may not benefit from the Buffer that the Fund seeks to provide for the remainder of the Outcome Period. Conversely, if an investor is considering purchasing Shares during the Outcome Period and the Fund has already increased in value, then a shareholder may experience losses prior to gaining the protection offered by the Buffer, which is not guaranteed. A shareholder that purchases Shares at the beginning of the Outcome Period may lose their entire investment. While the Fund seeks to limit losses for shareholders who hold Shares for the entire Outcome Period based on the Buffer, there is no guarantee it will successfully do so. Depending upon market conditions at the time of purchase, a shareholder that purchases Shares after the Outcome Period has begun may also lose their entire investment. An investment in the Fund is only appropriate for shareholders willing to bear those losses.

Fund Rebalance. The Fund is a continuous investment vehicle. It does not terminate and distribute its assets at the conclusion of each Outcome Period. On the termination date of an Outcome Period, the Sub-Adviser will recommend investments in a new set of FLEX Options and another Outcome Period will commence.

Approximately one week prior to the end of each Outcome Period, the Fund expects to file a prospectus supplement, which will alert existing shareholders that an Outcome Period is approaching its conclusion and disclose the anticipated ranges for the Cap and Buffer for the next Outcome Period. Following the close of business on the last day of the Outcome Period, the Fund expects to file a prospectus supplement that discloses the Fund's final Cap and Buffer (both gross and net of the unitary management fee) for the next Outcome Period.

The Fund's website, www.vaneck.com/OCT, provides information relating to the Outcomes, including the Fund's position relative to the Cap and Buffer, of an investment in the Fund on a daily basis.

The Fund is classified as a "non-diversified company" under the Investment Company Act of 1940, as amended (the "Investment Company Act of 1940").

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Defined Outcome Strategy Risk. The Fund, in employing a "defined outcome strategy" is subject to certain unique risks, which are detailed below.

Buffered Loss Risk. There can be no guarantee that the Fund will be successful in its strategy to provide buffer protection against Underlying ETF losses if the Underlying ETF's share price decreases by less than the Buffer over the duration of the Outcome Period. A shareholder may lose their entire investment. The Fund's strategy seeks to deliver returns that match those of the Underlying ETF (up to the Cap), while limiting downside losses, if Shares are held at the time at which the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into or sells Shares prior to the expiration of the FLEX Options, the Buffer that the Fund seeks to provide may not be available. The Fund does not provide principal protection or non-principal protection, and an investor may experience significant losses on its investment, including the loss of its entire investment. An investor that holds Shares through multiple Outcome Periods will be unable to recapture losses from prior Outcome Periods because at the end of each Outcome Period, a new Buffer will be established based on the then-current price of the Underlying ETF and any losses experienced below the prior Buffer will be locked -in. Further, because the Buffer that the Fund seeks to provide may change from one Outcome Period to the next, an investor may not receive the same Buffer across multiple Outcome Periods.

Capped Upside Return Risk. The Fund's strategy seeks to provide returns that are subject to the Cap. In the event that the Underlying ETF experiences gains in excess of the Cap for the Outcome Period, the Fund will not participate in, and will underperform the Underlying ETF to the extent of, those gains beyond the Cap. The Fund's strategy seeks to deliver returns that match those of the Underlying ETF (up to the Cap), while limiting downside losses, if Shares are held at the time at which the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into, there may be little or no ability for that investor to experience an investment gain on their Shares. Further, because the FLEX Options are designed to produce returns that match the price return of the Underlying ETF (subject to the Cap) on the last day of the Outcome Period, if an investor sells Shares prior to the expiration date of the FLEX Options such investor may sell at a point where the Fund's performance does not match the performance of the Underlying ETF over the Outcome Period, and therefore may sell at a point where the Fund has underperformed the Underlying ETF.

The Fund seeks to actively manage its portfolio such that any transaction fees incurred by the Fund in connection with the management of the Fund's assets will not impact the Fund's performance in seeking to provide upside exposure to the Underlying ETF or the Fund's ability to experience returns that match the Cap, to the extent the returns of the Underlying ETF are equal to or greater than the Cap. However, it is not guaranteed that the Fund will be able to

successfully manage its assets to contemplate the transaction fees incurred by the Fund to achieve the Outcomes sought by the Fund.

Outcome Period Risk. The Fund's investment strategy is designed to deliver returns that match those of the Underlying ETF's share price if Shares are held from the time the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into or sells Shares prior to the expiration of the FLEX Options, the returns realized by the investor will not match those that the Fund seeks to provide.

Upside Participation Risk. There can be no guarantee that the Fund will be successful in its strategy to provide shareholders with a total return that matches the increases in the price of the Underlying ETF over the Outcome Period, subject to a maximum return imposed by the Cap. In the event an investor purchases Shares after the FLEX Options were entered into or does not stay invested in the Fund for the entirety of the Outcome Period, the returns realized by such investor may not match those that the Fund seeks to achieve.

Cap Change Risk. A new Cap is established at the beginning of each Outcome Period and is dependent on prevailing market conditions at the time the Cap is established. As such, the Cap may rise or fall from one Outcome Period to the next and is unlikely to remain the same for consecutive Outcome Periods.

Buffer Change Risk. The amount of the Buffer is a set percentage established at the beginning of each Outcome Period and is determined based upon the prevailing market conditions at that time. The Fund seeks to provide a Buffer against Underlying ETF losses for each Outcome Period that is expected to be set within a range from 15% to 20% for each Outcome Period, although there is no guarantee that the final Buffer set for an Outcome Period will be within this range. The Buffer may rise or fall from one Outcome Period to the next and is unlikely to remain the same from Outcome Period to Outcome Period. Furthermore, the Buffer may be established at the lower end of or below the expected 15% to 20% range for numerous or consecutive Outcome Periods, which would provide the potential for less protection against Underlying ETF losses than if higher Buffers were established during those Outcome Periods.

FLEX Options Risk. The Fund will utilize FLEX Options issued and guaranteed for settlement by the OCC. The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

Additionally, FLEX Options may be less liquid than certain other securities, such as standardized options. In less liquid markets for the FLEX Options, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices. In connection with the creation and redemption of Shares, to the extent market participants are not willing or able to enter into FLEX Option transactions with the Fund at prices that reflect the market price of the Shares, the Fund's NAV and, in turn the share price of the Fund, could be negatively impacted.

The Fund may experience substantial downside from specific FLEX Option positions and certain FLEX Option positions may expire worthless. The FLEX Options held by the Fund are exercisable at the strike price on their expiration date. As a FLEX Option approaches its expiration date, its value typically increasingly moves with the value of the Underlying ETF. However, prior to such date, the value of the FLEX Options does not increase or decrease at the same rate as the Underlying ETF's share price on a day-to-day basis (although they generally move in the same direction). The value of the FLEX Options held by the Fund will be determined based on market quotations or other recognized pricing methods. The value of the underlying FLEX Options will be affected by, among others, changes in the Underlying ETF's share price, changes in interest rates, changes in the actual and implied volatility of the Underlying ETF and the remaining time until the FLEX Options expire.

Option Contracts Risk. The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political developments, changes in the actual or implied volatility of the reference asset, the time remaining until the expiration of the option contract and economic events. There may at times be an imperfect correlation between the movement in values option contracts and the reference asset, and there may at times not be a liquid secondary market for certain option contracts.

Derivatives Risk. Derivatives are financial instruments whose values are based on the value of one or more reference assets or indicators, such as a security, currency, interest rate, or index. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying asset or indicator, a derivative typically does not carry the same rights as would be the case if the Fund invested directly in the underlying securities, currencies or other assets.

Derivatives are subject to a number of risks, such as potential changes in value in response to market developments or, in the case of "over-the-counter" derivatives, as a result of a counterparty's credit quality and the risk that a derivative transaction may not have the effect the Adviser anticipated. Derivatives also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not achieve the desired correlation with the underlying asset or indicator. Derivative transactions can create investment leverage and may be highly volatile, and the Fund could lose more than the

amount it invests. The use of derivatives may increase the amount and affect the timing and character of taxes payable by shareholders of the Fund.

Many derivative transactions are entered into “over-the-counter” without a central clearinghouse; as a result, the value of such a derivative transaction will depend on, among other factors, the ability and the willingness of the Fund’s counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund’s contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund’s rights as a creditor (e.g., the Fund may not receive the net amount of payments that it is contractually entitled to receive). Counterparty risk also refers to the related risks of having concentrated exposure to such a counterparty. A liquid secondary market may not always exist for the Fund’s derivative positions at any time, and the Fund may not be able to initiate or liquidate a swap position at an advantageous time or price, which may result in significant losses. The Fund may also face the risk that it may not be able to meet margin and payment requirements to maintain a derivatives position.

Derivatives are also subject to operational and legal risks. Operational risk generally refers to risk related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human errors. Legal risk generally refers to insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

Clearing Member Default Risk. Transactions in some types of derivatives, including FLEX Options, are required to be centrally cleared (“cleared derivatives”). In a transaction involving cleared derivatives, the Fund’s counterparty is a clearing house, such as the OCC, rather than a bank or broker. Since the Fund is not a member of clearing houses and only members of a clearing house (“clearing members”) can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members. In cleared derivatives positions, the Fund will make payments (including margin payments) to, and receive payments from, a clearing house through their accounts at clearing members. Customer funds held at a clearing organization in connection with any option contracts are held in a commingled omnibus account and are not identified to the name of the clearing member’s individual customers. As a result, assets deposited by the Fund with any clearing member as margin for its FLEX Options may, in certain circumstances, be used to satisfy losses of other clients of the Fund’s clearing member. In addition, although clearing members guarantee performance of their clients’ obligations to the clearing house, there is a risk that the assets of the Fund might not be fully protected in the event of the clearing member’s bankruptcy. The Fund is also subject to the risk that a limited number of clearing members are willing to transact on the Fund’s behalf, which heightens the risks associated with a clearing member’s default. If a clearing member defaults, the Fund could lose some or all of the benefits of a transaction entered into by the Fund with the clearing member. The loss of a clearing member for the Fund to transact with could result in increased transaction costs and other operational issues that could impede the Fund’s ability to implement its investment strategy. If the Fund cannot find a clearing member to transact with on the Fund’s behalf, the Fund may be unable to effectively implement its investment strategy.

Counterparty Risk. Counterparty risk is the risk an issuer, guarantor or counterparty of a security in the Fund is unable or unwilling to meet its obligation on the security. Counterparty risk may arise because of the counterparty’s financial condition, market activities, or for other reasons. The Fund may be unable to recover its investment from the counterparty or may obtain a limited and/or delayed recovery. The OCC acts as guarantor and central counterparty with respect to the FLEX Options. As a result, the ability of the Fund to meet its objective depends on the OCC being able to meet its obligations. In the event an OCC clearing member that is a counterparty of the Fund were to become insolvent, the Fund may have some or all of its FLEX Options closed without its consent or may experience delays or other difficulties in attempting to close or exercise its affected FLEX Options positions, both of which would impair the Fund’s ability to deliver on its investment strategy. The OCC’s rules and procedures are designed to facilitate the prompt settlement of options transactions and exercises, including for clearing member insolvencies. However, there is the risk that the OCC and its backup system will fail if clearing member insolvencies are substantial or widespread. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

Underlying ETF Risk. The Fund’s investment performance largely depends on the investment performance and associated risks of the Underlying ETF. The Underlying ETF is subject to many of the same structural risks as the Fund that are described in more detail herein. However, the risks of investing in an ETF also include the risks associated with the underlying investments held by the ETF. As such, the Fund may be subject to the following risks as a result of its exposure to the Underlying ETF:

Equity Securities Risk. The value of the equity securities held by the Underlying ETF may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Underlying ETF participate, or factors relating to specific issuers in which the Underlying ETF invests. Equity securities are subordinated to preferred securities and debt in a company’s capital structure with respect to priority to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns.

Information Technology Sector Risk. The Underlying ETF may be sensitive to, and its performance may depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The

products of information technology companies may face product obsolescence due to frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. They may face unexpected risks and costs associated with technological developments, such as artificial intelligence and machine learning. Failure to introduce new products, develop and maintain a loyal customer base, or achieve general market acceptance for their products could have a material adverse effect on a company's business. Further, many companies involved in, or exposed to, artificial intelligence-related businesses may be substantially exposed to the market and business risks of other industries or sectors, and the Underlying ETF may be adversely affected by negative developments impacting those companies, industries or sectors. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies. In addition, information technology may face increased government scrutiny and may be subject to adverse government or legal action.

