

We are pleased to provide the following information which summarizes the 2018 estimated yearend income and capital gain distributions for the VanEck Vectors® ETFs.

Please note that these yearend estimates were made as of October 31, 2018 based upon best information available and may be subject to significant change based on a number of factors, including changes in the number of shares outstanding, changes in income that may occur prior to record date, certain tax adjustments and reclassifications, etc. These factors may also result in some VanEck Vectors ETFs which currently show no estimated income or capital gain distributions making a distribution at yearend. We strongly urge shareholders to consult with their tax advisers regarding the tax consequences of these distributions. You should not make investment decisions based on this information.

Passive Foreign Investment Company (PFIC) Income

Several VanEck Vectors ETFs may make investments in non-U.S. corporations classified as "passive foreign investment companies". Generally speaking, PFICs are non-U.S. corporations having 50% or more of their assets invested in cash or securities, or having 75% or more of their gross income originating from passive sources, including but not limited to interest, dividends and rents. In other words, these foreign companies primarily derive their revenue streams from investments (rather than operations). Please refer to your VanEck Vectors ETF's Statement of Additional Information (SAI) for further information on PFICs.

Any statement contained in this communication concerning U.S. tax matters is not intended or written to be used, and cannot be used, for the purpose of avoiding penalties imposed on the relevant taxpayer. Shareholders or potential shareholders of the VanEck Vectors ETFs should obtain their own independent tax advice based on their particular circumstances.