Large-Capitalization Companies Risk. The Underlying ETF may invest in large-capitalization companies and, therefore will be subject to certain risks associated with large-capitalization companies. Securities of large-capitalization companies could fall out of favor with the market and underperform securities of small- or medium-capitalization companies. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

Correlation Risk. The FLEX Options held by the Fund will be exercisable at the strike price only on their expiration date. As a FLEX Option approaches its expiration date, its value typically will increasingly move with the value of the Underlying ETF. However, prior to the expiration date, the value of the FLEX Options may vary prior to the expiration date because of related factors other than the value of the Underlying ETF. The value of the FLEX Options will be determined based upon market quotations or using other recognized pricing methods. Factors that may influence the value of the FLEX Options include interest rate changes and implied volatility levels of the Underlying ETF, among others. The value of the FLEX Options held by the Fund typically do not increase or decrease at the same level as the Underlying ETF's share price on a day-to-day basis due to these factors (although they generally move in the same direction).

Concentration Risk. To the extent the Fund has significant exposure in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A significant exposure makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is more broadly diversified.

Investment Objective Risk. Certain circumstances under which the Fund might not achieve its objective include, but are not limited, to (i) if the Fund disposes of FLEX Options, (ii) if the Fund is unable to maintain the proportional relationship based on the number of FLEX Options in the Fund's portfolio, (iii) a significant accrual of Fund expenses in connection with effecting the Fund's principal investment strategy or (iv) adverse tax law changes affecting the treatment of FLEX Options.

Liquidity Risk. In the event that trading in the underlying FLEX Options is limited or absent, the value of the Fund's FLEX Options may decrease. There is no guarantee that a liquid secondary trading market will exist for the FLEX Options. The trading in FLEX Options may be less deep and liquid than the market for certain other securities, including certain non-customized option contracts. In a less liquid market for the FLEX Options, terminating the FLEX Options may require the payment of a premium or acceptance of a discounted price and may take longer to complete.

Additionally, the liquidation of a large number of FLEX Options may more significantly impact the price in a less liquid market. Further, the Fund requires a sufficient number of participants to facilitate the purchase and sale of options on an exchange to provide liquidity to the Fund for its FLEX Option positions. A less liquid trading market may adversely impact the value of the FLEX Options and the value of your investment.

Market Risk. The Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. Assets may decline in value due to factors affecting financial markets generally or particular asset classes or industries represented in the markets. The value of FLEX Options or other assets may also decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or due to factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates will not have the same impact on all types of securities. The prices of securities are subject to the risks associated with investing in the securities market, including general economic conditions, sudden and unpredictable drops in value, exchange trading suspensions and closures and public health risks. These risks may be magnified if certain social, political, economic and other conditions and events (such as natural disasters, epidemics and pandemics, terrorism, war or other conflicts, social unrest, recessions, inflation, interest rate changes, supply chain disruptions, embargoes, tariffs, sanctions and other trade barriers) adversely interrupt the global economy; in these and other circumstances, such events or developments might affect companies world-wide. Overall securities values could decline generally or underperform other investments. An investment may lose money.

Tax Risk. The Fund intends to qualify as a "regulated investment company" ("RIC"). However, the federal income tax treatment of certain aspects of the proposed operations of the Fund are not entirely clear. This includes the tax aspects of the Fund's options strategy, the possible application of the "straddle" and "constructive sale" rules, and various loss limitation provisions

of the Internal Revenue Code of 1986. If, in any year, the Fund fails to qualify as a regulated investment company under the applicable tax laws, the Fund would be taxed as an ordinary corporation. Certain options on an ETF may not qualify as "Section 1256 contracts" under Section 1256 of the Internal Revenue Code of 1986, and disposition of such options will likely result in short-term or long-term capital gains or losses depending on the holding period.

The Fund intends to treat any income it may derive from the FLEX Options as "qualifying income" under the provisions of the Internal Revenue Code of 1986 applicable to RICs. In addition, based upon language in the legislative history, the Fund intends to treat the issuer of the FLEX Options as the referenced asset, which, assuming the referenced asset qualifies as a RIC, would allow the Fund to qualify for special rules in the RIC diversification requirements. If the income is not qualifying income or the issuer of the FLEX Options is not appropriately the referenced asset, the Fund could lose its own status as a RIC.

To maintain its status as a RIC, the Fund must distribute 90% of its investment company taxable income annually. In addition, to avoid a non-deductible excise tax, the Fund must distribute 98% of its ordinary income and 98.2% of its capital gain net income. Separately, depending upon the circumstances, sales to fund redemptions could cause the Fund to recognize income that the Fund is required to distribute to maintain the Fund's RIC status and avoid the excise tax. Funding such distributions could require additional sales, which could require more distributions and affect the projected performance of the Fund. Alternatively, if the Fund only makes distributions to maintain its RIC status and becomes subject to the excise tax, that could also affect the projected performance of the Fund. In either case, the assets sold to fund redemptions, distributions or pay the excise tax will not be available to assist the Fund in meeting its target outcome.

In the event that a shareholder purchases shares of the Fund shortly before a distribution by the Fund, the entire distribution may be taxable to the shareholder even though a portion of the distribution effectively represents a return of the purchase price.

Investing in ETFs Risk. The Fund's performance may depend in part on the performance of the Underlying ETF in which it invests. The Fund will pay indirectly a proportional share of the fees and expenses of the Underlying ETF in which it invests, including its investment advisory and administration fees, while continuing to pay its own management fee. As a result, the Fund's shareholders will indirectly bear the expenses of the Underlying ETF, absorbing duplicative levels of fees.

Active Management Risk. In managing the Fund's portfolio, the Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. Investment decisions made by the Adviser in seeking to achieve the Fund's investment objective may cause a decline in the value of the investments held by the Fund and, in turn, cause the Fund's shares to lose value or underperform other funds with similar investment objectives.

Sub-Adviser Risk. The Sub-Adviser may have little experience managing registered investment companies which are subject to daily inflows and outflows of investor cash and are subject to certain legal and tax-related restrictions on their investments and operations.

Affiliated Fund Investment Risk. In managing the Fund, the Adviser and/or the Sub-Adviser have the ability to select underlying funds which they believe will achieve the Fund's investment objective. The Adviser and/or the Sub-Adviser may be subject to potential conflicts of interest in selecting underlying funds because the Adviser and/or the Sub-Adviser may, due to its own financial interest or other business considerations, have an incentive to invest in funds managed by the Adviser and/or the Sub-Adviser or their affiliates rather than investing in funds managed or sponsored by others.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures.

Authorized Participant Concentration Risk. The Fund may have a limited number of Authorized Participants, none of which are obligated to engage in creation and/or redemption transactions. To the extent that those Authorized Participants exit the business, or do not process creation and/or redemption orders, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to net asset value and possibly face trading halts and/or de-listing. This can be reflected as a spread between the bid-ask prices for the Fund. The Authorized Participant concentration risk may be heightened with respect to certain types of assets or in cases where Authorized Participants have limited or diminished access to the capital required to post collateral.

New Fund Risk. The Fund is a new fund, with a limited or no operating history and a small asset base. There can be no assurance that the Fund will grow to or maintain a viable size. Due to the Fund's small asset base, certain of the Fund's expenses and its portfolio transaction costs may be higher than those of a fund with a larger asset base. To the extent that the Fund does not grow to or maintain a viable size, it may be liquidated, and the expenses, timing and tax consequences of such liquidation may not be favorable to some shareholders.

Cash Transactions Risk. Unlike other ETFs, the Fund expects to effect its creations and redemptions at least partially for cash, rather than wholly for in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently incur brokerage costs and/or recognize gains or losses on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Transaction costs, including brokerage costs, will decrease the Fund's net asset value to the extent not offset by the transaction fee payable by an Authorized Participant.

No Guarantee of Active Trading Market Risk. There can be no assurance that an active trading market for the Shares will develop or be maintained, as applicable. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its net asset value.

Trading Issues Risk. Trading in shares on the exchange may be halted due to market conditions or for reasons that, in the view of the exchange, make trading in shares inadvisable. In addition, trading in shares on the exchange is subject to trading halts caused by extraordinary market volatility pursuant to the relevant exchange's "circuit breaker" rules. If a trading halt or unanticipated early close of the exchange occurs, a shareholder may be unable to purchase or sell Shares of the Fund. There can be no assurance that requirements of the exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market price of the Shares may fluctuate in response to the Fund's net asset value, the intraday value of the Fund's holdings and supply and demand for Shares. Shares may trade above, below, or at their most recent net asset value. Factors including disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), may result in Shares trading at a significant premium or discount to net asset value or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the net asset value or sells Shares at a time when the market price is at a discount to the net asset value, the shareholder may pay significantly more or receive significantly less than the underlying value of the Shares. The securities held by the Fund may be traded in markets that close at a different time than the exchange on which the Shares are traded. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the exchange is open but after the applicable market closing, fixing or settlement times, bid/ask spreads on the exchange and the resulting premium or discount to the Shares' net asset value may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings and a shareholder may be unable to sell his or her Shares.

Non-Diversified Risk. The Fund is classified as a "non-diversified" fund under the Investment Company Act of 1940. The Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. Moreover, the gains and losses on a single investment may have a greater impact on the Fund's net asset value and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk if it is comprised of a limited number of investments.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund's FLEX Options will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund's investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

PERFORMANCE

The Fund has not yet commenced operations and therefore does not have a performance history. Once available, the Fund's performance information will be accessible on the Fund's website at www.vaneck.com.

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Absolute Return Advisers Corporation.

Investment Sub-Adviser. Lido Advisors, LLC

Portfolio Managers. The following individuals at the Adviser are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Chris Mailloux	Portfolio Manager	October 2026
Peter H. Liao, CFA	Portfolio Manager	October 2026

PURCHASE AND SALE OF FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at a market price. Shares of the Fund are listed on the Exchange, and because Shares trade at market prices rather than net asset value, Shares of the Fund may trade at a price greater than net asset value (*i.e.*, a “premium”) or less than net asset value (*i.e.*, a “discount”).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid-ask spread”).

Recent information, including information about the Fund’s net asset value, market price, premiums and discounts, and bid-ask spreads, is included on the Fund’s website at www.vaneck.com.

TAX INFORMATION

Unless your investment in the Fund is through a tax-exempt entity or tax-deferred retirement account, such as a 401(k) plan, the Fund’s distributions (other than return of capital distributions) are taxable and will generally be taxed as ordinary income or capital gains. Any return of capital will reduce the shareholder’s basis in their Fund Shares, reducing any loss or increasing any gain on a subsequent taxable disposition of Shares.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary’s website for more information.

SUITABILITY STANDARDS

You should only consider this investment if:

- you fully understand the risks inherent in an investment in Shares;
- you desire to invest in a product with a return that depends upon the performance of the Underlying ETF over the Outcome Period;
- you are willing to hold Shares for the duration of the Outcome Period in order to achieve the outcomes that the Fund seeks to provide;
- you fully understand that investments made when the Fund is at or near to the Cap may have limited to no upside;
- you seek the protection of a buffer that is set within an expected range of 15% to 20% on Underlying ETF losses for a particular Outcome Period for an investment held from the time the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period and understand that there is no guarantee that the Fund will be successful in its attempt to provide protection through the Buffer;
- you understand that the Buffer that is set within an expected range of 15% to 20% on Underlying ETF losses for a particular Outcome Period may not be achieved, that there is no guarantee that a particular Buffer will be within this range for a particular Outcome Period, and that the Buffer can change from one Outcome Period to the next;
- you understand that there is no guarantee that the Fund will be successful in its attempt to provide investors protection through the Buffer;

You should not consider this investment if:

- you do not fully understand the risks inherent in an investment in Shares;
- you do not desire to invest in a product with a return that depends upon the performance of the Underlying ETF over the Outcome Period;
- you are unwilling to hold Shares for the duration of the Outcome Period in order to achieve the Outcomes that the Fund seeks to provide;
- you do not fully understand that investments made when the Fund is at or near to the Cap may have limited to no upside;
- you seek an investment that provides either (i) a full Buffer that is set within an expected range of 15% to 20% on Underlying ETF losses for a particular Outcome Period, even after taking into account annual Fund management fees, shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses, or (ii) that provides total protection against Underlying ETF losses, for an investment held from the time the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period;
- you do not understand that the Buffer that is set within an expected range of 15% to 20% on Underlying ETF losses for a particular Outcome Period may not be achieved or seek the protection of a set 20% buffer for every Outcome Period, rather than a buffer within an expected range of 15% to 20% that may change from one Outcome Period to the next;
- you do not understand that any protection provided by the Buffer is not guaranteed;

-
- you understand that the Buffer is provided prior to taking into account annual Fund management fees, shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. After taking into account the annual Fund management fee, pro-rated for the length of the current Outcome Period, the net Buffer for the Outcome Period is [16.50%];
 - you understand that, for certain Outcome Periods, the Fund may hold the Underlying ETF directly and that the Fund will incorporate an assumed dividend rate in the calculation of the Cap and Buffer for that Outcome Period;
 - you are willing to forgo any gains in excess of the Cap;
 - you understand that the Cap will be reduced by annual Fund management fees, shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund;
 - you understand that the Outcomes may not contemplate any dividends paid to the Fund, and the Fund will not receive or benefit from any dividend payments to the extent of its FLEX Option investments;
 - you fully understand that investments made after the Outcome Period has begun may not fully benefit from the Buffer;
 - you are willing to accept the risk of losing your entire investment; and
 - you have visited the Fund's website and understand the investment outcomes available to you based upon the time of your purchase.
- you do not understand that the Buffer is provided prior to taking into account annual Fund management fees, shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund;
 - you do not understand that, for certain Outcome Periods, the Fund may hold the Underlying ETF directly and that the Fund will incorporate an assumed dividend rate in the calculation of the Cap and Buffer for that Outcome Period;
 - you are unwilling to forgo any gains in excess of the Cap;
 - you do not understand that the Cap will be reduced by annual Fund management fees, shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund;
 - you do not fully understand that the Fund's Outcomes may not contemplate any dividends paid to the Fund, and that the Fund will not receive or benefit from any dividend payments to the extent of its FLEX Option investments;
 - you do not fully understand that investments made after the Outcome Period has begun may not fully benefit from the Buffer;
 - you are unwilling to accept the risk of losing your entire investment; and
 - you have not visited the Fund's website and do not understand the investment outcomes available to you based upon the time of your purchase.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENT STRATEGIES AND RISKS

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded fund that seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its total assets in investments that provide exposure to one or more exchange-traded Fund ("ETFs") or unit investment trusts (collectively, the "Underlying ETF"), which seek to track an index comprised of U.S. equities. For purposes of this policy, the term "assets" means net assets plus the amount of any borrowings for investment purposes. The Underlying ETF seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of the S&P 500® Index, by investing in equity securities of U.S. companies, including companies with large capitalizations.

The Fund employs a defined outcome strategy which seeks to produce pre-determined investment outcomes (the "Outcomes") based on the performance of the share price of the Underlying ETF over an approximate one year period. The Fund invests in Flexible Exchange® Options ("FLEX Options") on the Underlying ETF. FLEX Options are exchange-traded option contracts with uniquely customizable terms. Although guaranteed for settlement by the Options Clearing Corporation (the "OCC"), FLEX Options are still subject to counterparty risk with the OCC and may be less liquid than more traditional exchange-traded option contracts. Due to the unique mechanics of the Fund's strategy, the return an investor can expect to receive from an investment in the Fund has characteristics that are distinct from many other investment vehicles. It is important that an investor understand these characteristics before making an investment in the Fund.

In general, an option contract is an agreement between a buyer and seller that gives the purchaser of the option the right to buy or sell a particular asset at a specified future date at an agreed upon price. The reference asset for all of the Fund's FLEX Options is the Underlying ETF. Through its use of FLEX Options on the Underlying ETF, the Fund has significant exposure to companies in the information technology sector.

The Outcomes sought by the Fund, which include the Buffer and Cap discussed below, are based upon the performance of the Underlying ETF's share price over an approximately one-year period from October 1 through September 30 of each year (the "Outcome Period"). The current Outcome Period is from approximately October 1, 2026 through September 30, 2027. Upon conclusion of the Outcome Period, the Fund will receive the cash value of all the FLEX Options it held for the prior Outcome Period. It will then generally invest in a new series of FLEX Options with an expiration date of approximately one year in the future, and a new Outcome Period will begin. **The Outcomes may only be realized by investors who continuously hold Shares from the commencement of the Outcome Period until its conclusion. Investors who purchase Shares after the Outcome Period has begun or sell Shares prior to the Outcome Period's conclusion may experience investment returns that vary from those that the Fund seeks to provide.**

The Fund's strategy has been specifically designed to seek to produce the Outcomes based upon the performance of the Underlying ETF's share price (or its "price return") over the duration of the Outcome Period. The Fund will not receive or benefit from any dividend payments made by the Underlying ETF to the extent of its FLEX Options investments. The Fund is not an appropriate investment for income-seeking investors. If the Underlying ETF's share price increases over the duration of the Outcome Period, the Fund seeks to provide investors that hold Shares for the entire Outcome Period with an increase in value that approximately matches the percentage increase experienced by the Underlying ETF's share price over the duration of the Outcome Period, up to an upside return cap (the "Cap") that represents the maximum percentage return an investor can achieve from an investment in the Fund for the Outcome Period. Therefore, even though the Fund's returns are based upon the performance of the Underlying ETF's share price, if the Underlying ETF's share price experiences returns for the Outcome Period in excess of the Cap, Fund shareholders will not participate in such excess returns.

The Cap is based upon prevailing market conditions at the time the Fund enters into the FLEX Options on the business day immediately prior to the first day of the Outcome Period. For the current Outcome Period, the Cap is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Cap will be further reduced by any shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. Since the Cap is based upon prevailing market conditions at the beginning of an Outcome Period, the Cap will rise or fall from one Outcome Period to the next.

As is discussed in further detail below, it is anticipated that during the Outcome Period the Fund's net asset value ("NAV") will not increase or decrease at the same rate as the Underlying ETF's share price. The Fund's NAV is based upon the value of its portfolio, which is primarily composed of FLEX Options.

Although the value of the Underlying ETF's share price is a significant component of the value of the Fund's FLEX Options, the time remaining until those FLEX Options expire also affects their value. The Fund's investment sub-adviser, Lido Advisors, LLC ("Lido" or the "Sub-Adviser"), generally anticipates that the Fund's NAV will increase on days when the Underlying ETF's share price increases and will decrease on days when the Underlying ETF's share price decreases. Due to the use of options, the rate of such increase or decrease will likely be dampened and will likely be less than that experienced by the Underlying ETF.

The Fund seeks to generate returns that match the Underlying ETF, up to the Cap (discussed in detail below), while limiting downside losses through the implementation of the Buffer. The two hypothetical graphical illustrations provided below are designed to illustrate the Outcomes that the Fund seeks to provide for investors who hold Shares for the entirety of the Outcome Period. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period. The returns that the Fund seeks to provide do not include the costs associated with purchasing Shares and certain expenses incurred by the Fund.

The hypothetical charts above are for illustration purposes only. Shareholders may experience different Outcomes than shown in these illustrations, including loss of their entire investment. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period.

The following table contains **hypothetical** examples designed to illustrate the Outcomes the Fund seeks to provide over an Outcome Period, based upon the performance of the Underlying ETF from -100% to 100%. **The table is provided for illustrative purposes and does not provide every possible performance scenario for Shares over the course of an Outcome Period. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes for an Outcome Period. The table is not intended to predict or project the performance of the FLEX Options or the Fund. Fund shareholders should not take this information as an assurance of the expected performance of the Underlying ETF or return on Shares.** The actual overall performance of the Fund will vary with fluctuations in the value of the FLEX Options during the Outcome Period, among other factors. Please refer to the Fund's website, www.vaneck.com/OCT, which provides updated information relating to this table on a daily basis throughout the Outcome Period.

Underlying ETF Performance	(100)%	(50)%	(20)%	(10)%	(5)%	0%	5%	10%	15%	20%	50%	100%
Fund Performance	[(83)%]	[(33)%]	[(3)%]	[0%]	[0%]	[0%]	[5%]	[10%]	[12.50% -15.00%]	[12.50% -15.50%]	[12.50% -15.50%]	[12.50% -15.50%]

The Cap is set on the business day immediately prior to the first day of the Outcome Period and is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Fund's annual management fee of 0.50% of the Fund's average daily net assets, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund will have the effect of reducing the Cap and Buffer amounts for Fund shareholders and the returns listed herein. The Cap and Buffer may change from one Outcome Period to the next. This table reflects the Cap and the Buffer for the current Outcome Period only.

Use of FLEX Options. The Outcomes may be achieved by purchasing and selling call and put FLEX Options to create layers within the Fund's portfolio. The FLEX Options that comprise the Fund's portfolio each reference the Underlying ETF and are set to expire on the last day of the Outcome Period. The customizable nature of FLEX Options allows the Sub-Adviser to select the share price at which the Underlying ETF will be exercised at the expiration of each FLEX Option. This is commonly known as the "strike price." On the business day immediately prior to the first day of the Outcome Period, the Sub-Adviser specifically selects the strike price for each FLEX Option such that when the FLEX Options are exercised on the final day of the Outcome Period, the Outcomes may be obtained, depending on the performance of the Underlying ETF's share price over the duration of the Outcome Period. The Fund utilizes European style option contracts, which are exercisable only on the expiration date of the option contract.

To achieve the Outcomes, the Fund may purchase and sell a combination of call option contracts and put option contracts. A call option contract gives the buyer of the call option contract the right (but not the obligation) to buy, and the seller of the call option contract (i.e., the "writer") the obligation to sell, a specified amount of an underlying security at a pre-determined price. A put option contract gives the buyer of the put option contract the right (but not the obligation) to sell, and the writer of the put option contract the obligation to buy (if the option is exercised), a specified amount of an underlying security at a pre-determined price.

The effect of the Fund's call option contracts is to provide exposure to the increases in the price of the Underlying ETF, subject to the Cap. The potential investment gains provided by the Fund are subject to the Cap, a maximum investment return level, which is discussed below. The Fund will not participate in gains that exceed the Cap. Separately, the Fund is designed to deliver on its investment objective to provide returns that are buffered by the Buffer if the Underlying ETF's share price experiences a loss during the course of the Outcome Period through its put option contracts. There is no guarantee that the Fund will be successful in its attempt to provide buffered returns. The Buffer that the Fund seeks to provide is only operative against Underlying ETF losses up to the Buffer for the Outcome Period. After the Underlying ETF's share price has decreased in value by more than the Buffer, the Fund will experience all subsequent losses on a one-to-one basis. The effect created by the Fund's Buffer is that if the Underlying ETF's share price has decreased in value over the course of the Outcome Period, the Fund seeks to be returned the amount of its principal investment (if the Underlying ETF's share price decreased in value by an amount equal to the Buffer or less) or experience the losses of the Underlying ETF minus the Buffer (if the Underlying ETF's share price decreased in value by more than the Buffer).

Each of the FLEX Options purchased and sold throughout the Outcome Period are expected to have the same or similar terms (i.e., strike price and expiration) as the corresponding FLEX Options purchased and sold on the business day immediately prior to the first day of the Outcome Period.

The Outcome Period. The Outcomes sought by the Fund are based upon the Fund's NAV on the business day immediately prior to the first day of the Outcome Period, which is when the Fund expects to enter into the FLEX Options for a particular Outcome Period, and the FLEX Options of the Outcome Period will expire at the end of the Outcome Period. Each FLEX Option's value is ultimately derived from the performance of the Underlying ETF's share price during that time. Because the terms of the FLEX Options don't change, the Cap and Buffer both relate to the Fund's NAV on the day the initial FLEX Option positions were established. A shareholder that purchases Shares after the commencement of the Outcome Period will likely have purchased Shares that have a different NAV than the NAV on the day on which the initial FLEX Option positions were established for the Outcome Period (i.e., the NAV upon which the Outcomes are based) and may experience investment Outcomes very different from those sought by the Fund. Since the FLEX Options are exercisable only at the end of the Outcome Period, a shareholder that sells Shares prior to the end of the Outcome Period may also experience investment Outcomes very different from those sought by the Fund. To achieve the Outcomes sought by the Fund for the Outcome Period, an investor must continuously hold Shares from the time that the Fund enters into the initial FLEX Options through the day those FLEX Options expire. There is no guarantee that the Fund will be successful in its attempt to provide the Outcomes.

The value of the Fund's FLEX Options is derived from the performance of the underlying reference asset, the Underlying ETF's share price. However, because a component of an option's value is the number of days remaining until its expiration, during the Outcome Period, the Fund's NAV will not directly correlate on a day-to-day basis with the returns experienced by the Underlying ETF. The Sub-Adviser generally anticipates that the Fund's NAV will increase on days when the Underlying ETF's share price increases and will decrease on days when the Underlying ETF's share price decreases, but that the rate of such increase or decrease will be less than that experienced by the Underlying ETF. Similarly, the amount of time remaining until the end of the Outcome Period also affects the impact of the Buffer on the Fund's NAV, which may not be in full effect prior to the end of the Outcome Period. The Fund's strategy is designed to produce the Outcomes upon the expiration of the FLEX Options on the last day of the Outcome Period and it should not be expected that the Outcomes will be provided at any point prior to that time. Taken together, this means that at the midpoint of the Outcome Period, if the Underlying ETF's share price has decreased by an amount equal to the Buffer, the Fund's NAV can be expected to have decreased in value (because the Buffer is not yet in full effect), but by less than the Buffer (because the Fund's NAV will not correlate one-to-one with the Underlying ETF and the Fund's NAV tends not to participate fully in either Underlying ETF gains or losses).

An investor that holds Shares through multiple Outcome Periods may fail to experience gains comparable to those of the Underlying ETF over time because at the end of each Outcome Period, a new Cap will be established based on the then-current price of the Underlying ETF and any gains experienced by the Underlying ETF above the prior Cap will be forfeited. Similarly, an investor that holds Shares through multiple Outcome Periods will be unable to recapture losses from prior Outcome Periods because at the end of each Outcome Period, a new Buffer will be established based on the then-current price of the Underlying ETF and any losses experienced below the Buffer will be locked in. Moreover, the annual imposition of a new Cap on future gains may make it difficult to recoup any losses from the prior Outcome Periods such that, over multiple Outcome Periods, the Fund may have losses that exceed those of the Underlying ETF.

Cap on Potential Upside Returns. Unlike other investment products, the potential upside returns an investor can receive from an investment in the Fund over the Outcome Period is subject to the Cap. The Cap represents the maximum percentage return an investor can achieve from an investment in the Fund over the duration of the Outcome Period. Therefore, even though the Fund's returns are based upon the performance of the Underlying ETF's share price, if the Underlying ETF's share price experiences returns for the Outcome Period in excess of the Cap, the Fund will not participate in excess returns. The Cap is determined on the business day immediately prior to the first day of the Outcome Period and is [12.50% to 15.50%] prior to taking into account any fees or expenses charged to shareholders. When the Fund's annual Fund management fee of 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the Cap is [12.00% to 15.00%]. The Cap will be further reduced by any shareholder transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses incurred by the Fund. The Cap is also set forth on the Fund's website at www.vaneck.com/OCT.

The Cap will change from one Outcome Period to the next based upon prevailing market conditions at the beginning of the Outcome Period. The Cap, and the Fund's position relative to it, should be considered before investing in the Fund. If an investor is considering purchasing Shares during the Outcome Period, and the Fund has already increased in value to a level near to the Cap, an investor purchasing Shares at that price has limited to no gains available for the remainder of the Outcome Period but remains vulnerable to significant downside risks.

There is no guarantee that the Fund will successfully achieve its investment objective. The Cap is a result of the design of the Fund's principal investment strategy. In order to provide the Buffer, the Fund enters into a series of FLEX Option contracts. As the purchaser of certain of these FLEX Options, the Fund is obligated to pay a premium to the seller of those FLEX Options.

However, the strategy is designed so that any premiums that the Fund is obligated to pay are offset by premiums it receives in connection with the selling of FLEX Options. On the business day immediately prior to the first day of the Outcome Period when the Fund enters into its other FLEX Options positions, the portfolio managers will calculate the amount of premiums that the Fund will owe in order to provide the Buffer and will then go into the market and sell a call FLEX Option with terms that entitle the Fund to receive a premium in an amount equal to the amount that the Fund would otherwise owe.

The Cap is the strike price of that sold call FLEX Option. The strike price is determined based upon prevailing market conditions at the time the Fund enters into the FLEX Options, most notably current interest rate levels, volatility in the Underlying ETF's share price, and the relationship of put and calls on the underlying FLEX Options.

Buffer. The Fund seeks to provide shareholders who hold Shares for the entire Outcome Period with a buffer against Underlying ETF losses during the Outcome Period. The amount of the Buffer that the Fund ultimately provides for an Outcome Period is determined based upon the prevailing market conditions at the beginning of an Outcome Period and is a set percentage established at the commencement of each Outcome Period. The Buffer is expected to be set within a range from 15% to 20% of Underlying ETF losses for each Outcome Period, although there is no guarantee the Buffer will be within that range for a particular Outcome Period and the Buffer may change from one Outcome Period to the next. The Buffer for the current Outcome Period is [17.00%]; however, there is no guarantee that the Fund will be successful in its attempt to provide buffered returns. After the Underlying ETF's share price has decreased by more than the Buffer, the Fund will experience all subsequent losses on a one-to-one basis. The Buffer is provided prior to taking into account annual Fund management fees, transaction fees, any acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and

extraordinary expenses incurred by the Fund. These fees and any expenses will have the effect of reducing the Buffer amount for Fund shareholders for an Outcome Period.

When the Fund's annual management fee equal to 0.50% of the Fund's average daily net assets is taken into account, pro-rated for the length of the current Outcome Period, the net Buffer for the Outcome Period is [16.50%]. The Fund's strategy is designed to seek to produce the Outcomes upon the expiration of its FLEX Options investments on the last day of the Outcome Period. Therefore, it should not be expected that the Buffer, including the net effect of the Fund's annual management fee on the Buffer, will be provided at any point prior to the last day of the Outcome Period. If an investor is considering purchasing Shares during the Outcome Period, and the Fund has already decreased in value by an amount equal to or greater than the Buffer, an investor purchasing Shares at that price will have increased gains available prior to reaching the Cap but may not benefit from the Buffer that the Fund seeks to provide for the remainder of the Outcome Period. Conversely, if an investor is considering purchasing Shares during the Outcome Period and the Fund has already increased in value, then a shareholder may experience losses prior to gaining the protection offered by the Buffer, which is not guaranteed. A shareholder that purchases Shares at the beginning of the Outcome Period may lose their entire investment. While the Fund seeks to limit losses for shareholders who hold Shares for the entire Outcome Period based on the Buffer, there is no guarantee it will successfully do so. Depending upon market conditions at the time of purchase, a shareholder that purchases Shares after the Outcome Period has begun may also lose their entire investment. An investment in the Fund is only appropriate for shareholders willing to bear those losses.

Fund Rebalance. The Fund is a continuous investment vehicle. It does not terminate and distribute its assets at the conclusion of each Outcome Period. On the termination date of an Outcome Period, the Sub-Adviser will recommend investments in a new set of FLEX Options and another Outcome Period will commence.

Approximately one week prior to the end of each Outcome Period, the Fund expects to file a prospectus supplement, which will alert existing shareholders that an Outcome Period is approaching its conclusion and disclose the anticipated ranges for the Cap and Buffer for the next Outcome Period. Following the close of business on the last day of the Outcome Period, the Fund expects to file a prospectus supplement that discloses the Fund's final Cap and Buffer (both gross and net of the unitary management fee) for the next Outcome Period.

The Fund's website, www.vaneck.com/OCT, provides information relating to the Outcomes, including the Fund's position relative to the Cap and Buffer, of an investment in the Fund on a daily basis.

The Fund is classified as a "non-diversified company" under the Investment Company Act of 1940.

FUNDAMENTAL AND NON-FUNDAMENTAL POLICIES

The Fund's investment objective and each of its other investment policies are non-fundamental policies that may be changed by the Board of Trustees of the Trust (the "Board of Trustees") of VanEck ETF Trust (the "Trust") without shareholder approval, except as noted in this Prospectus or the Statement of Additional Information ("SAI") under the section entitled "Investment Policies and Restrictions— Investment Restrictions."

RISKS OF INVESTING IN THE FUND

The following section provides additional information regarding the principal risks identified under "Principal Risks of Investing in the Fund" in the Fund's "Summary Information" section followed by additional risk information. See also the Fund's SAI for information on certain other investments in which the Fund may invest and other investment techniques in which the Fund may engage from time to time and related risks.

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Defined Outcome Strategy Risk. The Fund, in employing a "defined outcome strategy" is subject to certain unique risks, which are detailed below.

Buffered Loss Risk. There can be no guarantee that the Fund will be successful in its strategy to provide buffer protection against Underlying ETF losses if the Underlying ETF's share price decreases by less than the Buffer over the duration of the Outcome Period. A shareholder may lose their entire investment. The Fund's strategy seeks to deliver returns that match those of the Underlying ETF (up to the Cap), while limiting downside losses, if Shares are held at the time at which the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into or sells Shares prior to the expiration of the FLEX Options, the Buffer that the Fund seeks to provide may not be available. Because the value of the FLEX Options depends, in part, on the time remaining until expiration and the Buffer is designed to be in effect at the end of the Outcome Period, it is possible that the Fund's NAV may decrease during the Outcome Period before the Buffer is fully implemented. If a shareholder were to sell at this time, they could recognize losses on their investment. Additionally, because the Buffer is provided by operation of the FLEX Options, the implementation of the Buffer is subject to counterparty risk (for additional information, see "Counterparty Risk" herein). The Fund does not

provide principal protection or non-principal protection, and an investor may experience significant losses on its investment, including the loss of its entire investment. An investor that holds Shares through multiple Outcome Periods will be unable to recapture losses from prior Outcome Periods because at the end of each Outcome Period, a new Buffer will be established based on the then-current price of the Underlying ETF and any losses experienced below the prior Buffer will be locked in. Further, because the Buffer that the Fund seeks to provide may change from one Outcome Period to the next, an investor may not receive the same Buffer across multiple Outcome Periods.

Capped Upside Return Risk. The Fund's strategy seeks to provide returns that are subject to the Cap. In the event that the Underlying ETF experiences gains in excess of the Cap for the Outcome Period, the Fund will not participate in, and will underperform the Underlying ETF to the extent of, those gains beyond the Cap. The Fund's strategy seeks to deliver returns that match those of the Underlying ETF (up to the Cap), while limiting downside losses, if Shares are held at the time at which the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into, there may be little or no ability for that investor to experience an investment gain on their Shares. Further, because the FLEX Options are designed to produce returns that match the price return of the Underlying ETF (subject to the Cap) on the last day of the Outcome Period, if an investor sells Shares prior to the expiration date of the FLEX Options such investor may sell at a point where the Fund's performance does not match the performance of the Underlying ETF over the Outcome Period, and therefore may sell at a point where the Fund has underperformed the Underlying ETF.

The Fund seeks to actively manage its portfolio such that any transaction fees incurred by the Fund in connection with the management of the Fund's assets will not impact the Fund's performance in seeking to provide upside exposure to the Underlying ETF or the Fund's ability to experience returns that match the Cap, to the extent the returns of the Underlying ETF are equal to or greater than the Cap. However, it is not guaranteed that the Fund will be able to successfully manage its assets to contemplate the transaction fees incurred by the Fund to achieve the Outcomes sought by the Fund.

Outcome Period Risk. The Fund's investment strategy is designed to deliver returns that match those of the Underlying ETF's share price if Shares are held from the time the Fund enters into the FLEX Options and held until those FLEX Options expire at the end of the Outcome Period. Because the Fund utilizes European style option contracts, the Outcomes are designed to be produced only on the expiration date of the FLEX Options on the final day of the Outcome Period. In the event an investor purchases Shares after the FLEX Options were entered into or sells Shares prior to the expiration of the FLEX Options, the returns realized by the investor will not match those that the Fund seeks to provide.

Upside Participation Risk. There can be no guarantee that the Fund will be successful in its strategy to provide shareholders with a total return that matches the increases in the price of the Underlying ETF over the Outcome Period, subject to a maximum return imposed by the Cap. Because the value of the Fund's FLEX Options does not increase or decrease at the same rate as the Underlying ETF's share price on a day-to-day basis (although they generally move in the same direction), the Fund may underperform the increases in the share price of the Underlying ETF until the end of the Outcome Period. To the extent the price of the Underlying ETF increases beyond the Fund's Cap, the Fund will not participate in such gains, and will underperform the Underlying ETF. In the event an investor purchases Shares after the FLEX Options were entered into or does not stay invested in the Fund for the entirety of the Outcome Period, the returns realized by such investor may not match those that the Fund seeks to achieve.

Cap Change Risk. A new Cap is established at the beginning of each Outcome Period and is dependent on prevailing market conditions at the time the Cap is established. As such, the Cap may rise or fall from one Outcome Period to the next and is unlikely to remain the same for consecutive Outcome Periods. Investors should monitor the changes in the Cap for each Outcome Period, information for which will be made available pursuant to the procedure outlined in the Fund's prospectus.

Buffer Change Risk. The amount of the Buffer is a set percentage established at the beginning of each Outcome Period and is determined based upon the prevailing market conditions at that time. The Fund seeks to provide a Buffer against Underlying ETF losses for each Outcome Period that is expected to be set within a range from 15% to 20% for each Outcome Period, although there is no guarantee that the final Buffer set for an Outcome Period will be within this range. The Buffer may rise or fall from one Outcome Period to the next and is unlikely to remain the same from Outcome Period to Outcome Period. Furthermore, the Buffer may be established at the lower end of or below the expected 15% to 20% range for numerous or consecutive Outcome Periods, which would provide the potential for less protection against Underlying ETF losses than if higher Buffers were established during those Outcome Periods. Investors should monitor the changes in the Buffer for each Outcome Period, information for which will be made available pursuant to the procedure outlined in the "Additional Information About the Fund's Investment Strategies and Risks - Principal Investment Strategies - Fund Rebalance" section of the Fund's prospectus.

FLEX Options Risk. The Fund will utilize FLEX Options issued and guaranteed for settlement by the OCC. The Fund bears the risk that the OCC will be unable or unwilling to perform its obligations under the FLEX Options contracts. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

Additionally, FLEX Options may be less liquid than certain other securities, such as standardized options. In less liquid markets for the FLEX Options, the Fund may have difficulty closing out certain FLEX Options positions at desired times and prices. In connection with the creation and redemption of Shares, to the extent market participants are not willing or able to enter into FLEX Option transactions with the Fund at prices that reflect the market price of the Shares, the Fund's NAV and, in turn the share price of the Fund, could be negatively impacted.

The Fund may experience substantial downside from specific FLEX Option positions and certain FLEX Option positions may expire worthless. The Fund utilizes European style FLEX Option contracts, which are exercisable at the strike price only on the expiration date. As a FLEX Option approaches its expiration date, its value typically increasingly moves with the value of the Underlying ETF. However, prior to such date, the value of the FLEX Options does not increase or decrease at the same rate as the Underlying ETF's share price on a day-to-day basis (although they generally move in the same direction). The value of the FLEX Options held by the Fund will be determined based on market quotations or other recognized pricing methods. The value of the underlying FLEX Options will be affected by, among others, changes in the Underlying ETF's share price, changes in interest rates, changes in the actual and implied volatility of the Underlying ETF and the remaining time until the FLEX Options expire.

Option Contracts Risk. The use of option contracts involves investment strategies and risks different from those associated with ordinary portfolio securities transactions. The prices of option contracts are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, changes in interest or currency exchange rates, including the anticipated volatility, which are affected by fiscal and monetary policies and by national and international political developments, changes in the actual or implied volatility of the reference asset, the time remaining until the expiration of the option contract and economic events. There may at times be an imperfect correlation between the movement in values option contracts and the reference asset, and there may at times not be a liquid secondary market for certain option contracts. Option contracts may also involve the use of leverage, which could result in greater price volatility than other markets.

Derivatives Risk. Derivatives are financial instruments whose values are based on the value of one or more reference assets or indicators, such as a security, currency, interest rate, or index. The Fund's use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying asset or indicator, a derivative typically does not carry the same rights as would be the case if the Fund invested directly in the underlying securities, currencies or other assets.

Derivatives are subject to a number of risks, such as potential changes in value in response to market developments or, in the case of "over-the-counter" derivatives, as a result of a counterparty's credit quality and the risk that a derivative transaction may not have the effect the Adviser anticipated. Derivatives also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not achieve the desired correlation with the underlying asset or indicator. Derivative transactions can create investment leverage and may be highly volatile, and the Fund could lose more than the amount it invests. The use of derivatives may increase the amount and affect the timing and character of taxes payable by shareholders of the Fund.

Many derivative transactions are entered into "over-the-counter" without a central clearinghouse; as a result, the value of such a derivative transaction will depend on, among other factors, the ability and the willingness of the Fund's counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund's contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund's rights as a creditor (e.g., the Fund may not receive the net amount of payments that it is contractually entitled to receive). Counterparty risk also refers to the related risks of having concentrated exposure to such a counterparty. A liquid secondary market may not always exist for the Fund's derivative positions at any time, and the Fund may not be able to initiate or liquidate a swap position at an advantageous time or price, which may result in significant losses. The Fund may also face the risk that it may not be able to meet margin and payment requirements to maintain a derivatives position.

Derivatives are also subject to operational and legal risks. Operational risk generally refers to risk related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human errors. Legal risk generally refers to insufficient documentation, insufficient capacity or authority of counterparty, or legality or enforceability of a contract.

Clearing Member Default Risk. Transactions in some types of derivatives, including FLEX Options, are required to be centrally cleared ("cleared derivatives"). In a transaction involving cleared derivatives, the Fund's counterparty is a clearing house, such as the OCC, rather than a bank or broker. Since the Fund is not a member of clearing houses and only members of a clearing house ("clearing members") can participate directly in the clearing house, the Fund will hold cleared derivatives through accounts at clearing members. In cleared derivatives positions, the Fund will make payments (including margin payments) to, and receive payments from, a clearing house through their accounts at clearing members. Customer funds held at a clearing organization in connection with any option contracts are held in a commingled omnibus account and are not identified to the name of the clearing member's individual customers. As a result, assets deposited by the Fund with any clearing member as margin for its FLEX Options may, in certain circumstances, be used to satisfy losses of other clients of the Fund's clearing member. In addition, although clearing members guarantee performance of their clients' obligations to the clearing house, there is a risk that the assets of the Fund might not be fully protected in the event of the clearing member's bankruptcy, as the Fund would be limited to recovering only a pro rata share of all available funds segregated on behalf of the clearing member's

customers for the relevant account class. The Fund is also subject to the risk that a limited number of clearing members are willing to transact on the Fund's behalf, which heightens the risks associated with a clearing member's default. If a clearing member defaults, the Fund could lose some or all of the benefits of a transaction entered into by the Fund with the clearing member. The loss of a clearing member for the Fund to transact with could result in increased transaction costs and other operational issues that could impede the Fund's ability to implement its investment strategy. If the Fund cannot find a clearing member to transact with on the Fund's behalf, the Fund may be unable to effectively implement its investment strategy.

Counterparty Risk. Counterparty risk is the risk an issuer, guarantor or counterparty of a security in the Fund is unable or unwilling to meet its obligation on the security. Counterparty risk may arise because of the counterparty's financial condition, market activities, or for other reasons. The Fund may be unable to recover its investment from the counterparty or may obtain a limited and/or delayed recovery. The OCC acts as guarantor and central counterparty with respect to the FLEX Options. As a result, the ability of the Fund to meet its objective depends on the OCC being able to meet its obligations. In the event an OCC clearing member that is a counterparty of the Fund were to become insolvent, the Fund may have some or all of its FLEX Options closed without its consent or may experience delays or other difficulties in attempting to close or exercise its affected FLEX Options positions, both of which would impair the Fund's ability to deliver on its investment strategy. The OCC's rules and procedures are designed to facilitate the prompt settlement of options transactions and exercises, including for clearing member insolvencies. However, there is the risk that the OCC and its backup system will fail if clearing member insolvencies are substantial or widespread. In the unlikely event that the OCC becomes insolvent or is otherwise unable to meet its settlement obligations, the Fund could suffer significant losses.

Underlying ETF Risk. The Fund's investment performance largely depends on the investment performance and associated risks of the Underlying ETF. The Underlying ETF is subject to many of the same structural risks as the Fund that are described in more detail herein. However, the risks of investing in an ETF also include the risks associated with the underlying investments held by the ETF. As such, the Fund may be subject to the following risks as a result of its exposure to the Underlying ETF:

Equity Securities Risk. The value of the equity securities held by the Underlying ETF may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Underlying ETF participate, or factors relating to specific issuers in which the Underlying ETF invests. For example, an adverse event, such as an unfavorable earnings report, may result in a decline in the value of equity securities of an issuer held by the Underlying ETF; the price of the equity securities of an issuer may be particularly sensitive to general movements in the securities markets; or a drop in the securities markets may depress the price of most or all of the equities securities held by the Underlying ETF. In addition, the equity securities of an issuer in the Underlying ETF's portfolio may decline in price if the issuer fails to make anticipated dividend payments. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns.

Information Technology Sector Risk. The Underlying ETF may be sensitive to, and its performance may depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. They may face unexpected risks and costs associated with technological developments, such as artificial intelligence and machine learning. Failure to introduce new products, develop and maintain a loyal customer base, or achieve general market acceptance for their products could have a material adverse effect on a company's business. Further, many companies involved in, or exposed to, artificial intelligence-related businesses may be substantially exposed to the market and business risks of other industries or sectors, and the Underlying ETF may be adversely affected by negative developments impacting those companies, industries or sectors. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies. In addition, information technology may face increased government scrutiny and may be subject to adverse government or legal action.

Large-Capitalization Companies Risk. The Underlying ETF may invest in large-capitalization companies and, therefore will be subject to certain risks associated with large-capitalization companies. Securities of large-capitalization companies could fall out of favor with the market and underperform securities of small- or medium-capitalization companies. Larger, more established companies may be slow to respond to challenges and may grow more slowly than smaller companies.

Correlation Risk. The FLEX Options held by the Fund are European style option contracts and therefore will be exercisable at the strike price only on their expiration date. As a FLEX Option approaches its expiration date, its value typically will increasingly move with the value of the Underlying ETF. However, prior to the expiration date, the value of the FLEX Options may vary versus the value of the Underlying ETF because of related factors other than the value of the Underlying ETF. The value of the FLEX Options will be determined based upon market quotations or using other recognized pricing methods. Factors that may influence the value of the FLEX Options include interest rate changes and implied volatility levels of the

Underlying ETF, among others. The value of the FLEX Options held by the Fund typically do not increase or decrease at the same level as the Underlying ETF's share price on a day-to-day basis due to these factors (although they generally move in the same direction).

Concentration Risk. To the extent the Fund has significant exposure in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A significant exposure makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is more broadly diversified.

Investment Objective Risk. Certain circumstances under which the Fund might not achieve its objective include, but are not limited, to (i) if the Fund disposes of FLEX Options, (ii) if the Fund is unable to maintain the proportional relationship based on the number of FLEX Options in the Fund's portfolio, (iii) a significant accrual of Fund expenses in connection with effecting the Fund's principal investment strategy or (iv) adverse tax law changes affecting the treatment of FLEX Options. The Fund is also subject to management risk as an actively-managed fund, which may cause it not to achieve its investment objective.

Liquidity Risk. The market for the Fund's FLEX Options may become less liquid as a result of adverse market or economic conditions or other unrelated reasons. In the event that trading in the underlying FLEX Options is limited or absent, the value of the Fund's FLEX Options may decrease. There is no guarantee that a liquid secondary trading market will exist for the FLEX Options. The trading in FLEX Options may be less deep and liquid than the market for certain other securities, including certain non-customized option contracts. In a less liquid market for the FLEX Options, terminating the FLEX Options may require the payment of a premium or acceptance of a discounted price and may take longer to complete.

Additionally, the liquidation of a large number of FLEX Options may more significantly impact the price in a less liquid market. Further, the Fund requires a sufficient number of participants to facilitate the purchase and sale of options on an exchange to provide liquidity to the Fund for its FLEX Option positions. A less liquid trading market may adversely impact the value of the FLEX Options and the value of your investment.

Market Risk. The Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. Assets may decline in value due to factors affecting financial markets generally or particular asset classes or industries represented in the markets. The value of FLEX Options or other assets may also decline due to general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or due to factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates will not have the same impact on all types of securities. The prices of securities are subject to the risks associated with investing in the securities market, including general economic conditions, sudden and unpredictable drops in value, exchange trading suspensions and closures and public health risks. These risks may be magnified if certain social, political, economic and other conditions and events (such as natural disasters, epidemics and pandemics, terrorism, war or other conflicts, social unrest, recessions, inflation, interest rate changes, supply chain disruptions, embargoes, tariffs, sanctions and other trade barriers) adversely interrupt the global economy; in these and other circumstances, such events or developments might affect companies world-wide. Overall securities values could decline generally or underperform other investments. An investment may lose money.

Tax Risk. The Fund intends to qualify as a "regulated investment company" ("RIC"). However, the federal income tax treatment of certain aspects of the proposed operations of the Fund are not entirely clear. This includes the tax aspects of the Fund's options strategy, the possible application of the "straddle" and "constructive sale" rules, and various loss limitation provisions of the Internal Revenue Code of 1986. If, in any year, the Fund fails to qualify as a regulated investment company under the applicable tax laws, the Fund would be taxed as an ordinary corporation. Certain options on an ETF may not qualify as "Section 1256 contracts" under Section 1256 of the Internal Revenue Code of 1986, and disposition of such options will likely result in short-term or long-term capital gains or losses depending on the holding period.

The Fund intends to treat any income it may derive from the FLEX Options as "qualifying income" under the provisions of the Internal Revenue Code of 1986 applicable to RICs. In addition, based upon language in the legislative history, the Fund intends to treat the issuer of the FLEX Options as the referenced asset, which, assuming the referenced asset qualifies as a RIC, would allow the Fund to qualify for special rules in the RIC diversification requirements. If the income is not qualifying income or the issuer of the FLEX Options is not appropriately the referenced asset, the Fund could lose its own status as a RIC.

To maintain its status as a RIC, the Fund must distribute 90% of its investment company taxable income annually. In addition, to avoid a non-deductible excise tax, the Fund must distribute 98% of its ordinary income and 98.2% of its capital gain net income. Separately, depending upon the circumstances, sales to fund redemptions could cause the Fund to recognize income that the Fund is required to distribute to maintain the Fund's RIC status and avoid the excise tax. Funding such distributions could require additional sales, which could require more distributions and affect the projected performance of the Fund. Alternatively, if the Fund only makes distributions to maintain its RIC status and becomes subject to the excise tax, that could also affect the projected performance of the Fund. In either case, the assets sold to fund redemptions, distributions or pay the excise tax will not be available to assist the Fund in meeting its target outcome.

In the event that a shareholder purchases shares of the Fund shortly before a distribution by the Fund, the entire distribution may be taxable to the shareholder even though a portion of the distribution effectively represents a return of the purchase price.

Investing in ETFs Risk. The Fund's performance may depend in part on the performance of the Underlying ETF in which it invests. The Fund will pay indirectly a proportional share of the fees and expenses of the Underlying ETF in which it invests, including its investment advisory and administration fees, while continuing to pay its own management fee. As a result, the Fund's shareholders will indirectly bear the expenses of the Underlying ETF, absorbing duplicative levels of fees.

Active Management Risk. In managing the Fund's portfolio, the Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results. Investment decisions made by the Adviser in seeking to achieve the Fund's investment objective may cause a decline in the value of the investments held by the Fund and, in turn, cause the Fund's shares to lose value or underperform other funds with similar investment objectives.

Sub-Adviser Risk. The Sub-Adviser may have little experience managing registered investment companies which are subject to daily inflows and outflows of investor cash and are subject to certain legal and tax-related restrictions on their investments and operations.

Affiliated Fund Investment Risk. In managing the Fund, the Adviser and/or the Sub-Adviser have the ability to select underlying funds which they believe will achieve the Fund's investment objective. The Adviser and/or the Sub-Adviser may be subject to potential conflicts of interest in selecting underlying funds because the Adviser and/or the Sub-Adviser may, due to its own financial interest or other business considerations, have an incentive to invest in funds managed by the Adviser and/or the Sub-Adviser or their affiliates rather than investing in funds managed or sponsored by others.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures.

Authorized Participant Concentration Risk. The Fund may have a limited number of Authorized Participants, none of which are obligated to engage in creation and/or redemption transactions. To the extent that those Authorized Participants exit the business, or do not process creation and/or redemption orders, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to net asset value and possibly face trading halts and/or de-listing. This can be reflected as a spread between the bid-ask prices for the Fund. The Authorized Participant concentration risk may be heightened with respect to certain types of assets or in cases where Authorized Participants have limited or diminished access to the capital required to post collateral.

New Fund Risk. The Fund is a new fund, with a limited or no operating history and a small asset base. There can be no assurance that the Fund will grow to or maintain a viable size. Due to the Fund's small asset base, certain of the Fund's expenses and its portfolio transaction costs may be higher than those of a fund with a larger asset base. To the extent that the Fund does not grow to or maintain a viable size, it may be liquidated, and the expenses, timing and tax consequences of such liquidation may not be favorable to some shareholders.

Cash Transactions Risk. Unlike other ETFs, the Fund expects to effect its creations and redemptions at least partially for cash, rather than wholly for in-kind securities. Because the Fund currently intends to effect all or a portion of redemptions for cash, rather than in-kind distributions, it may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds, which involves transaction costs that the Fund may not have incurred had it effected redemptions entirely in-kind. These costs may include brokerage costs and/or taxable gains or losses, which may be imposed on the Fund and decrease the Fund's net asset value to the extent such costs are not offset by a transaction fee payable by an Authorized Participant. If the Fund recognizes a gain on these sales, this generally will cause the Fund to recognize a gain it might not otherwise have recognized if it were to distribute portfolio securities in-kind, or to recognize such gain sooner than would otherwise be required. As a result, an investment in the Fund may be less tax-efficient than an investment in a more conventional ETF. Other ETFs generally are able to make in-kind redemptions and avoid realizing gains in connection with transactions designed to raise cash to meet redemption requests. The Fund generally intends to distribute these gains to shareholders to avoid being taxed on this gain at the Fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than, if they had made an investment in a different ETF. Additionally, transactions may have to be carried out over several days if the securities market is relatively illiquid and may involve considerable transaction fees and taxes.

No Guarantee of Active Trading Market Risk. There can be no assurance that an active trading market for the Shares will develop or be maintained, as applicable. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and Authorized Participants may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its net asset value.

Van Eck Securities Corporation, the distributor of the Shares, does not maintain a secondary market in the Shares. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those Authorized Participants creating and redeeming directly with the Fund.

Decisions by market makers or Authorized Participants to reduce their role or “step away” from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund’s portfolio securities and the Fund’s market price. This reduced effectiveness could result in Fund Shares trading at a price which differs materially from net asset value and also in greater than normal intraday bid/ask spreads for Fund Shares.

Trading Issues Risk. Trading in shares on the exchange may be halted due to market conditions or for reasons that, in the view of the exchange, make trading in shares inadvisable. In addition, trading in shares on the exchange is subject to trading halts caused by extraordinary market volatility pursuant to the relevant exchange’s “circuit breaker” rules. If a trading halt or unanticipated early close of the exchange occurs, a shareholder may be unable to purchase or sell Shares of the Fund. There can be no assurance that requirements of the exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to net asset value or to the intraday value of the Fund’s holdings. The net asset value of the Shares will fluctuate with changes in the market value of the Fund’s securities holdings. The market price of Shares may fluctuate, in some cases materially, in accordance with changes in net asset value and the intraday value of the Fund’s holdings, as well as supply and demand on the Exchange. Shares may trade below, at or above their net asset value. While the creation/redemption feature is designed to make it likely that Shares normally will trade close to the value of the Fund’s holdings, market prices are not expected to correlate exactly to the Fund’s net asset value due to timing reasons, supply and demand imbalances and other factors. The price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares may be closely related to, but not necessarily identical to, the same forces influencing the prices of the securities of the Fund’s portfolio of investments trading individually or in the aggregate at any point in time. If a shareholder purchases Shares at a time when the market price is at a premium to the net asset value or sells Shares at a time when the market price is at a discount to the net asset value, the shareholder may pay significantly more or receive significantly less than the underlying value of the Shares that were bought or sold or the shareholder may be unable to sell his or her Shares. Any of these factors, discussed above and further below, may lead to the Shares trading at a premium or discount to the Fund’s net asset value. In addition, because certain of the Fund’s underlying securities may trade on exchanges that are closed when the exchange that Shares of the Fund trade on is open, there are likely to be deviations between the expected value of an underlying security and the closing security’s price (i.e., the last quote from its closed foreign market) resulting in premiums or discounts to net asset value that may be greater than those experienced by other ETFs. In addition, the securities held by the Fund may be traded in markets that close at a different time than the Exchange. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the Exchange is open but after the applicable market closing, fixing or settlement times, bid/ask spreads and the resulting premium or discount to the Shares’ net asset value may widen. Additionally, in stressed market conditions, the market for the Fund’s Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.

When you buy or sell Shares of the Fund through a broker, you will likely incur a brokerage commission or other charges imposed by brokers. In addition, the market price of Shares, like the price of any exchange-traded security, includes a bid/ask spread charged by the market makers or other participants that trade the particular security. The spread of the Fund’s Shares varies over time based on the Fund’s trading volume and market liquidity and may increase if the Fund’s trading volume, the spread of the Fund’s underlying securities, or market liquidity decrease. In times of severe market disruption, including when trading of the Fund’s holdings may be halted, the bid/ask spread may increase significantly. This means that Shares may trade at a discount to the Fund’s net asset value, and the discount is likely to be greatest during significant market volatility.

Non-Diversified Risk. The Fund is classified as a “non-diversified” fund under the Investment Company Act of 1940. The Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. Moreover, the gains and losses on a single investment may have a greater impact on the Fund’s net asset value and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk if it is comprised of a limited number of investments.

Valuation Risk. During periods of reduced market liquidity or in the absence of readily available market quotations for the holdings of the Fund, the valuation of the Fund’s FLEX Options will become more difficult. In market environments where there is reduced availability of reliable objective pricing data, the judgment of the Fund’s investment adviser in determining the fair value of the security may play a greater role. While such determinations may be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value.

The Shares will change in value, and you could lose money by investing in the Fund. The Fund may not achieve its investment objective.

ADDITIONAL NON-PRINCIPAL INVESTMENT STRATEGIES

The Fund may also invest in money market instruments, including repurchase agreements or other funds which invest in money market instruments, convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index) and/or certain derivatives. Depositary receipts may be used by the Fund in managing cash flows, and may count towards compliance with the Fund's 80% policy. The Fund may also invest, to the extent permitted by the Investment Company Act of 1940, in other affiliated and unaffiliated funds, such as open-end or closed-end management investment companies, including other ETFs.

BORROWING MONEY

The Fund may borrow money from a bank up to a limit of one-third of the market value of its assets. The Fund is expected to enter into a credit facility to borrow money for temporary, emergency or other purposes, including the funding of shareholder redemption requests, trade settlements and as necessary to distribute to shareholders any income required to maintain the Fund's status as a regulated investment company. To the extent that the Fund borrows money, it may be leveraged; at such times, the Fund will appreciate or depreciate in value. Leverage generally has the effect of increasing the amount of loss or gain the Fund might realize, and may increase volatility in the value of the Fund's investments.

LENDING PORTFOLIO SECURITIES

The Fund may lend its portfolio securities to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. In connection with such loans, the Fund receives cash, U.S. government securities and stand-by letters of credit not issued by the Fund's bank lending agent equal to at least 102% of the value of the portfolio securities being loaned. This collateral is marked-to-market on a daily basis. Although the Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower fail to return the borrowed securities (e.g., the Fund would have to buy replacement securities and the loaned securities may have appreciated beyond the value of the collateral held by the Fund) or become insolvent. The Fund may pay fees to the party arranging the loan of securities. In addition, the Fund will bear the risk that it may lose money because the borrower of the loaned securities fails to return the securities in a timely manner or at all. The Fund could also lose money in the event of a decline in the value of any cash collateral or in the value of investments made with the cash collateral. These events could trigger adverse tax consequences for the Fund. Substitute payments for dividends received by the Fund for securities loaned out by the Fund will not be considered qualified dividend income.

ADDITIONAL NON-PRINCIPAL RISKS

Shareholder Risk. Certain shareholders, including other funds advised by the Adviser or the Sub-Adviser, may from time to time own a substantial amount of the Fund's Shares. In addition, a third-party investor, the Adviser or the Sub-Adviser or an affiliate of the Adviser or the Sub-Adviser, an Authorized Participant, a market maker, or another entity may invest in the Fund and hold its investment for a limited period of time. There can be no assurance that any large shareholder would not redeem (through an Authorized Participant) its investment. Redemptions by shareholders (through an Authorized Participant) could have a negative impact on the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on the exchange and may, therefore, have a material effect on the market price of the Shares.

Leverage Risk. To the extent that the Fund borrows money or utilizes certain derivatives, it may be leveraged. Leveraging generally exaggerates the effect on net asset value of any increase or decrease in the market value of the Fund's portfolio securities. The Fund is required to comply with Rule 18f-4 of the Investment Company Act of 1940 when it engages in transactions that create future Fund payment or delivery obligations. The Fund is required to comply with the asset coverage requirements under the Investment Company Act of 1940 when it engages in borrowings and/or transactions treated as borrowings.

TAX ADVANTAGED PRODUCT STRUCTURE

Unlike many conventional mutual funds which are only bought and sold at closing net asset values, the Shares of the Fund have been designed to be tradable in a secondary market on an intra-day basis and to be redeemed principally in-kind in Creation Units at each day's market close. These in-kind arrangements are designed to mitigate the adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions that affect the net asset value of the Fund. Moreover, in contrast to conventional mutual funds, where frequent redemptions can have an adverse tax impact on taxable shareholders because of the need to sell portfolio securities which, in turn, may generate taxable gain, the in-kind redemption mechanism of the Fund, to the extent used, generally is not expected to lead to a tax event for shareholders whose Shares are not being redeemed.

PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI.

MANAGEMENT OF THE FUND

Board of Trustees. The Board of Trustees has responsibility for the general oversight of the management of the Fund, including general supervision of the Adviser and other service providers, but is not involved in the day-to-day management of the Trust. A list of the Trustees and the Trust officers, and their present positions and principal occupations, is provided in the Fund's SAI.

Investment Adviser and Sub-Adviser. Under the terms of an investment management agreement between the Trust and Van Eck Absolute Return Advisers Corporation with respect to the Fund (the "Investment Management Agreement"), the Adviser serves as the adviser to the Fund and, subject to the supervision of the Board of Trustees, is responsible for the day-to-day investment management of the Fund. Lido Advisors, LLC acts as investment sub-adviser to the Fund and, subject to the oversight of the Adviser, is responsible for recommending to the Adviser the investments relating to the assets allocated to it by the Adviser. The Sub-Adviser serves as investment sub-adviser to the Fund pursuant to an investment sub-advisory agreement between the Adviser and the Sub-Adviser (the "Investment Sub-Advisory Agreement"). The Adviser is a wholly-owned subsidiary of Van Eck Associates Corporation ("VEAC"). As of June 30, 2026, VEAC managed approximately \$237.36 billion in assets. The Adviser has been an investment adviser since 1955 and also acts as adviser or sub-adviser to mutual funds, other ETFs, other pooled investment vehicles and separate accounts. The Adviser's principal business address is 666 Third Avenue, 9th Floor, New York, New York 10017. A discussion regarding the Board of Trustees' approval of the Investment Management Agreement and the Investment Sub-Advisory Agreement will be available in the Trust's filing on Form N-CSR for the period ended October 31, 2026.

Pursuant to the Investment Management Agreement, the Adviser is responsible for all expenses of the Fund, including the costs of transfer agency, custody, fund administration, legal, audit and other services, except for the fee payment under the Investment Management Agreement, acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses. For its services to the Fund, the Fund has agreed to pay the Adviser an annual unitary management fee equal to 0.50% of its average daily net assets. Offering costs excluded from the annual unitary management fee are: (a) legal fees pertaining to the Fund's Shares offered for sale, (b) Securities and Exchange Commission and state registration fees; and (c) initial fees paid for Shares of the Fund to be listed on an exchange. Notwithstanding the foregoing, the Adviser has agreed to pay all such offering costs until at least March 1, 2028.

The Sub-Adviser is Lido Advisors, LLC.

Lido Advisors, LLC has been a registered investment adviser since 2015. The Sub-Adviser's principal business address is 1875 Century Park East, Suite 950, Los Angeles, CA 90067. As of June 30, 2026, the Sub-Adviser, including its affiliates, had approximately \$46.4 billion in total assets under management.

For the services provided and the expenses assumed by the Sub-Adviser pursuant to the Investment Sub-Advisory Agreement, the Adviser (not the Fund) will pay a monthly fee to the Sub-Adviser based on a percentage of the management fee paid to the Adviser, after taking into account expenses paid by the Adviser.

Manager of Managers Structure. The Adviser and the Trust may rely on an exemptive order (the "Order") from the Securities and Exchange Commission that permits the Adviser to enter into investment sub-advisory agreements with unaffiliated sub-advisers without obtaining shareholder approval. The Adviser, subject to the review and approval of the Board of Trustees, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board of Trustees, to replace sub-advisers and amend investment sub-advisory agreements, including applicable fee arrangements, without shareholder approval whenever the Adviser and the Board of Trustees believe such action will benefit the Fund and its shareholders. The Adviser thus would have the responsibility (subject to the oversight of the Board of Trustees) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund's assets for management among any other sub-adviser(s) and itself. This means that the Adviser would be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser would compensate each sub-adviser out of its management fee.

Administrator, Custodian and Transfer Agent. Van Eck Absolute Return Advisers Corporation is the administrator for the Fund (the "Administrator"), and State Street Bank and Trust Company is the custodian of the Fund's assets and provides transfer agency and fund accounting services to the Fund. The Administrator is responsible for certain clerical, recordkeeping and/or bookkeeping services which are required to be provided pursuant to the Investment Management Agreement.

Distributor. Van Eck Securities Corporation is the distributor of the Shares (the "Distributor"). The Distributor will not distribute Shares in less than a specified number of Shares, each called a "Creation Unit," and does not maintain a secondary market in the Shares. The Shares are traded in the secondary market.

PORTFOLIO MANAGERS

The portfolio managers who currently share joint responsibility for the day-to-day management of the Fund's portfolio are Chris Mailloux, CFA and Peter H. Liao, CFA.

Mr. Liao has been employed by the Adviser as an analyst since the summer of 2004 and has been a portfolio manager since 2006. Mr. Liao graduated from New York University in 2004 with a Bachelor of Arts in Economics and Mathematics.

Mr. Mailloux has been employed by the Adviser since 2007. Mr. Mailloux graduated from Lehigh University in 2007 with a Bachelor of Science in Finance.

Each of Messrs. Mailloux and Liao serves as a portfolio manager of other funds of the Trust. Messrs. Mailloux and Liao also serve as portfolio managers for certain other investment companies and pooled investment vehicles advised by the Adviser.

See the Fund's SAI for additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their respective ownership of Shares.

SHAREHOLDER INFORMATION

DETERMINATION OF NAV

The net asset value ("NAV") per Share for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management fee, are accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund is determined each business day as of the close of trading (ordinarily 4:00 p.m., Eastern time) on the New York Stock Exchange.

The values of the Fund's portfolio securities are based on the securities' closing prices on the markets on which the securities trade, when available. Due to the time differences between the United States and certain countries in which the Fund invests, securities on these exchanges may not trade at times when Shares of the Fund will trade. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Debt instruments with remaining maturities of more than 60 days are valued at the evaluated mean price provided by an outside independent pricing service. If an outside independent pricing service is unable to provide a valuation, the instrument is valued at the mean of the highest bid and the lowest asked quotes obtained from one or more brokers or dealers selected by the Adviser. Prices obtained by an outside independent pricing service may use information provided by market makers or estimates of market values obtained from yield data related to investments or securities with similar characteristics and may use a computerized grid matrix of securities and its evaluations in determining what it believes is the fair value of the portfolio securities. Short-term debt instruments having a maturity of 60 days or less are valued at amortized cost. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources. If a market quotation for a security or other asset is not readily available or the Adviser believes it does not otherwise accurately reflect the market value of the security or asset at the time the Fund calculates its NAV, the Board of Trustees has designated the Adviser as the valuation designee pursuant to Rule 2a-5 under the Investment Company Act of 1940 to perform fair valuation for such security or asset in accordance with the Trust's and Adviser's valuation policies and procedures approved by the Board of Trustees. The Fund may also use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. In addition, the Fund currently expects that it will fair value certain of the foreign equity securities held by the Fund, if any, each day the Fund calculates its NAV, except those securities principally traded on exchanges that close at the same time the Fund calculates its NAV.

Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices at the time the exchanges on which they principally trade close. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security or other asset is materially different than the value that could be realized upon the sale of such security or asset. With respect to securities that are principally traded on foreign exchanges, the value of the Fund's portfolio securities may change on days when you will not be able to purchase or sell your Shares.

FLEX Options will typically be valued at a model-based price provided by an independent third-party pricing provider. If a model price from an independent third-party pricing provider is not available or deemed unreliable, the value of a FLEX Option will be determined by the Adviser as valuation designee in accordance with the Trust's valuation policies and procedures.

INTRADAY VALUE

The trading prices of the Fund's Shares in the secondary market generally differ from the Fund's daily NAV and are affected by market forces such as the supply of and demand for Fund Shares and underlying securities held by the Fund, economic conditions and other factors. Information regarding the intraday value of the Fund's Shares ("IIV") may be disseminated throughout each trading day by the Exchange or by market data vendors or other information providers. The IIV is based on the current market value of the securities and/or cash required to be deposited in exchange for a Creation Unit. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by the Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, the IIV should not be viewed as a "real-time" update of

the Fund's NAV, which is computed only once a day. The IIV is generally determined by using current market quotations and/or price quotations obtained from broker-dealers and other market intermediaries that may trade in the portfolio securities held by the Fund and valuations based on current market rates. The quotations and/or valuations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. The Fund is not involved in, or responsible for, the calculation or dissemination of the IIV and makes no warranty as to its accuracy.

RULE 144A AND OTHER UNREGISTERED SECURITIES

An Authorized Participant (*i.e.*, a person eligible to place orders with the Distributor to create or redeem Creation Units of the Fund) that is not a "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act of 1933, as amended (the "Securities Act"), will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A or other unregistered securities.

BUYING AND SELLING EXCHANGE-TRADED SHARES

The Shares of the Fund are expected to be listed on the Exchange. If you buy or sell Shares in the secondary market, you will incur customary brokerage commissions and charges and may pay some or all of the "spread," which is any difference between the bid price and the ask price. The spread varies over time for the Fund's Shares based on the Fund's trading volume and market liquidity, and is generally lower if the Fund has high trading volume and market liquidity, and generally higher if the Fund has little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size). In times of severe market disruption or low trading volume in the Fund's Shares, this spread can increase significantly. It is anticipated that the Shares will trade in the secondary market at prices that may differ to varying degrees from the NAV of the Shares. During periods of disruptions to creations and redemptions or the existence of extreme market volatility, the market prices of Shares are more likely to differ significantly from the Shares' NAV.

The Depository Trust Company ("DTC") serves as securities depository for the Shares. (The Shares may be held only in book-entry form; stock certificates will not be issued.) DTC, or its nominee, is the record or registered owner of all outstanding Shares. Beneficial ownership of Shares will be shown on the records of DTC or its participants (described below). Beneficial owners of Shares are not entitled to have Shares registered in their names, will not receive or be entitled to receive physical delivery of certificates in definitive form and are not considered the registered holder thereof. Accordingly, to exercise any rights of a holder of Shares, each beneficial owner must rely on the procedures of: (i) DTC; (ii) "DTC Participants," *i.e.*, securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC; and (iii) "Indirect Participants," *i.e.*, brokers, dealers, banks and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly, through which such beneficial owner holds its interests. The Trust understands that under existing industry practice, in the event the Trust requests any action of holders of Shares, or a beneficial owner desires to take any action that DTC, as the record owner of all outstanding Shares, is entitled to take, DTC would authorize the DTC Participants to take such action and that the DTC Participants would authorize the Indirect Participants and beneficial owners acting through such DTC Participants to take such action and would otherwise act upon the instructions of beneficial owners owning through them. As described above, the Trust recognizes DTC or its nominee as the owner of all Shares for all purposes. For more information, see the section entitled "Book Entry Only System" in the Fund's SAI.

The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Because non-U.S. exchanges may be open on days when the Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares.

The right of redemption by an Authorized Participant may be suspended or the date of payment postponed (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the Shares of the Fund or determination of its NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the Securities and Exchange Commission.

Market Timing and Related Matters. The Fund imposes no restrictions on the frequency of purchases and redemptions. Frequent purchases and redemptions of Fund Shares may attempt to take advantage of a potential arbitrage opportunity presented by a lag between a change in the value of the Fund's portfolio securities after the close of the primary markets for the Fund's portfolio securities and the reflection of that change in the Fund's NAV ("market timing"). The Board of Trustees considered the nature of the Fund (*i.e.*, a fund whose Shares are expected to trade intraday), that the Adviser monitors the trading activity of Authorized Participants for patterns of abusive trading, that the Fund reserves the right to reject orders that may be disruptive to the management of or otherwise not in the Fund's best interests, and that the Fund may fair value certain of its securities. Given this structure, the Board of Trustees determined that it is not necessary to impose restrictions on the frequency of purchases and redemptions for the Fund at the present time.

DISTRIBUTIONS

Net Investment Income and Capital Gains. As a shareholder of the Fund, you are entitled to your share of the Fund's distributions of net investment income and net realized capital gains on its investments. The Fund pays out substantially all of its net earnings to its shareholders as "distributions."

The Fund typically earns income dividends from stocks and interest from debt securities. These amounts, net of expenses, are typically passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains or losses whenever it sells securities. Net capital gains are distributed to shareholders as "capital gain distributions." Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income. Any long-term capital gains distributions you receive from the Fund are taxable as long-term capital gains.

Net investment income and net realized capital gains, if any, is typically distributed to shareholders annually. Dividends may be declared and paid more frequently to comply with the distribution requirements of the U.S. Internal Revenue Code of 1986. In addition, in situations where the Fund acquires investment securities after the beginning of a dividend period, the Fund may elect to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period. If the Fund so elects, some portion of each distribution may result in a return of capital, which, for tax purposes, is treated as a return of your investment in Shares. You will be notified regarding the portion of the distribution which represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of the Fund only if the broker through which you purchased Shares makes such option available.

TAX INFORMATION

As with any investment, you should consider how your Fund investment will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in the Fund, including the possible application of foreign, state and local taxes. Unless your investment in the Fund is through a tax-exempt entity or tax-deferred retirement account, such as a 401(k) plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions, (ii) you sell Shares in the secondary market or (iii) an Authorized Participant creates or redeems Creation Units.

Taxes on Distributions. As noted above, the Fund expects to distribute net investment income, if any, annually, and any net realized long-term or short-term capital gains, if any, annually. The Fund may also pay a special distribution at any time to comply with U.S. federal tax requirements.

In general, your distributions are subject to U.S. federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund. Distributions of net investment income, including net short-term gains, if any, are generally taxable as ordinary income. Whether distributions of capital gains represent long-term or short-term capital gains is determined by how long the Fund owned the investments that generated them, rather than how long you have owned your Shares. Distributions of net short-term capital gains in excess of net long-term capital losses, if any, are generally taxable as ordinary income. Distributions of net long-term capital gains in excess of net short-term capital losses, if any, that are properly reported as capital gain dividends are generally taxable as long-term capital gains. Long-term capital gains of a non-corporate shareholder are generally taxable at a maximum rate of 15% or 20%, depending on whether the shareholder's income exceeds certain threshold amounts. Due to the Fund's investment strategy, there can be no assurance that any significant portion of the Fund's distributions will be eligible for long-term capital gain treatment.

The Fund may receive dividends, the distribution of which the Fund may report as qualified dividends. In the event that the Fund receives such a dividend and reports the distribution of such dividend as a qualified dividend, the dividend may be taxed at the maximum capital gains rates of 15% or 20%, provided holding period and other requirements are met at both the shareholder and the Fund level. Due to the Fund's investment strategy, there can be no assurance that any significant portion of the Fund's distributions will be eligible for qualified dividend treatment.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the Shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in Shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of Shares. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

Backup Withholding. The Fund may be required to withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number or otherwise established a basis for exemption from backup withholding. The backup withholding rate for individuals is currently 24%. This is not an additional tax and may be refunded, or credited against your U.S. federal income tax liability, provided certain required information is timely furnished to the Internal Revenue Service.

Taxes on the Sale or Cash Redemption of Exchange Listed Shares. Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited. To the extent that the Fund shareholder's Shares are redeemed for cash, this is normally treated as a sale for tax purposes.

Taxes on Creations and Redemptions of Creation Units. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. A person who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities for Creation Units or redeeming Creation Units should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Any capital gain or loss realized upon a redemption (or creation) of Creation Units held as capital assets is generally treated as long-term capital gain or loss if the Shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the Shares (or securities surrendered) have been held for one year or less.

If you create or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you created or sold and at what price.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Non-U.S. Shareholders. Dividends paid by the Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate or a reduced rate specified by an applicable income tax treaty to the extent derived from investment income and short-term capital gains. Dividends paid by the Fund from net tax-exempt income or long-term capital gains are generally not subject to such withholding tax. Properly-reported dividends are generally exempt from U.S. federal withholding tax where they (i) are paid in respect of the Fund's "qualified net interest income" (generally, the Fund's U.S. source interest income, other than certain contingent interest and interest from obligations of a corporation or partnership in which the Fund is at least a 10% shareholder, reduced by expenses that are allocable to such income); or (ii) are paid in respect of the Fund's "qualified short-term capital gains" (generally, the excess of the Fund's net short-term capital gain over the Fund's long-term capital loss for such taxable year). However, depending on its circumstances, the Fund may report all, some or none of its potentially eligible dividends as such qualified net interest income or as qualified short-term capital gains and/or treat such dividends, in whole or in part, as ineligible for this exemption from withholding.

Any capital gain realized by a non-U.S. shareholder upon a sale of Shares of the Fund will generally not be subject to U.S. federal income or withholding tax unless (i) the gain is effectively connected with the shareholder's trade or business in the United States, or in the case of a shareholder who is a nonresident alien individual, the shareholder is present in the United States for 183 days or more during the taxable year and certain other conditions are met or (ii) the Fund is or has been a U.S. real property holding corporation, as defined below, at any time within the five-year period preceding the date of disposition of the Fund's Shares or, if shorter, within the period during which the non-U.S. shareholder has held the Shares. Generally, a corporation is a U.S. real property holding corporation if the fair market value of its U.S. real property interests, as defined in the Internal Revenue Code and applicable regulations, equals or exceeds 50% of the aggregate fair market value of its worldwide real property interests and its other assets used or held for use in a trade or business. The Fund may be, or may prior to a non-U.S. shareholder's disposition of Shares become, a U.S. real property holding corporation. If the Fund is or becomes a U.S. real property holding corporation, so long as the Fund's Shares are regularly traded on an established securities market, only a non-U.S. shareholder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% (directly or indirectly as determined under applicable attribution rules of the Internal Revenue Code) of the Fund's Shares will be subject to U.S. federal income tax on the disposition of Shares.

As part of the Foreign Account Tax Compliance Act, ("FATCA"), the Fund may be required to withhold 30% tax on certain types of U.S. sourced income (e.g., dividends, interest, and other types of passive income) paid to (i) foreign financial institutions ("FFIs"), including non-U.S. investment funds, unless they agree to collect and disclose to the IRS information regarding their direct and indirect U.S. account holders and (ii) certain nonfinancial foreign entities ("NFFEs"), unless they certify certain information regarding their direct and indirect U.S. owners. To avoid possible withholding, FFIs will need to enter into agreements with the IRS which state that they will provide the IRS information, including the names, account numbers and balances, addresses and taxpayer identification numbers of U.S. account holders and comply with due diligence procedures with respect to the identification of U.S. accounts as well as agree to withhold tax on certain types of withholdable payments made to non-compliant foreign financial institutions or to applicable foreign account holders who fail to provide the required information to the IRS, or similar account information and required documentation to a local revenue authority, should an applicable intergovernmental agreement be implemented. NFFEs will need to provide certain information regarding each substantial U.S. owner or certifications of no substantial U.S. ownership, unless certain exceptions apply, or agree to provide certain information to the Internal Revenue Service.

The Fund may be subject to the FATCA withholding obligation, and also will be required to perform due diligence reviews to classify foreign entity investors for FATCA purposes. Investors are required to agree to provide information necessary to allow the Fund to comply with the FATCA rules. If the Fund is required to withhold amounts from payments pursuant to FATCA, investors will receive distributions that are reduced by such withholding amounts.

Non-U.S. shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Fund, including the possible applicability of the U.S. estate tax.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your own tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws. Changes in applicable tax authority could materially affect the conclusions discussed above and could adversely affect the Fund, and such changes often occur.

FINANCIAL HIGHLIGHTS

The Fund has not yet commenced operations as of the date of this Prospectus and therefore does not have a financial history.

PREMIUM/DISCOUNT INFORMATION

The Fund has not yet commenced operations and, therefore, does not have information about the differences between the Fund's daily market price on the Exchange and its NAV. Information regarding how often the closing trading price of the Shares of the Fund was above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund for the most recently completed calendar year and the most recently completed calendar quarter(s) since that year (or the life of the Fund, if shorter) can be found at www.vaneck.com.

GENERAL INFORMATION

CONTINUOUS OFFERING

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Trust on an ongoing basis, a "distribution," as such term is used in the Securities Act may occur at any point. Broker dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker dealers who are not "underwriters" but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act of 1940. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(a)(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

In addition, certain affiliates of the Fund and the Adviser or the Sub-Adviser may purchase and resell Fund Shares pursuant to this Prospectus.

OTHER INFORMATION

The Trust was organized as a Delaware statutory trust on March 15, 2001. Its Declaration of Trust currently permits the Trust to issue an unlimited number of Shares of beneficial interest. If shareholders are required to vote on any matters, each Share outstanding would be entitled to one vote. Annual meetings of shareholders will not be held except as required by the Investment Company Act of 1940 and other applicable law. See the Fund's SAI for more information concerning the Trust's form of organization. Section 12(d)(1) of the Investment Company Act of 1940 restricts investments by investment companies in the securities of other investment companies, including Shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in Securities and Exchange Commission regulations, including that such investment companies enter into an agreement with the Fund.

The Prospectus, SAI and any other Fund communication do not create any contractual obligations between the Fund's shareholders and the Trust, the Fund, the Adviser and/or the Trustees. Further, shareholders are not intended third party beneficiaries of any contracts entered into by (or on behalf of) the Fund, including contracts with the Adviser or other parties who provide services to the Fund.

Dechert LLP serves as counsel to the Trust, including the Fund. PricewaterhouseCoopers LLP serves as the Trust's independent registered public accounting firm and will audit the Fund's financial statements annually.

ADDITIONAL INFORMATION

This Prospectus does not contain all the information included in the Registration Statement filed with the Securities and Exchange Commission with respect to the Fund's Shares. The Fund's Registration Statement, including this Prospectus, the Fund's SAI and the exhibits are available on the EDGAR database at the Securities and Exchange Commission's website (<http://www.sec.gov>), and copies may be obtained, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov.

The SAI for the Fund, which has been filed with the Securities and Exchange Commission, provides more information about the Fund. The SAI for the Fund is incorporated herein by reference and is legally part of this Prospectus.

Shareholder inquiries may be directed to the Fund in writing to 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling 800.826.2333.

The Fund's SAI is available at www.vaneck.com.
